 infused with love

# bathroom with atmosphere

Interior design has the power to inspire you or leave you decidedly unimpressed. Besides the beautiful design, it has to deliver comfort and functionality. Cruise ship cabin can be a retreat after a busy day ashore. This also applies to the cabin's bathroom. It adds something special to the cruise experience for those who enjoy quiet and private time on their cruise vacation.

At Eumar, there's nothing we dislike more than bathrooms that lack a distinct personality or style. We firmly believe that cruise ship bathrooms represent long-term investments that should align with the cruise line brand image and the quality of the institution as a whole.

We help our customers all around the world to make it unique, bathrooms that add the stars to whole cabin and entire cruise adventure.

Eumar innovative approach to product design is implemented across our entire range. With a passion for detail and love of authentic materials, we create bathrooms to enrich lives now and tomorrow. This sets our products apart from every other product available on the market.

winner

Amelie collection has everything you wish from a vanity unit – designed for bathrooms with tiny and limited space in contemporary design and style. This will make your bathroom stand out and create positive emotions for visitors and guest at your home, hotel room, cafe or other establishment. The spout has been moved up to achieve an elegant and lightweight appearance to create a product that fits in with the modern architectural context. With thin proportions and pure composition of both round and square forms, Amelie offers flexibility when it comes to bathroom design choices. Hidden drain offering all the function without compromising the aesthetics. Practical ledge around the surface is not only useful to prevent water from spilling over, but it also prevents accidents of objects falling to the floor from the surface elegant and unique towel opening can be added to the sides of each model. A recessed center console visually separated from the wet area serves as a generous shelf surface, providing intelligent and safe storage space for toiletries or other necessities.

Possible also with glass cap or soap dispenser system semi-recessed integration to add more functionality. Amelie is a game changer. In addition to all mentioned functionality the recessed center console is also designed for a wall mount faucet installation even without wall preparation and therefore interacting in a whole new way. No need to match the faucet to the basin, it is included in the package.

Amelie - The future of cruise ship bathrooms is here.

Our Amelie collection is true Jewel of the Ships 🥰

Amelie is solution with a concealed tap fitting behind the dry shelf without touching your room walls. Amelie is probably only washbasin on the market, which allow back wall faucet installation on board of cruise ships without changing construction standard of the wet unit.
