

**PROFESSIONALS IN FOOD AND
BEVERAGE INDUSTRY SINCE 1982**

The company combines two big professional experiences: technical planning and commercial one. The policy, which has allowed R.G.V. to become a successful company, has been the production of slicers for professional field and then the changing of them for a household use too, without taking off the main features. Our head office is in Cermenate (Como) and has today a surface of 9.000 covered square meters. The slicers are completely manufactured in our company, starting from the engineering up to the assembling. The company engages currently a staff of 40 employees including technicians, accountants and sales operators.
