Digital thermometer EN 13485 for fridge and freezer

It allows you to precisely control the state of conservation of your goods and to protect your perishable goods. Attach the thermometer housing to the wall of your fridge or freezer and secure the probe inside the unit using the included suction cup. Program your alert temperature.

You will be able to see the temperature inside the unit, without opening the door.

For use in a wide variety:

storage, transport, hotels and restaurants, food industry and HACCP, laboratory and industrial process.
