Our clients :

DOLLAR GENERAL

Poundland®

Our factory and infrastructure

Total Factory size (in sq ft.) : 30,000 sq ft. on ground floor
With future plan to increase the area.

Wax Powder Making Machine:

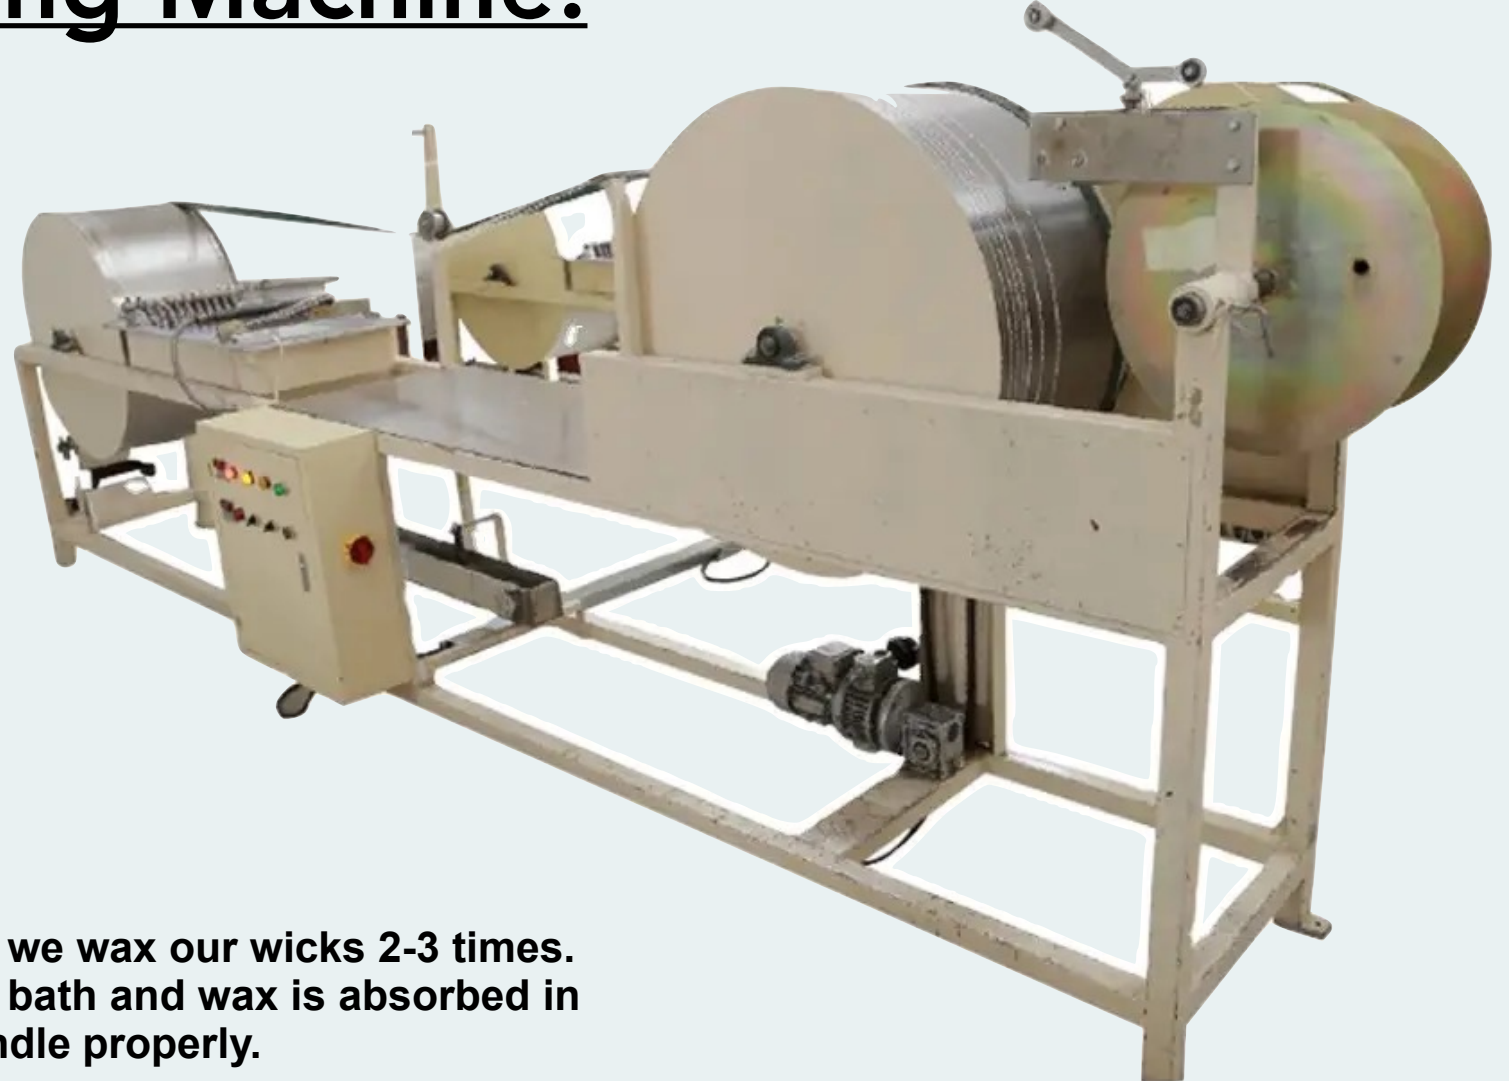

Our Production process uses a huge of amountof simplified wax, which is converted using this machine to powder form.

Benefits : Faster Production. Production Capacity: 500 kgs / hour.

Wick Wax Coating Machine:

Waxing the cotton wick is very essential, we wax our wicks 2-3 times. The cotton wick spool goes through wax bath and wax is absorbed in the process. This helps in burning the candle properly.

Benefits : Better Burning of Candle

Wick Tabbng Machine:

This machines helps in cutting the wick in desired size and tabbing the wick with sustainer.

Functions : Cutting wick in desired size.

Wax Melting Machine:

Our facility is installed with 6 electric melters , which heats and melts the solid wax into liquid form

Manual Extrusion Machine for Household & Taper Candles:

Our Facility is installed with 40+ extrusion machine, which helps us in producing different width and height of household candles.

Benefits: Easy & Fast

Production Capacity:
200-300 units / hour.

Semi Automatic Wax Filling Machine:

