

Plastex

Plastex is a family company from Finland. Since 1936, our products have been shaping people's everyday lives and can be found in almost every Finnish household. Secure and fast delivery from Finland!

We attach great importance to responsibly manufactured, durable, and recyclable products. Responsibility and sustainable development mean that products are designed to last as long as possible, be safe and fit for purpose, and minimize the energy and material used in their manufacture and the environmental impact throughout their life cycle.

Our products are made from high-quality, BPA-free, recyclable materials; where possible, the entire product is recycled or bio-based. Most of our products are made in Finland, which reduces our products' environmental and carbon footprint.

Plastex Water container 10L

High-quality wide-neck water canister with a tap!

The tap can be left open to drain water and keep your hands free. The water container is easy to carry and has a sturdy handle. In addition to water, it is also very suitable for juice, house wine, and homemade drinks, for example.

Easy to clean and keep clean thanks to the large mouth opening. The seal in the cork ensures the tightness of the water container. Transport and storage in an upright position. Capacity 10L. Made in Finland. Made of food-grade plastic and suitable for use with food.

- Water tank made of BPA-free plastic with a capacity of 10 liters for drinking water and other liquids
- The wide-mouth plastic canister has a large top-lock opening for easy filling and cleaning; the heavy-duty tap holds you and is easy to open
- The food-safe freshwater canister has a handy and stable handle for easy carrying
- Essential camping accessory and part of festival gear
