## RANGE 2022

### PRODUCT FEATURES

Lighting can completely transform your bathroom beyond the practical benefits.

It creates ambience, a brighter, more spacious and multi-dimensional feel and highlights design features.

Considering a lighting scheme at the initial design stages will influence the overall atmosphere of the bathroom space.

## LED Lighting

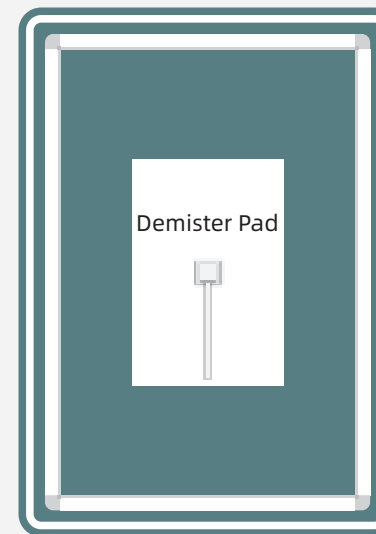

Correlated Colour Temperature (CCT) is a concept that provides seamless transition through the full spectrum of temperatures ranging from warm, through to natural and then to cool white light. This allows you to mimic outside lighting conditions with precision - a feature that has been scientifically proven to have a positive impact on our health.

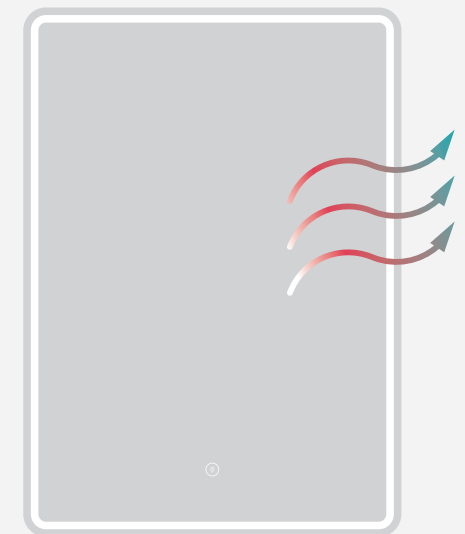

## Demister

Integrated demister pads are an ultra-thin layer, mounted on the back of the mirror glass. When activated, they gently warm the adjacent portion of the mirror to eliminate condensation formation and clear the glass.

- Removes the need for wiping down
- Less condensation and damp
- Efficient lifestyle routine for people on the go
- clear for shaving and getting ready
- Mirror stays looking good with less watermarks

