

Bottlelight Company - Bottle series

Our artful glass bottles are high-quality handcrafted glass bottles, which are mostly made by sandblasting. In combination with our bottle-light lamps they give beautiful light patterns on a table surface. With our lamps giving warm white light a nice and cosy atmosphere is generated. With our lamps giving cold white light, the bottles look very fresh and elegant.

All glass bottles are individually packed with a product label, and they carry an EAN code.

Bottle Stripes
