NEW Warm & Cool Primary 6 Color Watercolor Set

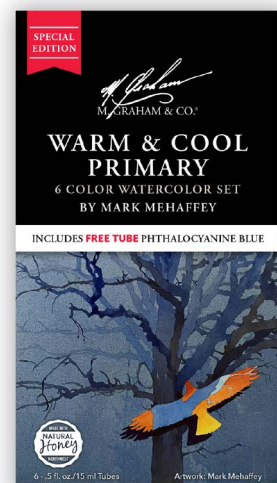

Includes **FREE TUBE** Phthalocyanine Blue

M. Graham watercolors are made with a time-honored binding medium of natural blackberry honey and pure gum arabic, which gives them extraordinary strength that is easily diluted for smooth, controlled washes and richer color. Honey absorbs the moisture from the air preventing hardening on the palette or in the tube.

Internationally recognized artist Mark Mehaffey selected the colors featured in this set. "I use a warm & cool primary palette for most of my work. It affords me control of my secondary mixtures both in terms of value and intensity. I love the pigment load of my M. Graham watercolors, they literally explode on the paper!"

Set Contents:

- Hansa Yellow (cool) .5 fl oz/35ml