FRONT VIEW

## Digital Clock

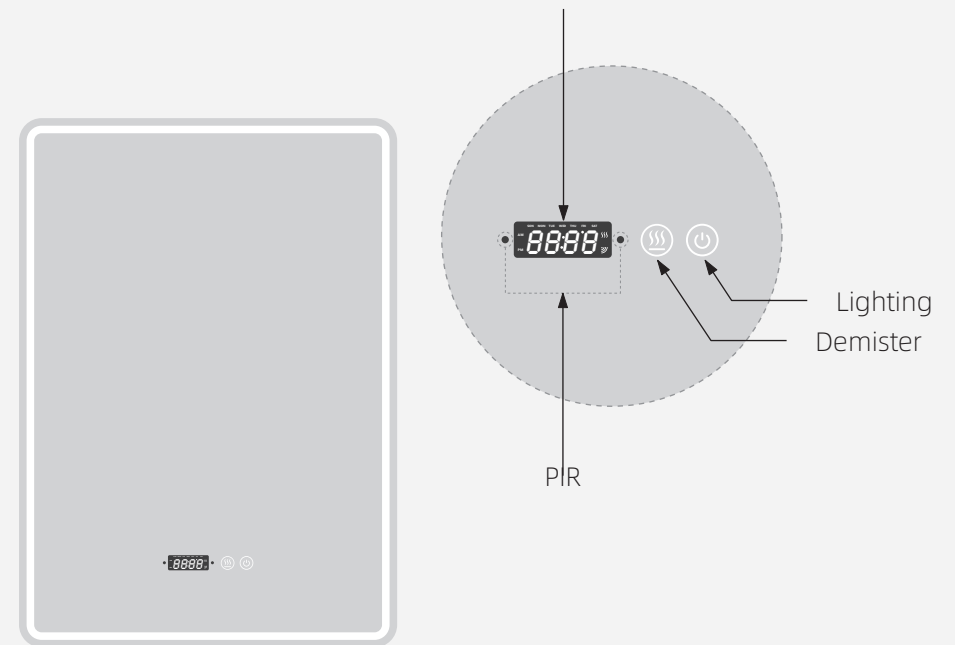

We usually lose our perception of time while in the bathroom, either it;because we relax too much or spend time cleaning the mirror from fog, this can make us late for important meetings and dates. By including an accurate, programable digital clock display on your favorite led mirrors, you'll never be late again and you won't be needing to spend time cleaning your mirrors over and over again.

## Digital Screen

Enhanced display that not only shows the time, but also displays the date and temperature in the room, the most useful information needed for your every day routine.

Digital Screen ( Date & Time/Temperature )

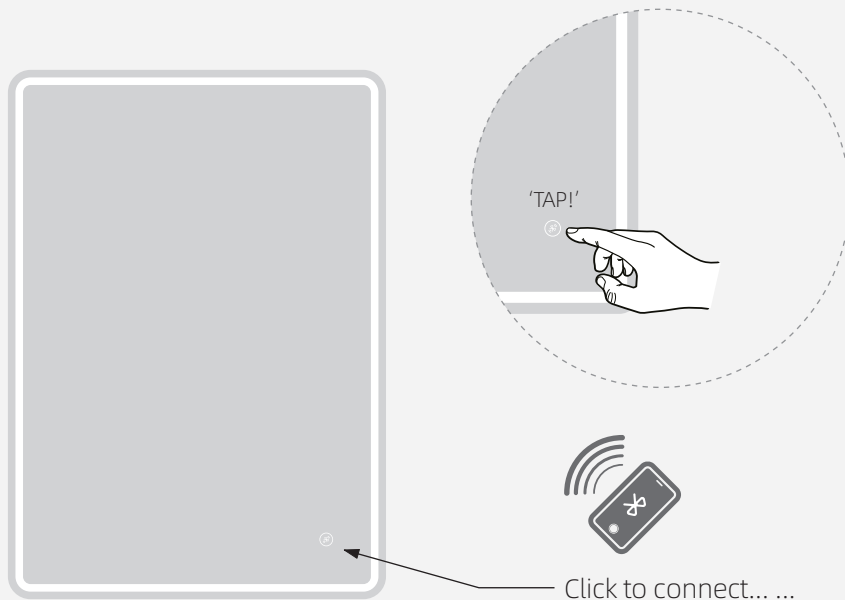

## Bluetooth

Your favorite tunes, podcast and audiobooks at the tap of your finger!  
With our in-built bluetooth mirrors you can give life back to your bathroom!  
Powered by a high range, specifically designer for bathroom use bluetooth sensor, you can have a seamless experience when connecting the mirror, playing your favorite music or even receiving calls.

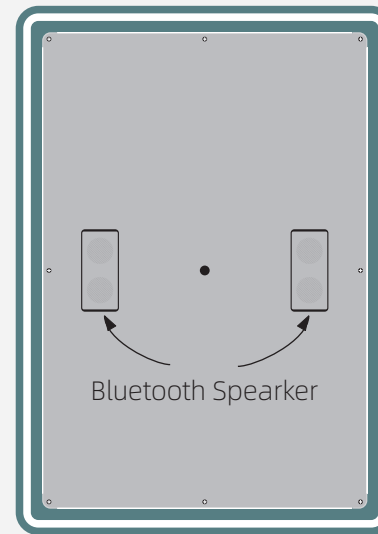

Bluetooth range is up to 5 meters distance,  
recommended for bathroom use only.

