SENLIA SHOWER COLLECTION

ABOUT US

Founded in 2002 , **Senlia specializes in shower doors** for more than 10 years and is fast developed as one of the leading manufactures in shower door industry . Our factory is located in Zhongshan ,Guangdong province, the central production base of high-end quality level sanitary ware industry, with a owned land at more than 30000 square meters for domestic and international production lines.

Since establishment , Senlia has always dedicated itself to focusing on shower doors. Externally , We provides our customers a one-stop services on OEM/ODM projects by well connecting Senlia with our suppliers and customers in good communication, execution . Internally, our professional and experienced team strictly controls the whole chain from innovation, industrial design, production, quality to final shipping products and services.

Our effort to integrate the diverse aspects of product manufacturing such as our French & Chinese combined R&D,professional marketing, full-experienced production, the large fully equipped testing lab like CUPC and CE lab with strict quality system based on Senlia's ERP system allows us to always respect the standards and meet the requirements of our customers , and deliver the high quality products in the shortest time to market.

WHY CHOOSE **SENLIA** ?

Senlia has a good reputation both in domestic and foreign market. With more than 10 years of excellence in shower door designing and manufacturing, we are always focusing ourselves on innovative ideas and high durable products.

Senlia is and will always be your solid partner, we are here to offer you our professional solutions and services.

Senlia

PRODUCTION PROCESSES

Strictly adopted to "6S" management

ERP system management

High quality products come from strict production processes. Senlia owns a land of 22,000 square meters, the production lines are strictly separated into domestic and overseas lines to meet for the different market requirements. We adopt ISO9001 quality management system and "6S" management. And all aluminum profiles , glass, hardware and components are full inspected during the production process and protected in the well-design and safe packages. What is more, the ERP system allows us to make accurate production processes control which also means a guarantee for the right products and accurate delivery time to our final customers.

QUALITY CONTROL

A Senlia shower door must pass many tests in our full-equipped of CE /CUPC standard testing lab, for example raw material ASS test , the chrome and power thickness test, life circle test, water test, salt spray test, tempering test, impact test, safe package test and so on before they really put into mass production, and there is also an assembly test in the production when one item in its mass production. Quality is a responsibility and a promise from Senlia to our customers.

And our strong QC team from IQC,PQC,FQC,OQC strictly controls each step from raw materials to finished products.

CE CUPC Full equipped testing lab

RAW

MATERIALS
