# What We Do

生產流程

訂 OEM/Order >>> 製 Production >>> 組 Assembly >>> 運 Shipment >>> 客 After Service

Yeu Chyuan takes pride in its **prompt reply and flexible lead time**. All orders will be processed within 2 working days.

YC is also specialized in **custom products or OEM projects** thanks to its independent production capability.

Inspectors examine incoming raw materials. Only the **conformity** will enter the production process.

Plastic parts and blisters are made at YC by its own injection molding department and thermoforming department.

**100% component test** is carried out.

With quality semi-finished parts, tools will be assembled and face the final Hipot test. **Test standards** are based on **UL or CE requirements**.

Tools will be packed in accordance with the pre-production sample and client's requests and into sturdy shipping carton for best protection.

Our staff will then send complete products to the finished item warehouse for shipment.

Our sales will **report shipping schedule** to clients.

The ship date is a promise to clients and we **never delay** it without contents from clients.

All products from Yeu Chyuan are **warranted for 1 year**.

We provide **technical consultant** for clients upon requests.

For defects, we will take them back for examination and report the root cause.

# How We Do It

競爭優勢

龍

**Independent production**

產

**High Capacity**

動

**Flexible lead time**

研

**R&D**

98% of the process is completed in our own factory, so ship date and quality is assured.

98%製程於我司工廠完成，因此我們能掌握交期與品質。

安

**Safety approval**

We control the cost by purchasing raw material at large quantity and stocking them at the spacious warehouse.

大宗原物料採購與寬做零件倉庫有利成本控制。

專

**Design patent**

質

**100%tests**

準

**Punctual shipment**

庫

**Spacious warehouse**
