PULL BOX SYSTEM - IL BREVETTO / THE PATENT

I contenitori Pull Box hanno un sistema di **apertura/chiusura a una mano brevettato**: con un clic si aprono e con un altro si chiudono ermeticamente agendo sulla pratica leva con asola.

Al momento della chiusura, il coperchio va inserito con la leva sollevata, in modo da far fuoriuscire l'aria presente all'interno del contenitore.

Pull Box è **ermetico** e, nell'utilizzo in microonde, la **valvola** presente sotto alla leva di apertura permette al vapore di fuoriuscire anche con il coperchio a copertura del contenitore.

.....
*Pull Box containers have a 1 hand **patented opening/closing system**: with one click they open and with another they close tightly by acting on the lever with the slot.*

When closing, the lid must be inserted with the lever raised, in order to allow the air present inside the container to escape.

*Pull Box is **leak proof** and, when used in microwave, the **valve** under the opening lever allows the steam to escape, even with the container covered by the lid.*

CLOSING

1 Premi il coperchio con leva sollevata
Press the lid with lifted lever
2 Clicca per bloccare la chiusura
Click for a secure closing

Pull Box Chef ha la soluzione per ogni esigenza grazie ai suoi innumerevoli plus:

Pull Box Chef has the solution for every need thanks to its countless pluses:

- Un'innovazione brevettata che è già un «must». Il **coperchio che non sporge** e si apre con una mano è la novità di Pull Box Chef, che unisce la praticità all'innovazione e al colore.

- *A patented innovation which is becoming a «must to have». The lid that does not protrude and opens/closes with one hand is the novelty of Pull Box Chef, which combines practicality with innovation and color.*

- Nell'utilizzo al **microonde**, la leva deve rimanere sollevata per la fuoriuscita del vapore.

- *When used in the microwave, the lever must be lifted to allow steam to escape.*

- Disponibile in 4 colori e 5 capacità.

- *Available in 4 colors and 5 sizes.*
