InEar hearmix® PRO in-ear microphone cable
HM13-5-IE (2-pin 0,78mm Box, L=140cm)

*Other **microphone-in-ear** cables available on request.

The **hearmix® PRO** is an active ambience sound system.

A special cable with built-in microphones allows the infinitely variable control of the outside sound by the musician himself on the body (no extra technicians, mixing console, additional microphones needed).

The audience and ambient sounds become audible without having to physically remove the earphone from the ear.

Due to its standard 2-pin connector, it can be used with almost all earpieces.

With its full metal housing, the hearmix® PRO is very robust and therefore a perfect tour companion.

Accessories

► InEar hearmix® PRO receiver cable black (3,5mm stereo angle plug, L=25cm)

► InEar hearmix® PRO receiver HM4-IE (without battery | 1x AAA)