## Bluetooth Speaker

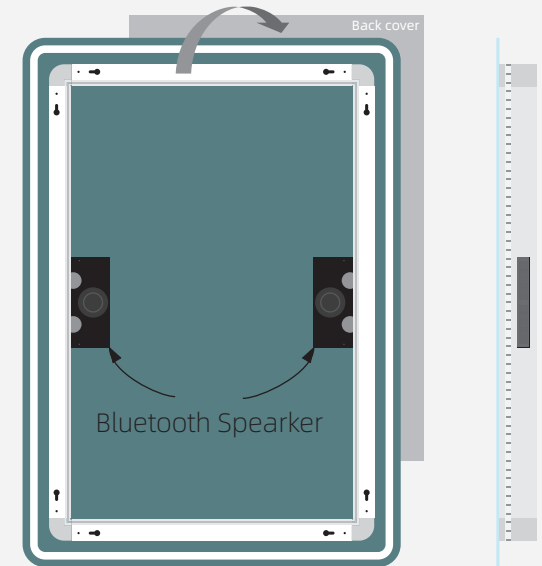

Yoway Bluetooth Mirrors come with high fidelity stereo speakers, producing robust bass and accurate sounds at higher levels, we also enhanced the sound experience by offering two different speakers positions depending on your needs, rear speakers and side speakers for a more direct sound.

Type1:Rear speaker

BACK VIEW

Type2: Side speaker

## Music screen

Control every aspect and function of your mirror directly on the surface, our Digital Screen options bring custom functions and display essential information, such as:

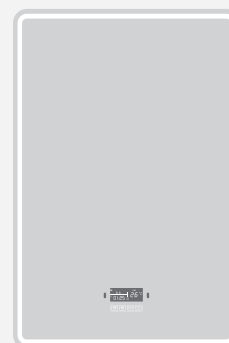

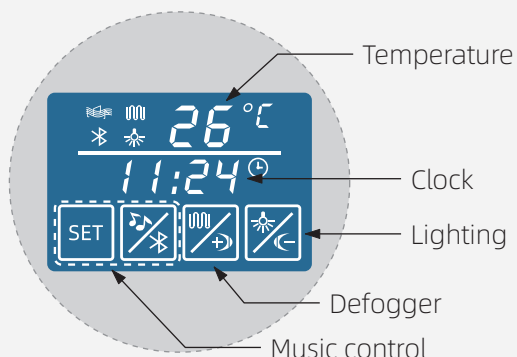

- Turn on/off Demister and Lights
- Temperature indicator built-in
- Skip songs, control speakers volume.
- Digital Clock in-built
- Bluetooth connectivity switch built-in
- Weather forecast and much more!

Six-button Bluetooth screen

Six-button sensor screen

## UV Disinfection

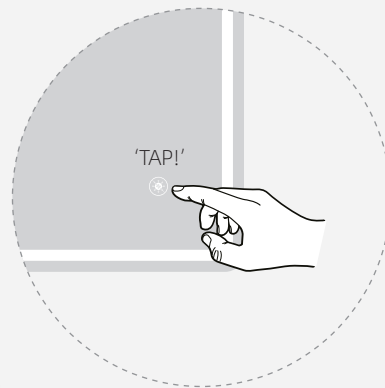

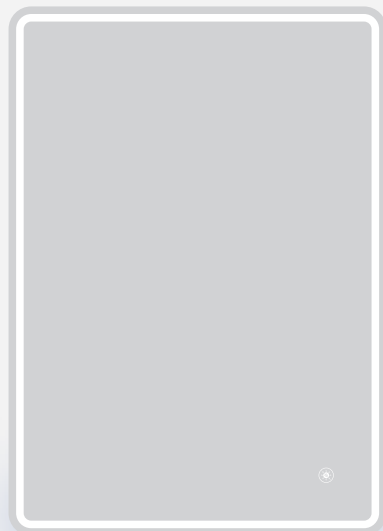

UV Led Mirror Series come with in-built UV Light to sterilize all vanity and basin area.

Keep your environment free of virus, bacterias and germs.

