

DHINK®

Growing up is optional

BRANDS BY MTM

DHINK®

Growing up is optional

Growing old is mandatory, but growing up is optional!

Dhink® designs and creates sweet and cool solutions for the (children's)room and many more Dhink's for your day-to-day life.

During this journey, Dhink® adheres to the belief that children's [or grown-up kid's] imaginations should be translated as vividly as possible. This mindset is brought to reality on a daily base in its design and in every small detail of the development to become as playful & imaginative as possible.

Time to plunge into the Dhink® universe!

How Dhink creates its magic?

Sketching

Dhink® stands for think & do, do & think, dhink!

It starts off simple - a pencil and paper, how it should be! Each new family member is drawn up to help them come to life, expressions and all.

Prototyping

By 3D-printing or prototyping our models & packaging, we have an on-hand model to study all the tiniest details. This essential step in our development helps us to give each product the right look & feel our family needs.

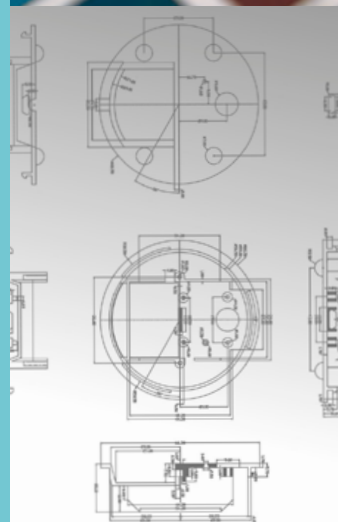

Production

With support from our Asian teammates, we have all the production processes right at our back door. From mold-making to production & quality control, every step is carefully watched by our in-house detectives.

Next to the manufacturing of the models, dhink creates its own electronic mechanism. This guarantees a stable light source, multiple functions, and the correct luminosity for the (children's) room.

Color is Emotion! So we add a lot.

Painting Steps

"Colors affect people's mood"

One of the key points of the Dinko® family is the painting process. All the designs contain 5 up to 20 different painting steps to make this family stand, also when the light is switched off.

Quality testing

All our parts are always tested to conform with the highest European & American standards. Covering the CE, Reach, Rohs, EN71*-1,2,3,...

Before leaving their birth-place, all the Dinko® lights are checked by our Quality Control team, making sure they arrive with their new owners in the greatest shape.

(*Toy test not applicable for light strings)

Packaging

To make the story complete, Dinko® decided to work on its ecological footprint by minimizing the use of single-use plastics & fully colored packaging prints.

The new 'Dinko® Twice' packaging is made from a raw cardboard base and the night light inside is packed in a HOME-compostable bag (non-plastic). All the printing steps are also done by using soy-ink.

THE REAL WILDLIFE STORY

What is nicer than introducing the new 'Wild Life Collection' with giving something back to the real Wild Life?

With Brands by MTM, we've planted 500m² of Wild Life forest in 2022 to increase natural habitat for the local animals. Starting in Belgium & more countries and locations to follow.
