Reviving Your Interiors

Color ePaper Digital Art Poster

by PocketBook

InkPoster

Paper-like and glare-free

Up to one year battery life without charging

No blue light or heat emission

Change picture at any time and easily via app

Various formats - flexible use (horizontal/vertical)

No cable: Independent of any power source

GERMAN DESIGN AWARD WINNER 2026

Why choose InkPoster ™?

Do you like high-quality art displays in your rooms?

Do you adapt the displays according to the season or event?

Do you want to display art in your interiors but can't decide on what to choose?

InkPoster™ combines art and technology in a new way. Inspired by Italian design and Swiss vintage posters, the digital poster with color e-paper brings art into the living room - easy on the eyes, sustainable and customizable.

It was developed by a creative team at PocketBook. After years of research, the vision was realized in 2024 in collaboration with E Ink and Sharp: an e-paper frame that captures the color, texture and soul of classic works - as a window into a modern, digital art world.

THE PORTFOLIO

InkPoster

Affresco 31,5”

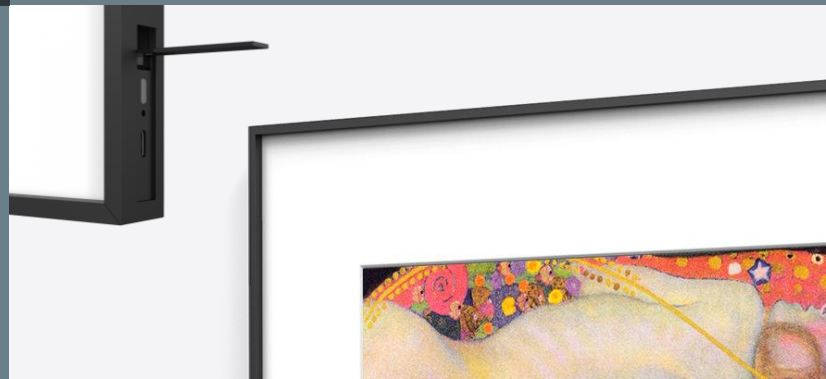

Dimensions	59,9 x 93,47 x 2,45 cm
Weight	6,7 kg
Display technology	E Ink Spectra™ 6
Display size	31,5"
Display resolution	2.560 x 1.440 (color and B&W)
Color depth	Full color display, gamut volume of 60,000
Aspect Ratio	16:9
USB	USB-C
Connecticity	Wi-Fi (2.4 / 5GHz) | Bluetooth
LED indication	Yes
Battery type	Lithium-Ionen-Polymer
Batterie Capacity	25.000 mAh
Frame color / material	Black / Aluminium
Passe-partout color	White

Paperlike digital art.
Glare-free ePaper color screen.

Wireless and energy efficient.
Up to 1 year on a single battery charge.

Safe for your home environment.
No Blue Light or heat emissions.

The 31.5-inch InkPoster ™ features an E Ink Spectra™ 6 display with unparalleled clarity and color depth, providing a sustainable and innovative way to enjoy digital art. Perfect for expansive interiors, its grand size transforms spaces with immersive visuals, ideal for galleries, luxury homes, and high-end commercial environments.

InkPoster

Affresco 13,3”