Additional sensors incorporated for a touchless experience.

Ideal for: Hotels, Public Bathrooms, Restaurants, Bars, guest rooms, etc.

The UV disinfection lamp life of more than 5500 hours of work

— Ultraviolet disinfection under the mirror

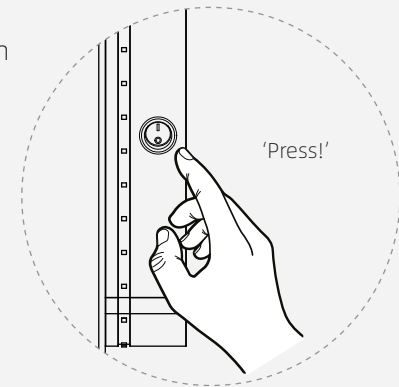

## Rocker switch

Rocker switch to control additional features, strong, durable and reliable switch.

SIDE VIEW

Rocker switch

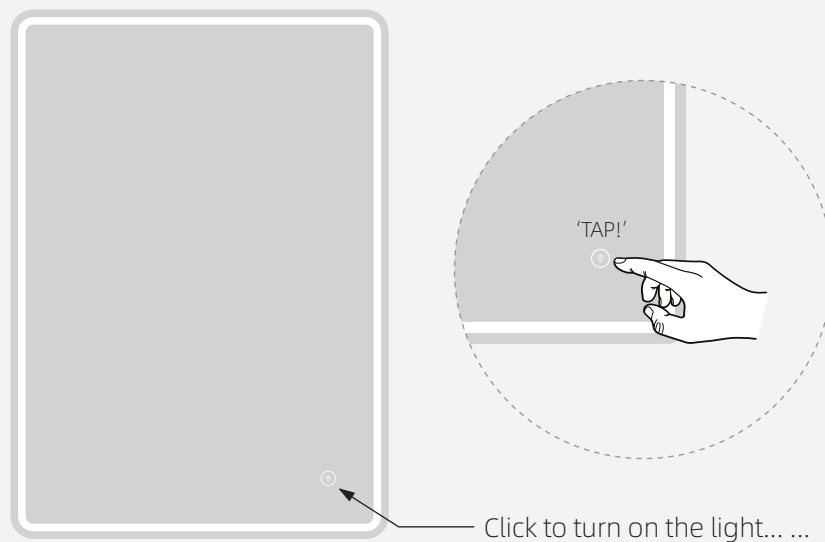

## Touch Sensors

Touch sensors are incorporated seamlessly into the glass surface and illuminate when active. Advanced lighting features may be controlled either by additional sensors or simply via one multi-touch sensor.