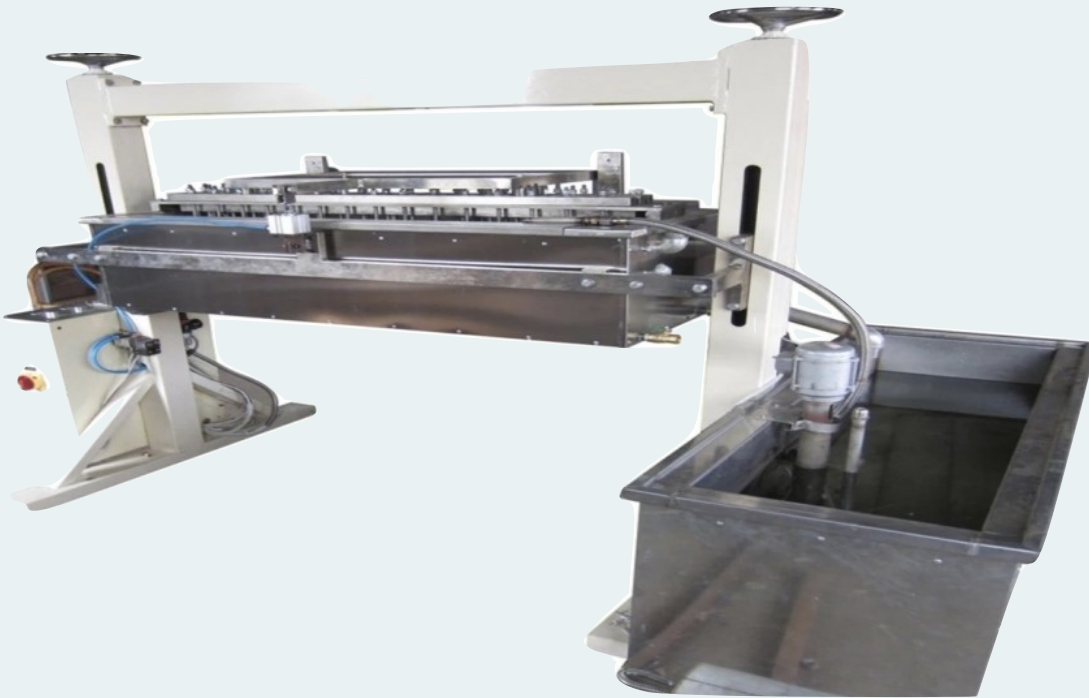

Our Facility is installed with 10 filling machine, which helps us filling votive and jar candles. The machine pour the volume of wax set on computerised system with accuracy.

Benefits : Small Quantity Production.

Production Capacity: upto 5000 units / day.

Automatic Wax Filling Machine:

Our Facility is installed with 1 automatic wax filling line, which helps us in filling votive and jar candles in quantity above 12,000 pcs / style. The machine pour the volume of wax set on computerised system with accuracy.

Benefits : Large Quantity Production.

Production Capacity: 12,000 units / day.

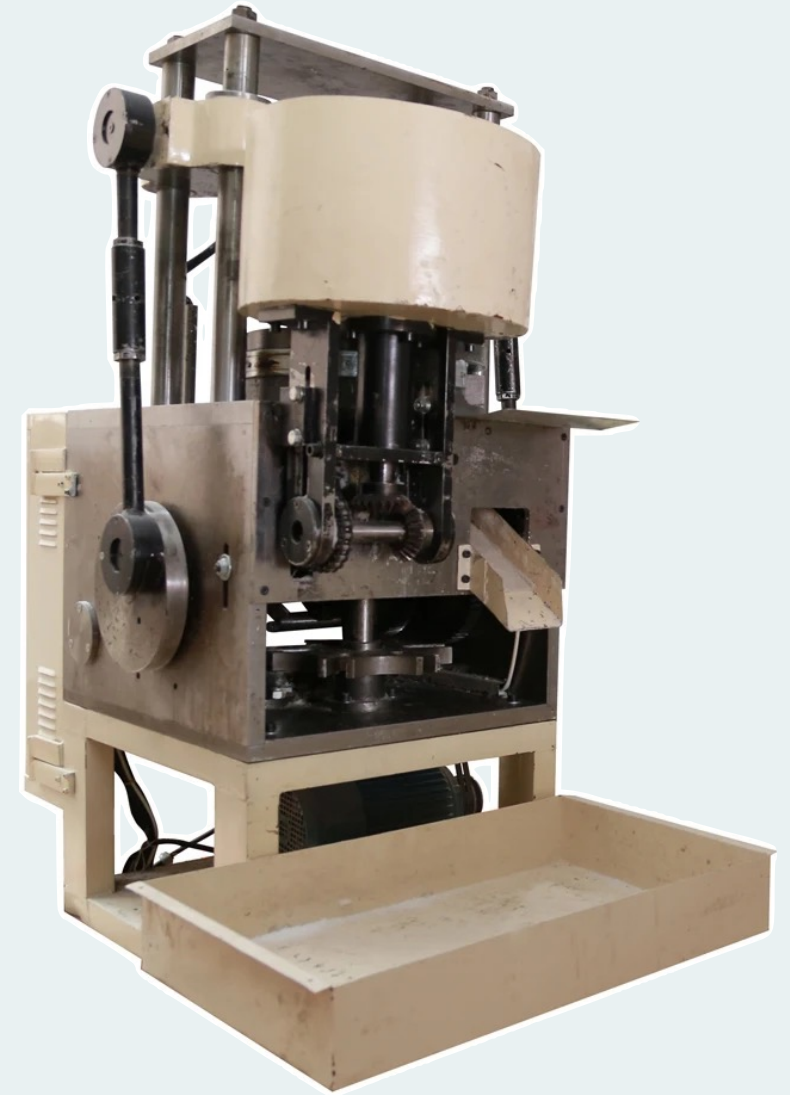

Hydraulic Multi-Purpose Candle Press Machine: Small

Our Production Facility is installed with multi-purpose candle pressing machine, which will help us make everyday candles with higher productivity. The machine uses wax powder for producing candles.

