

TRUST MATTERS

Your customers know they can count on you. At NSF International, we're committed to water safety and public health, and we can help you maintain that trust.

Look to NSF to help ensure the quality and safety of your products in the marketplace. Every day our industry experts deliver comprehensive services, quality support and superior knowledge to clients around the world.

Certify your products with NSF to save time and money, grow your business and give your customers another reason to choose your products. Count on us for:

Municipal Water Systems Testing and Certification

- > Addresses all aspects of public drinking water distribution, from water storage tanks and reservoirs to water meters and individual components.
- > Helps ensure your drinking water treatment chemicals meet regulatory requirements around the world.

Drinking Water Treatment Devices and Filtration Testing and Certification

- > Provides proof your products comply with the highest international standards.
- > Covers filtration media, equipment and chemicals.

Plumbing Products Certification

- > Helps ensure compliance with required performance standards and plumbing codes, including NSF/ANSI, ASME,ASSE, CSA, ASTM, IAPMO, CISPI, AWWA and PDI.
- > Covers plastic materials and finished products, plumbing fixtures and fittings, and joining and sealing materials.

Electrical Certification

- > Covers food equipment, municipal water products and systems, on-site wastewater products, and pool and spa equipment.
- > Provides the assurance of an OSHA Nationally Recognized Testing Laboratory (NRTL) and SCC-accredited Certification Body (CB).

Pool and Spa Certification

- > Helps your business obtain NSF/ANSI/CAN 50 certification of your chemicals to meet the product acceptance criteria in the Model Aquatic Health Code (MAHC) and many state and local pool codes.
- > Provides structural design assessments, energy efficiency testing services, as well as assistance with water quality maintenance, disinfection efficacy and more.

Onsite Wastewater Systems Testing

- > Assures public health officials of your product's safety performance.
- > Facilitates broad market access in the onsite wastewater treatment industry.

Regional Certification and Approvals

- > Helps manufacturers gain access to global markets.
- > Simplifies the process of meeting strict regulatory requirements across multiple countries or regions in your market.

Biosafety Cabinetry Certification

- > Covers the design, construction and performance of biosafety cabinets to NSF/ANSI 49 and provides biosafety cabinet field certifier accreditation.
- > Addresses health and safety concerns of working with potential pathogens and ensures a microbe-free environment.

Technical Advisory Services

- > NSF Health Sciences, LLC, provides training, risk assessments (including Legionella) and water management plan development for building owners and managers.
- > Assesses physical, chemical and microbial risks to reduce liability and help you comply with local and national requirements.

CUSTOMERS IN 180 COUNTRIES ACROSS ALL MAJOR INDUSTRIES TRUST NSF

STANDARDS

Develops standards to promote the quality of drinking water, food, indoor air, dietary supplements, consumer goods and environmental safety.

AUDITING

Conducts safety audits for the water, food and consumer goods industries.

TESTING

Analyzes products against internal and external standards.

CERTIFICATION

Certifies products according to relevant standards.

CONSULTING

Provides strategic and technical advice for the food and beverage, dietary supplement, pharmaceutical and medical device industries.

TRAINING