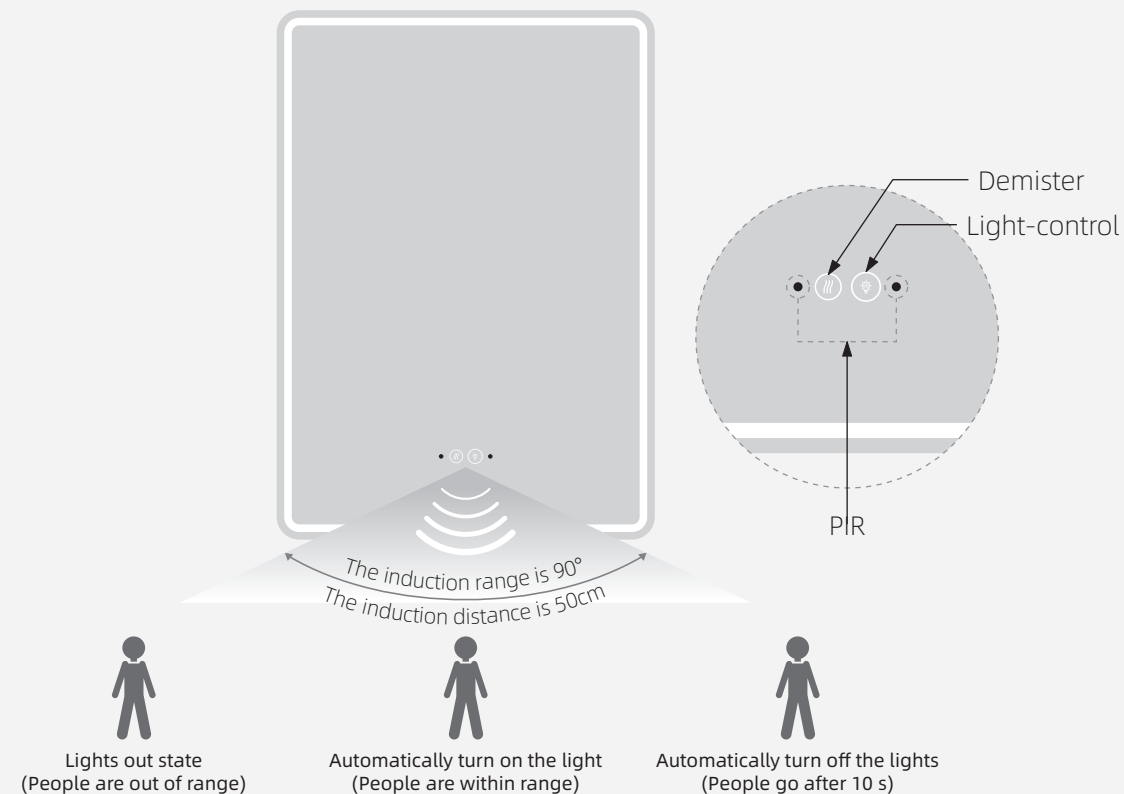

- Seamless design
- Minimal contact
- Simple control
- Multi-functional

## PIR Sensor

Activate the mirror by just walking into the room!

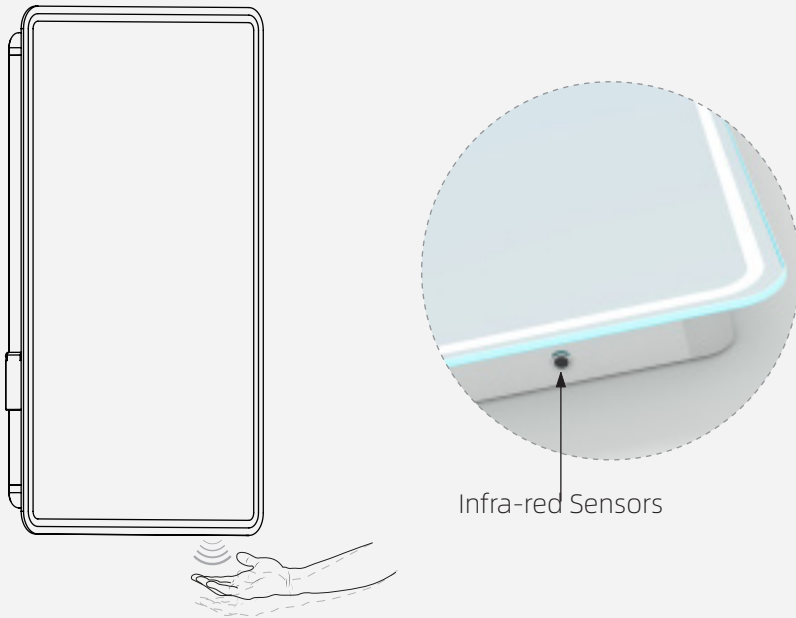

Part of our automated bathroom solutions, our PIR sensor knows exactly when you need the lights to turn on and it activates the mirror automatically by gently lighting up the room, this comes specially useful at night when it's harder to find the switches and easier to get dazzled.

## Infra-red Sensors

Infra-red sensors are simply activated by a swipe of the hand. Advanced features, such as dimming and colour control, where available are operated by hovering the hand near the sensor.

