Light channel system FLS.

Light channel system FLS. Easy and stable.

Installation channel FLS

Approval

Applies only to FLS 37 and ALK 37

Saddle flange SF Clix 31 und Angle bracket MW Clix 90°

The clix-elements with 90°-rotation enable a **simple and time-saving post-installation** in set channels.

The pre-assembled accessories guarantee a **time-saving and easy installation** due to the reduced number of articles.

The unique thrust block **guarantees a secure installation position.**

Connection elements

The special spring leg on the clix-elements ensures the required pressure in the channel for a **simple adjustment of the element.**

The unique stop element on the clix-elements **facilitates the precise and error-free 90°-rotation in the channel.**

The unique and disappearing thrust block on the plastic holder of the sliding nut Clix P guarantees a **connection without plastic insert in order for a secure metallic connection.**

The characteristic retaining brackets on the connector elements guarantee the **formfitting installation in the channel.**

FLS Cutting Tool

Advantages at a glance

- The FLS cutting tool for the three FLS channel sizes guarantees the most economical type of channel cutting, including length measurement by the integrated 1m-measuring unit.
- Simple burr-free cutting instead of sawing the channel profile to avoid the complex and time consuming reworking of the edges.
- The cutting process avoids falling metal chips as during the sawing process for a dirt free workplace.
- The manual cutting tool, which is always ready for use, allows an almost noiseless use.
- Due to the profile-shaped openings in the cutting tool, incorrect use is permanently avoided.

The variable channel system. Flexibility in the system.

fischer Installation systems.
Reliable fastening of pipes,
ventilation and cable
systems.

Applications

SF Clix 31

Channel fastening on the floor

MW 90° Clix

Channel construction as bracket

FLS light channel, EMS 31

Ventilation duct fastening with suspended channel

FSM Clix P

Channel extension with rail connector

SV 31

Rack with two levels

FSM Clix M

Horizontal pipeline on frame construction

HK 31

Vertical pipe mounting on both sides

FHS Clix

Pipe fastening on light channel

ALK

Cable duct on cantilever arm
