technological **valve** solutions

Our History

1927

Giacomo Cimberio, together with partners Gioira and Fortis, founded **"Fortis-Cimberio-Gioira"** for the production of gates valves.

'60

Renzo Cimberio began to work in the company: first of all, he had an internship for one year in the different departments of the company and then he supported his father Giacomo in leading the company, with the task of following up the export sales.

'80

In the 1980s, Roberto Cimberio joins the company, and the company obtains certification from the British BSI brand for the corporate quality system. At the same time, production capacity needs to be expanded: the second plant in Berzonno di Pogno is born.

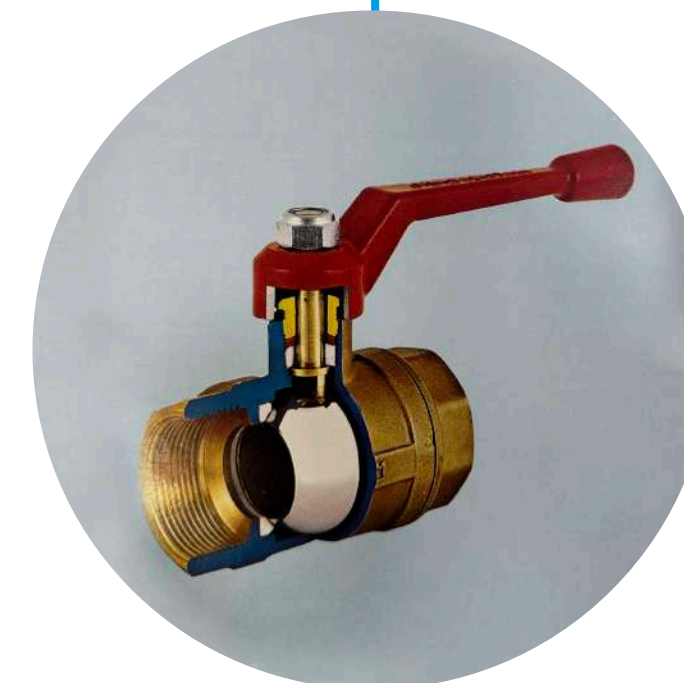

1957

Cimberio is born, founded by Giacomo Cimberio with 15 employees. Among the first Italian faucet manufacturers to distinguish their products with a brand.

'70

Among the first years of the 1970s begins the fundamental innovation: the production of ball valve.

cimberio®

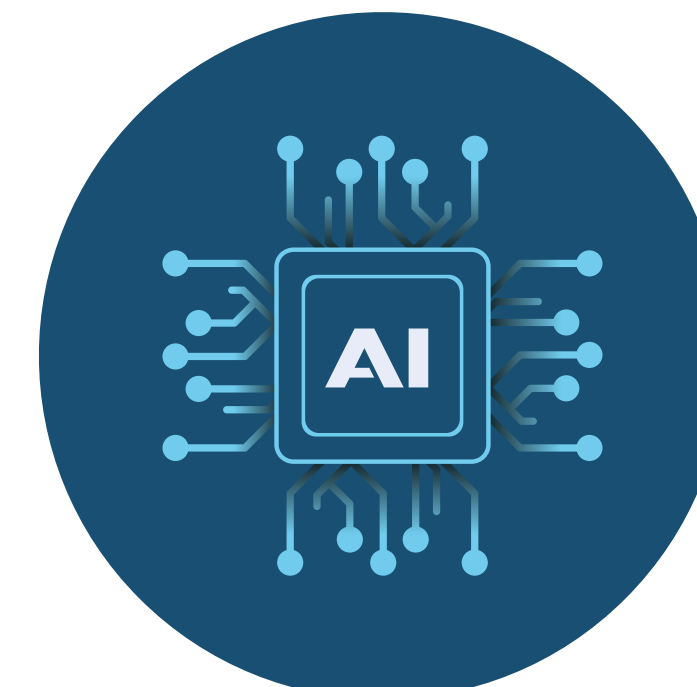

Our History

2000

The 2000s are characterized by a push towards advanced technologies, automation, robotization, and research and development.

The two plants are expanded, and Cimberio's penetration into markets worldwide is consolidated.