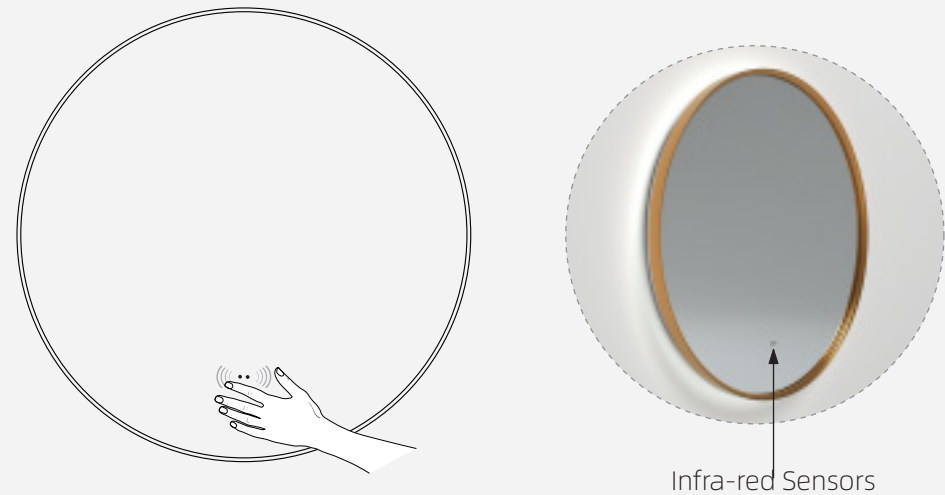

Simply swipe hand below the infra-red sensor  
80° induction range, 50mm induction distance

## Infra-red Sensors

- Naturally increased hygiene in your daily routine through minimal contact and contamination
- Safety near wet zones with no electrical contact risk
- Discreet control allowing seamless appearance in design
- Less cleaning and maintenance - no fingerprints or smears

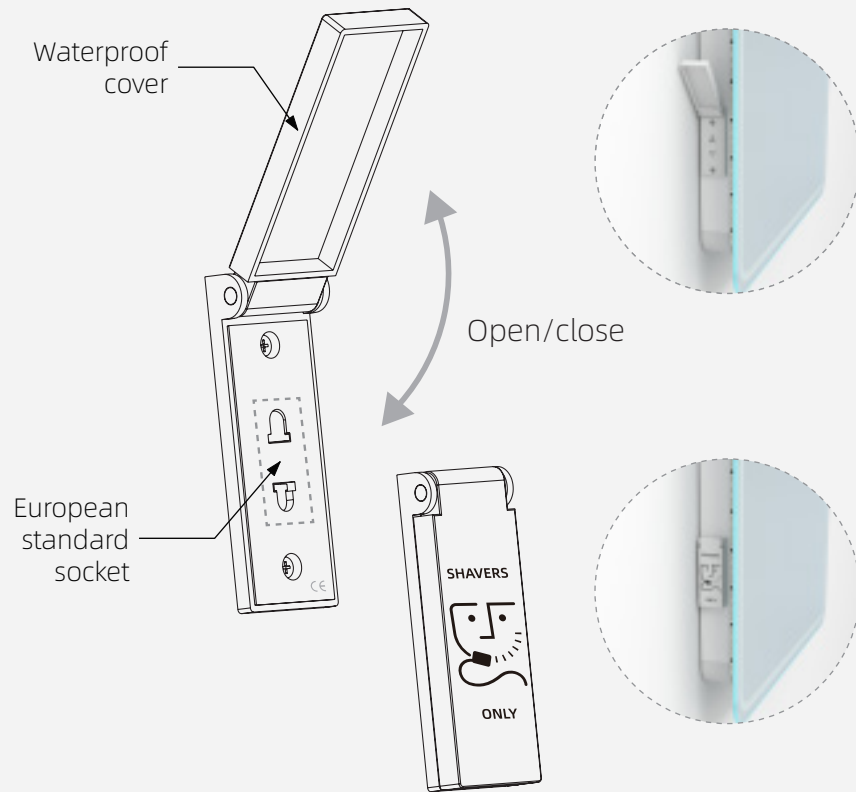

Simply swipe hand below in front of the infra-red sensor  
80° induction range, 50mm induction distance
