

VISOFT VIPLAN

THE ONLINE PLANNER FOR TILES
AND SANITARY WARE

VISOFT

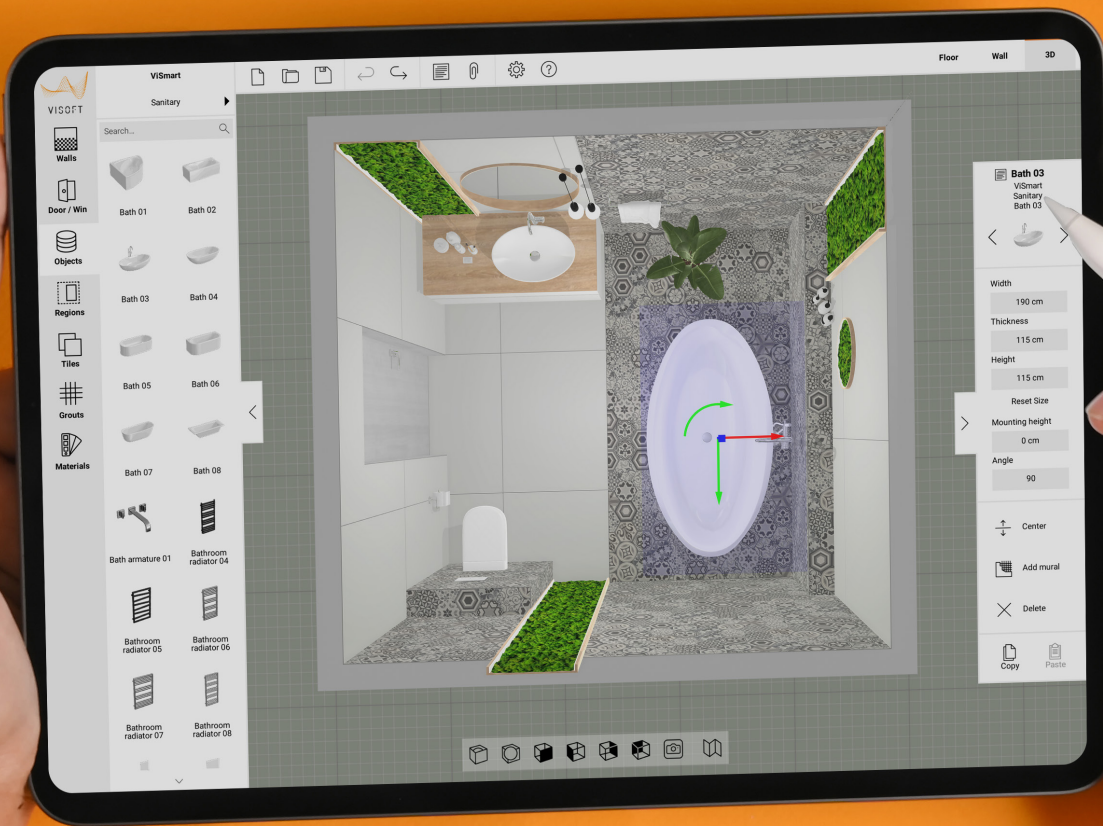

ViPlan
powered by ViSoft

VISOFT VIPLAN is a versatile planning instrument for website, POS and tablet application (iOS/Android).

It is directly available to the end customer, and it enables them to easily try out their own design ideas. It enables the sales consultant to easily advise the customer on the range of products available, either on site or in the showroom.

AREAS OF APPLICATION

- ✓ Online planner on your website
- ✓ Permanently installed touchpad solution for the showroom
- ✓ For use by the sales consultant on a tablet

ON THE SHOP FLOOR: EFFICIENT CUSTOMER CONSULTATION

With ViSoft ViPlan, your sales staff can react flexibly to every sales situation, irrespective of whether they want to simply show what the tiles selected in the showroom will look like when laid, or whether they want to show the complete interior design concept. The planning results provide your customers with clarity and confidence.

ONLINE: MAKE ROOM FOR IDEAS

ViSoft ViPlan allows two basic approaches. Either the customer's room is planned from scratch, or the customer consultation begins using existing room concepts that are adapted to the customer's wishes.

To work out all the details afterwards, you simply import the project into ViSoft Premium.

AS POS-TERMINAL: SIMPLY INSPIRE

Use a POS-terminal on your shop floor to offer your customers the option of doing their own planning in your showroom, either involving your sales team or not.

FOR WHOLESALERS: SUPPORT FOR TRADE CUSTOMERS

Offer your business customers the option of planning projects on your website and directly enquire an offer on the applied products.

THAT'S HOW EASY IT WORKS

ViSoft ViPlan offers a logical structure for the planning process. You begin with the walls, add the doors and windows next and finally put in the sanitary installations and tiles. All of the planning steps work quickly and intuitively, changes can be implemented in every stage.