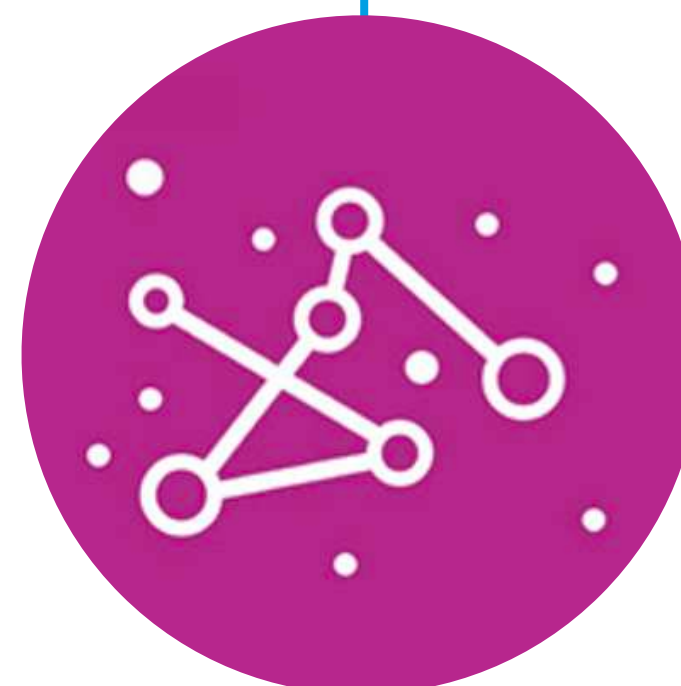

Between now and next

Through a series of targeted acquisitions – Enersem, Intellienergy – the Cimberio Group is growing and projecting itself into the future by creating its own 'energy division' and thus entering the world of building energy intelligence.

1990

In the 1990s, new distribution centers are opened abroad.

2015

"Thanks to the European funding from Horizon2020, SmartCim will emerge as a cornerstone of our development."

Our values

Innovation

Excellence

Sustainability

Total quality is our mantra. Quality must necessarily rhyme with **Innovation** because staying up to date and constantly seeking the maximum quality requires constant attention to the technologies available to us.

The challenges of today have also imposed a value called **Excellence** on us, because we believe that the only way to face moments of crisis is to "do things even better." Excelling every day in everything and for everyone, striving to excel always and in every way, offering the best.

The challenge of tomorrow demands maximum attention to **Sustainability**, which means total respect for the environment that surrounds us, the duty to leave our children a better world than the one we found, and the ability to make the company increasingly solid and forward-thinking.

Certification

Gender Equality Certification

During February 2023, Cimberio S.p.A. obtained a new certification: UNI/PdR 125:2022, on gender equality. Cimberio is the first metalworking group in the area and among the first in Italy in a traditionally male-dominated industrial sector to achieve this certification.

The background of the image is a dark, monochromatic pattern of interlocking wooden rings, similar to a traditional woven basket or a complex geometric lattice. The rings are arranged in a repeating, staggered fashion, creating a textured, three-dimensional effect. The lighting is subtle, highlighting the edges of the rings and giving the pattern a sense of depth and rhythm.

cimberio®

Cimberio Apiary

In the meadow of our Berzonno plant, we host three beehives housing around 150,000 bees.

Through an analysis of the collected pollen, our bees provide us with a detailed report on the quality of the environment in our area, and at the end of the year, they give us their excellent honey.

The Heart in Africa

In 2016, we built an elementary school that accommodates 1,500 children in Burundi, one of the poorest countries in the world. For years, Cimberio has maintained a friendship with the Carmelite friars of Arenzano, who operate their own mission in the Central African Republic.

Together with them, we completed the construction of a seminary in the African country. This year, we have started the construction of a water supply system in Burundi, in the province of Bugenyuzi.

cimberio[®]

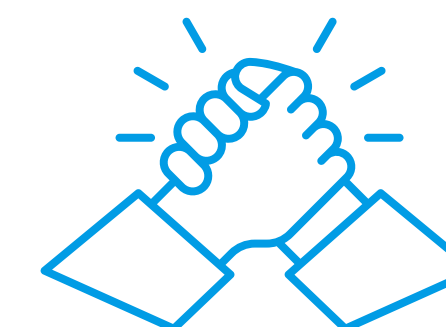

Sports Soul

In 1994, Cimberio became the main sponsor of Borgomanero Basket, a small team competing in the C1 league, with the goal of enhancing the youth sector and promoting inclusion activities for local children. This marked the beginning of an exciting journey that saw a provincial team reach the professional ranks of Lega Due in the 2001/2002 season, where it remained successfully until the 2007/2008 season.

In 2008, Cimberio became the main sponsor of Pallacanestro Varese, a historic team in Italian and European basketball, pursuing the same objectives of youth inclusion on a larger scale. The Cimberio/Varese partnership successfully played on the courts of the most important arenas in Italy and Europe until 2018. In addition to its commitment to the first team, Cimberio also sponsors Varese's Serie A wheelchair basketball team, which, thanks to its sporting successes, has reached the Euroleague.

cimberio®

San Patrignano

Founded in 1978 by Vincenzo Muccioli, it is one of the most important and famous recovery communities for drug addicts in Europe. Cimberio has been closely associated with "Sanpa" for years and sponsors all the sports activities that play a fundamental role in the guests' recovery process. In 2024, San Patrignano awarded Roberto Cimberio the "Abbracci" price for supporting the growth of the community and its activities.

**Fondazione
Academy**
E.T.S.

Fondazione Academy

In 2023, we launched an ambitious project: to create specialized professional courses that teach both young and unemployed people and those already in the workforce the professional skills needed by the businesses in the district, which will take charge of the facility's operation.

This project became a reality with the constitution of the Fondazione Academy, of which Roberto Cimberio is the president. In 2023, it was inaugurated by the Minister for Public Administration, Hon. Paolo Zangrillo.
