

About us

A leading manufacturer of sustainable plastic products for the Home Decor & Home Furnishing industry since 2002. Our products are retailed at numerous Fortune 500 retailers, providing eco-friendly, GRS and RCS certified solutions that are recognised by all the retailers worldwide.

At our plant we use three main plasticizing techniques – Plastic Extrusion, Injection Molding and Compression Molding to manufacture various product ranges all under one roof. Our commitment to sustainability and innovation has earned us a reputation for excellence, and we continue to lead the way in the manufacturing of all eco-friendly products.

To develop, manufacture and market **high quality** plastic extruded products; improve **environmental sustainability** and **customer profitability**. Our operations are mainly concentrated in areas where we are/or have potential to become a **market leader**.
