TITANIUM LINE

Thanks to the combination of a ten-year experience in the production of cleaning items and the taste for beauty, we have created the new Titanium Line dedicated to daily household cleaning.

With this range of items you will have both the quality that has always distinguished Casamia products over the years and an elegant mix of lines and colours that will enhance your home. We believe that we can contribute to a better world even with small things; that is the reason why we have paid particular attention to environmental care by offering low impact materials and packagings.

The key points of all articles are:

STYLE
QUALITY
COLOUR
SUSTAINABILITY
MADE IN ITALY

The Titanium line includes a range of new, brilliant and eco-sustainable brooms. The fibres are made entirely of PET: a high quality material completely RECYCLED AND RECYCLABLE. The products are presented with an attractive and modern packaging to emphasize the features of this line. The TITANIUM COLLECTION catalogue is constantly expanding and will be enriched with a selection of products that can meet the requirements of our top range.

YARN WEAVING

We have been producing in Italy for over 50 years floor cloths from yarn to packaging.

CHICCO ORO

The expression ORO (GOLD) immediately recalls the precious content of this product. Its "brilliant" secret is the presence of an Italian microfibre structure that is woven on an Italian cotton cloth.

We might as well call it a revolutionary product that, with the boldness of a family run business, hopes to stem the flow of imported microfibre products. Without any false modesty we have tried to offer our collaborators and clients our expertise in creating and distributing a Floor-cloth with outstanding performing features:

- the cleaning ability and gentleness of the microfibre
- its outstanding absorbing capacity of liquids (5 times its weight)
- durability.

Chicco Oro is the solution to everyday small housekeeping and a small/big contribute to the Made in Italy.

It is effective on any kind of surface, from the kitchen to the bathroom floor, from ceramic to wooden surfaces.

If used damp it washes and dries deeply, thanks to the presence of microfibre; if used dry it has a very high electrostatic power. What's more thanks to its absorption capacity it has an uncomparable cleaning and degreasing power, even while absorbing oil, as laboratory tests have shown.

OUR MICROFIBRES

MICROPOLY with polyurethane

IDEAL for removing dirt from steel and chrome surfaces in the kitchen by combining the cleaning and degreasing power of microfiber with the ability to remove traces of limestone without leaving polyurethane streaks. It will be like having two products in one: microfiber and synthetic leather. Use wet and well wrung for dry, shiny and streak-free surfaces.

S 410

The background is a vibrant, deep red color. It features a dynamic splash of lighter red ink or paint, creating swirling, cloud-like patterns. On the right side, a paintbrush with a dark handle and a dense, dark bristle head is visible, angled downwards. The overall composition is artistic and evocative of the color's name.