Benefits : High Productivity

Production Capacity: 5,000 - 8,000 pcs / hour

Hydraulic Multi-Purpose Candle Press Machine: Big

Our Production Facility is installed with multi-purpose candle pressing machine, which will help us make everyday candles with higher productivity. The machine uses wax powder for producing candles.

Benefits : High Productivity

Production Capacity: Tealight: 25,000 - 30,000 pcs / hour

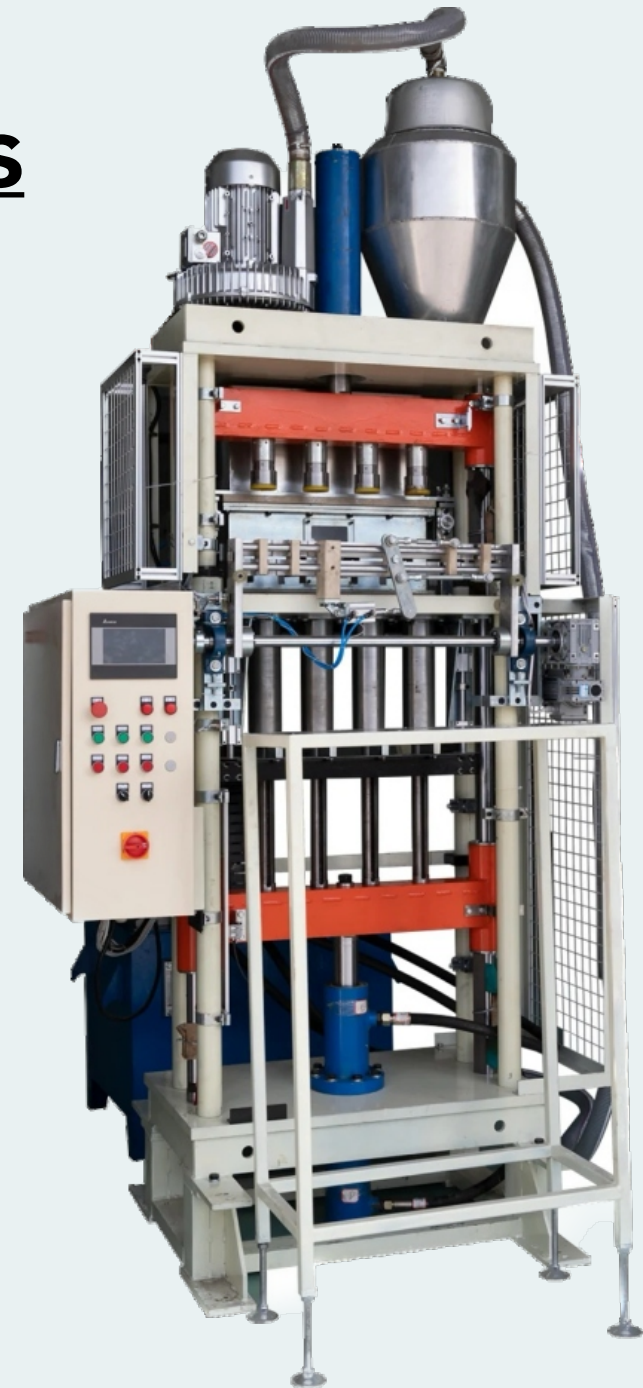

Hydraulic Pillar Candle Press Machine: Multiple Size

Our Production Facility is installed with pillar candle pressing machine, which will help us make pillar candles with higher productivity. The machine uses wax powder for producing candles.

Benefits : High Productivity

Production Capacity: 800 - 1200 pcs / hour

Manufacturing Capabilities
