Water Felting

Water felting is the process of making **rectangular fabrics** from multiple wool layers. To create a rigid, felted product, the wool fibers are continuously rubbed together with mild soap and warm water. This method generates **friction** and creates a **sensory experience** and enables the wool to be worked and molded in various ways to create unique felt crafts. Some of our best selling felt products made from this technique are Felt Laundry Dryer Ball, Felt Cat Cave Beds & Felt Balls.

SENSORY EXPERIENCE

Felt Stitching

The **whipstitch** and **blanket stitch** are the most frequently employed in our felt appliqué. The main purpose of these stitches is to join two pieces of felt fabric together. Our manufactured felt products can now feature **intricate detailing** thanks to this technique, creating stunning works of art.

Felt Christmas Decor, Felt Garland, Felt Toys, Felt Baby Crib Hanging, Felt Ball Coaster, Felt Trivet, Felt Dog Basket, Felt Ball Rug, Felt Wreath, Felt Flower are our most demanded felt stitching products.

BLANKET STITCH

INTRICATE DETAILING

Needle Felting

This method involves a small amount of sheep wool rolled up and punctured with a **specialized felting needle**. The felting needle pulls the wool into itself when it stabs the fiber using a **puncturing technique**. The end product is a **hard circular shape** that our talented artisans may transform into one-of-a-kind, fashionable felt crafts.

Felt Doll, Felt Decorative Ball, Felt Cat Toys, Felt Dog Toys, Felt Embroidery Felt Bakery, Felt Sculpture and other cute felt items are special kind of felt products made using needle felting technique.