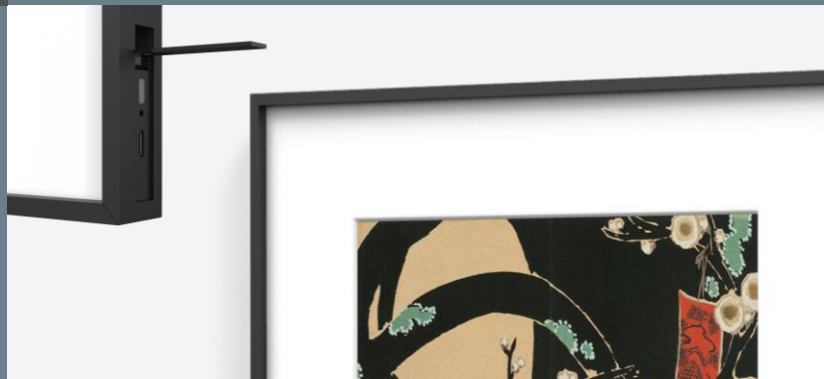

Dimensions	34,25 x 41,86 x 2,45 cm
Weight	2,1 kg
Display technology	E Ink Spectra™ 6
Display size	13,3"
Display resolution	1.200 x 1.600 (color and B&W)
Color depth	Full color display, gamut volume of 60,000
Aspect Ratio	3:4
USB	USB-C
Connecticity	Wi-Fi (2.4 / 5GHz) | Bluetooth
LED indication	Yes
Battery type	Lithium-Ionen-Polymer
Batterie Capacity	10.000 mAh
Frame color / material	Black / Aluminium
Passe-partout color	White

Paperlike digital art.
Glare-free ePaper color screen.

Wireless and energy efficient.
Up to 1 year on a single battery charge.

Safe for your home environment.
No Blue Light or heat emissions.

InkPoster™ reimagines compact digital art with its state-of-the-art technology and mindful design. The 13.3-inch model, powered by E Ink Spectra™ 6, offers a delicate balance of elegance and versatility, perfect for small spaces or as part of an art wall.

Tela 28,5”

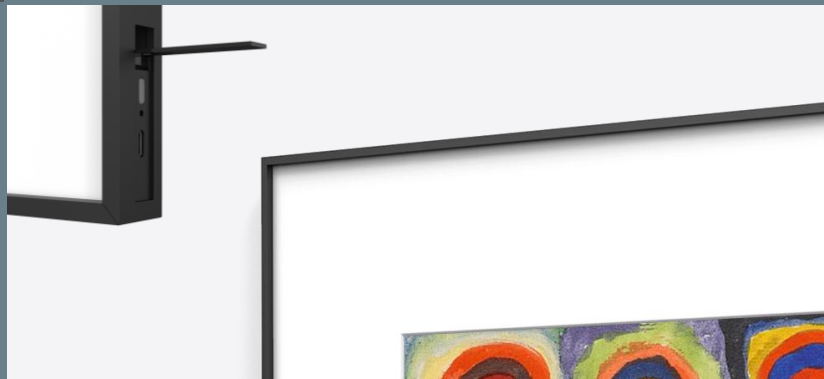

Dimensions	70,92 x 88,37 x 2,45 cm

InkPoster

FAQ

What is the difference to digital frames?

InkPoster™ - Based on ePaper technology

Paper-like and glare-free
A digital display designed to bring refined elegance to any space, free from harsh reflections.

Battery-powered and energy-efficient
Powered by a single charge lasting up to a year, drawing energy only when the artwork is changed.

Health-conscious for any room
With no Blue Light or heat emissions, it offers a safe and comfortable viewing experience.

Other Digital Frames with LCD/OLED/QLED screens

Constant power requirement
Must remain plugged in, limiting flexible placement and cluttering decor with cords.

Backlit and disruptive
Bright backlighting can distract from the ambiance, especially in low-light settings

Emits Blue Light and heat
Generates eyestrain and heat, impacting comfort and room environment

InkPoster

Is the InkPoster™ visible or distracting at night?

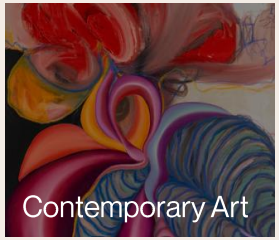

- No blue light or heat emission
- Completely silent
- You can stay close by without worrying and sleep peacefully

InkPoster

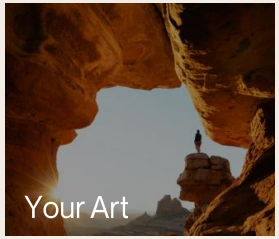

Where can users get content for the InkPoster™?

InkPoster™ offers access to thousands of curated artworks via the InkPoster app. You can also upload and display your own photos or images.

