eumarpro

smart luxury and innovation in cruise ship bathroom hospitality

cruising around the world's oceans requires a combination of outstanding engineering and interior design that is sophisticated, yet relaxed and comfortable.

cruise ship operators are constantly seeking creative & innovative design solutions to provide interior design support for their fleet. the implementation of contemporary bathroom design concepts to keep the fleet current with market trends can be daunting. choosing eumar, a company with experience and skill, transforms that process from one that is daunting to one that our clients enjoy.

maximizing the ROI

through innovative and bespoke solutions for five-star bathrooms which stand out and increase guest satisfaction and conversion rate of the property, we are helping cruise ship asset owners and operators optimize their profitability and increase roi of fleet portfolios.

we pride ourselves on facilitating the largest cruise ship companies worldwide, supporting their operations through enhancing a comfort and design in their customer bathrooms

eumarpro

extensive **expirience**

we have almost 30 years of experience in cruise ship new-build and refit projects that fulfil stringent demands for quality, cost-effectiveness and delivery reliability.

over the years, we have delivered tens of thousands of crew, pax and public area bathrooms across at least 80 different cruise ships worldwide. manufactured in tallinn, estonia and then delivered to shipbuilding construction and refurbishment sites all over europe, asia and america.

integral design to guarantee best aesthetical and ergonomical performance

eumar prides itself in its in-depth understanding of cruise ship bathroom requirements and industry regulations. this enables us to provide the correct sanitary ware products, ensuring clients benefit from product innovation, design, comfort, functionality and sustainability – the global issues and trends that eumar responds to throughout every project.

involving us in the early stages of a project empowers us to support our customers. we always are ready to come up with valuable ideas and recommendations that increase product functionality, improve customer experience, add modern design flair and reduce cleaning and maintenance costs.

we have extensive experience in cruise ship bathroom fit-outs, and we love to add functional style to our customers' bathrooms! we not only produce and supply a high-end product, but help our customers add value. our knowledge and experience is applied from the design states onwards, which allows a seamless and high-quality project outcome.

we supply lightweight composite stone washbasins,
vanity furniture, led mirrors and shower enclosures, while
utilizing a fully-integrated design approach that
minimizes risk and maximizes value.

eumarpro

eumar's innovative approach to product design is implemented across our entire range. this sets our products apart from every other product available on the market.

eumarpro

our mission is to assist in creating the most beautiful and functional bathroom environments of the highest quality and for the best value.

eumarpro

our core dna stands for speed of new product development, perfection in engineering and our encompassing passion for innovation in product functionality and design.

eumarpro

our made-to-measure technology allows us to consider every space individually, and yet new shapes can be developed in mere weeks.

eumar bring unique **lightweight composite stone** products to marine and offshore industry bathrooms.

our invented exclusive formula for a gelceramic lightweight® composite stone material allows us to reduce product weight by up to 50%. within 10-15 years of cruise ship operation it significantly impacts cost savings and a reduced environmental impact, and therefore ensures obtaining the highest roi for cruise ship owners.

“ we believe cruising is about entertainment, discovery and creating memories of a dream vocation. we help cruise companies around the world arrange unforgettable cruise passenger experiences in their cabin bathrooms.
