Ghidini
DAL 1951

Dal 1951

Ghidini Faustino Bosco S.P.A. è stata fondata nel 1951 dall'omonima famiglia a Lumezzane, cittadina del nord Italia. Dal 1997 il sito produttivo è stato ampliato e trasferito a Rodengo Saiano (Bs): polo strategico per la produzione e la logistica. Sin dai primi anni l'azienda si afferma nel mercato italiano e globale di sifoni e materiali idraulici in ottone e plastica prediligendo catene di fornitura italiane e facendosi convinta garante del prodotto Made in Italy. Le competenze produttive consolidate negli anni, la professionalità e la continua innovazione soddisfano le necessità dei professionisti sempre sensibili all'evoluzione del mercato. Ghidini adotta una visione customer-oriented per rispondere in modo efficiente ed efficace a una domanda sempre più esigente. I prodotti rispettano le normative europee e sono il perfetto compromesso tra funzionalità e design, qualità e sicurezza. Il sistema di gestione della qualità è certificato ISO 9001: 2015. Nel 2012 la proprietà, attenta alla sostenibilità ambientale, ha iniziato un percorso di riqualificazione energetica. Sullo stabilimento sono stati installati oltre 4000 pannelli fotovoltaici che, con una potenza di 998 Kw, permettono di generare energia pulita più che sufficiente per il fabbisogno aziendale.

Since 1951

Ghidini Faustino Bosco S.P.A. was founded in 1951 by the homonymous family in Lumezzane, a small town in the North of Italy. In 1997 the production site was expanded and relocated to Rodengo Saiano (Bs): a strategic hub for logistics and production. Since the beginning, the company has established itself in the Italian and global markets of brass and plastic siphons and hydraulic materials. Moreover, the firm has geared its supply chain towards Italian suppliers to leverage the strong appeal of the Made In Italy label. Production skills refined over the years, combined with expertise and continuous innovation, provide the necessary know-how to meet the needs of specialists who closely follow market trends. Ghidini embraces a customer-oriented approach to efficiently and effectively satisfy increasingly demanding market needs. Products fulfil European requirements and represent the perfect balance between functionality and design, quality and safety. The quality management system is certified ISO 9001: 2015. In 2012, the firm developed an action plan to promote its environmental sustainability and transition to renewable energy. With more than 4000 solar panels installed above the plant, and a capacity of 998 Kw, the company now produces more than enough energy to run all its operations.

Informazioni utili sugli imballi dei prodotti

I prodotti di plastica vengono confezionati singolarmente in sacchetti di plastica. Fanno eccezione gli art. 150 e 155 che vengono confezionati singolarmente in una scatola personalizzata. I prodotti di ottone sono confezionati in scatole singole da uno o più pezzi a seconda dell'articolo, tutte le confezioni sia singole, che i cartoni, sono dotate di una etichetta identificativa del prodotto con indicato: - codice articolo, descrizione, misura, disegno, quantità, codice a barre EAN 13.

Useful information on products packaging

Plastic products are packed singularly in plastic bags. Except art. 150 and 155 which are packed singularly in a personalized box. Brass products are packed in single boxes of 1 or more pieces depending on article. All the packing or single packaging, have a product identification label with: article code, description, measurement, drawing, quantity, bar code EAN 13.