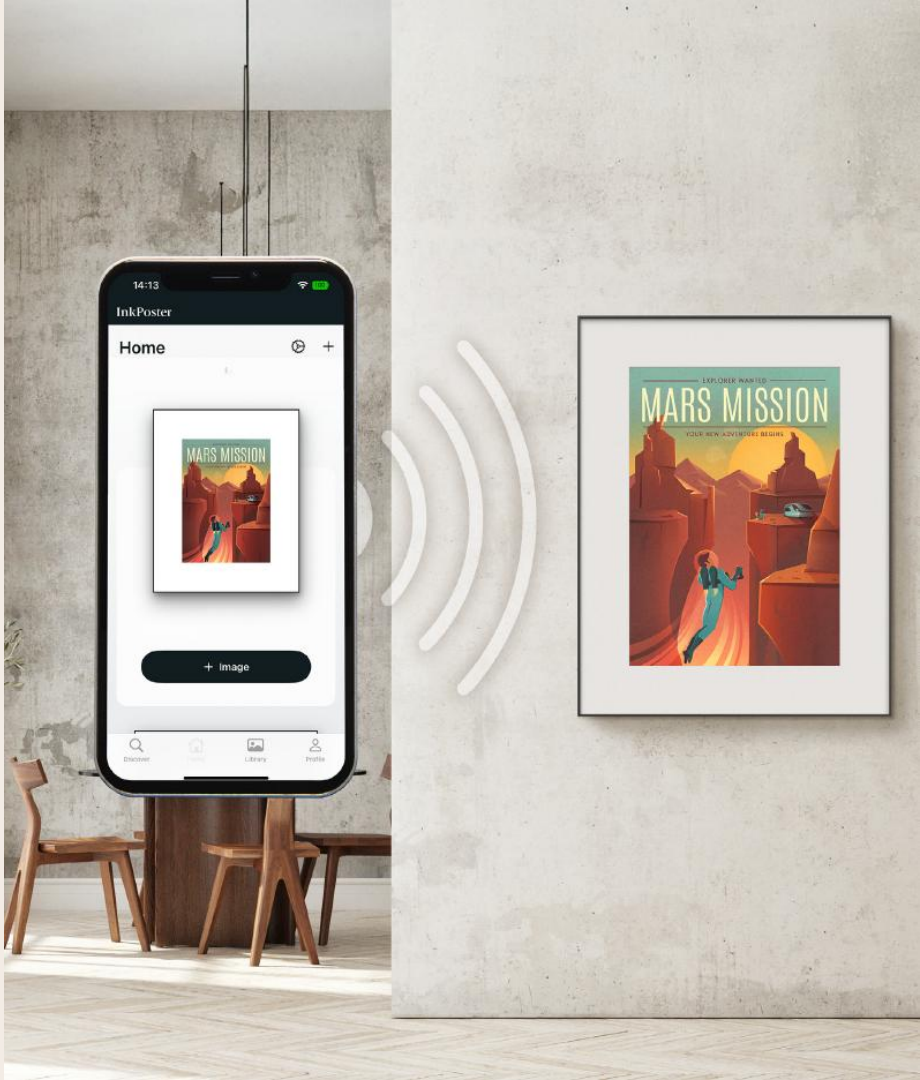

The InkPoster app can be downloaded from the App Store or Google Play:

App Store

Google Play

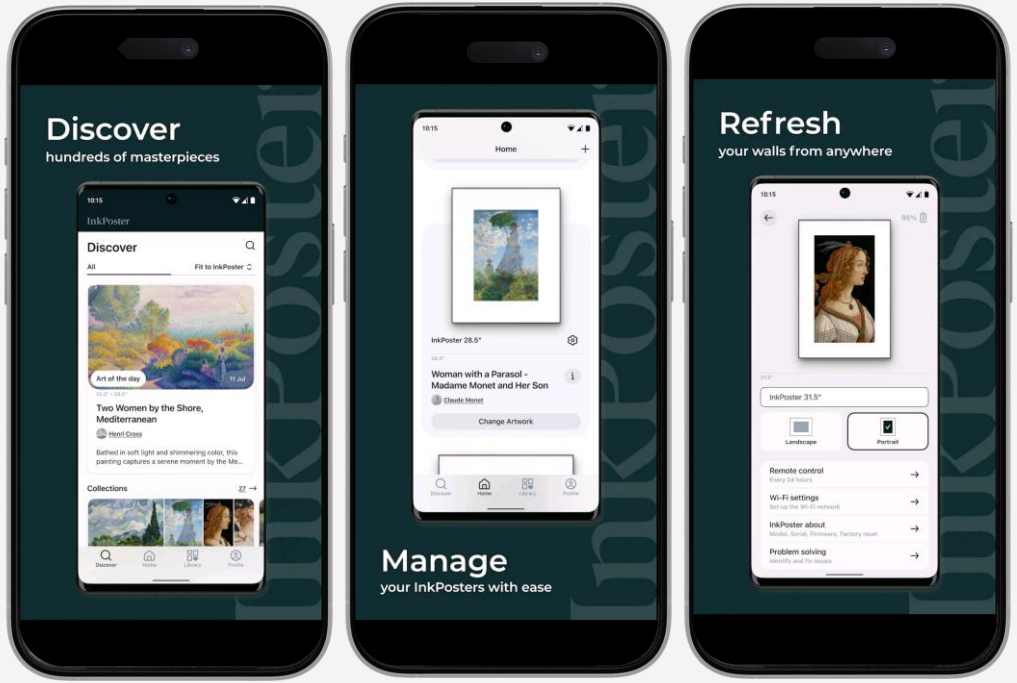

InkPoster

Why do I need the InkPoster app?

The InkPoster app is essential for all users.
The reasons for this are as follows:

- Setup: App is required for Wi-Fi connection and account linking.
- Manage content: upload and edit images.
- Control: Manage multiple InkPosters™, alignment, and settings centrally.
- Updates: App performs firmware updates.
- Without the app, no new images or changes are possible – it is the central control system.

InkPoster

How is the power supply to the InkPoster™ managed?

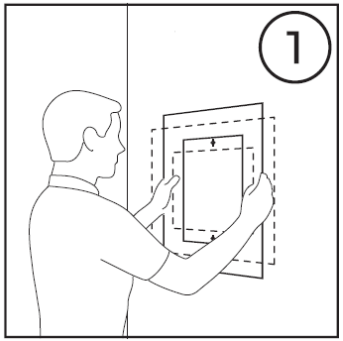

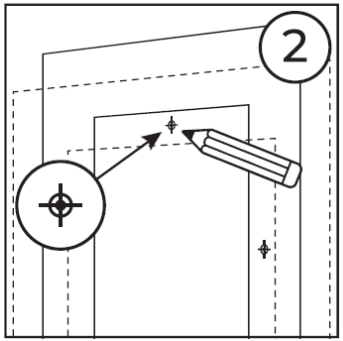

- It is wireless and battery-powered. The battery lasts up to a year without charging.
- A charger is included, and the charge level of the InkPoster™ can be viewed in the app at any time.
- Long-lasting operation is possible because E Ink technology requires only a few charging cycles.
- The battery can be serviced or replaced by certified service partners if necessary.
- Even when the battery is empty, the last selected subject remains visible – never an empty screen.

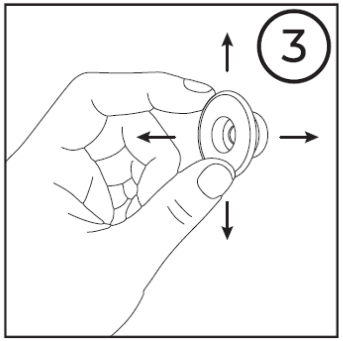

InkPoster

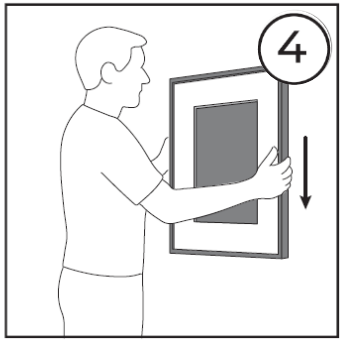

How is the InkPoster™ attached to the wall?

The appropriate wall mount is included, along with detailed installation instructions.

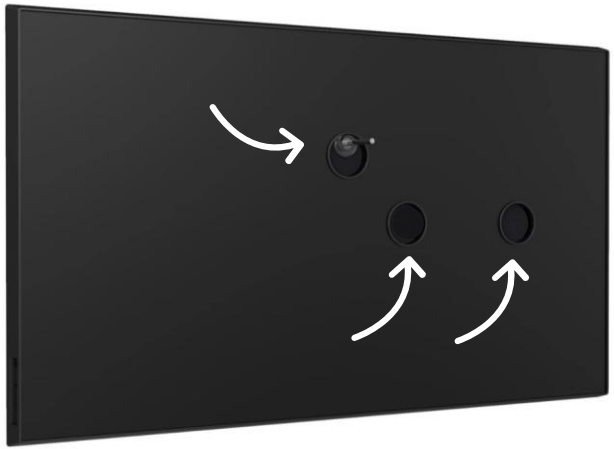

The InkPoster™ is installed precisely and balanced thanks to the well-designed wall mount.

Installation is effortless and the poster hangs perfectly straight.

You can also easily switch between vertical and horizontal placements at any time.

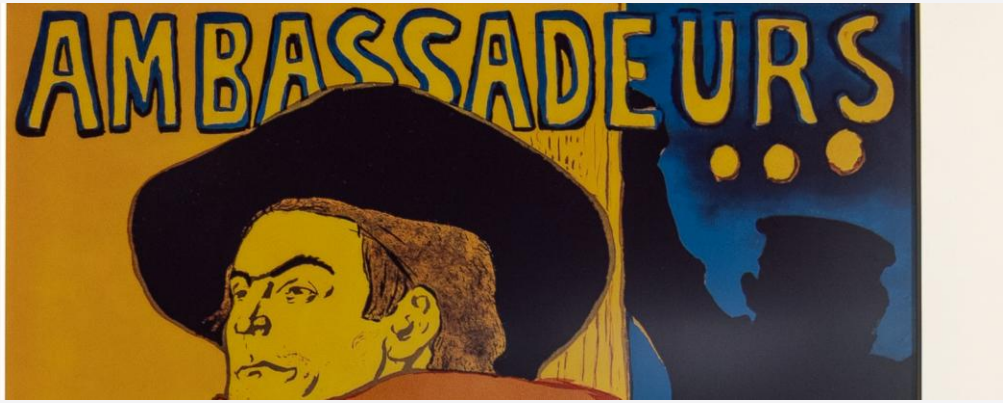

InkPoster

What exactly is E Ink technology?

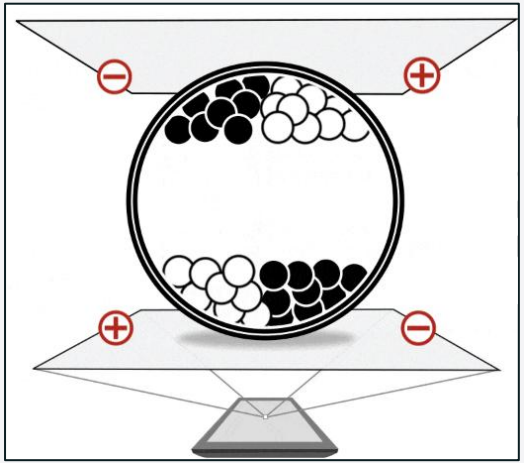

E Ink is the developer of the electronic ink used in e-paper displays. It uses pigments as in traditional printing and combines insights from chemistry, physics, and electronics.

At the heart of every InkPoster™ are millions of microcapsules filled with color pigments.

When an electric field is applied, these pigments rise to the surface and form vivid, lifelike images. This process is called “ink-printing.” You may notice it as a flicker while the selected graphic is loading on the screen.

The process can take 10 to 20 seconds.

InkPoster™ by PocketBook

The art of innovation
InkPoster™ is a digital art poster with an e-paper color screen, designed to display static artwork in full color and gallery quality.

What began as a passion developed into the idea of a digital art frame at PocketBook in Switzerland in 2013. The inspiration came from a collection of historical posters, which sparked a desire to make art accessible without limits.

With the breakthrough of color e-paper technology in 2018, the dream of a vibrant, customizable e-paper frame became a reality. In 2024, InkPoster™ became the world's first color e-paper poster, opening up new possibilities in interior design.
