

We are European leaders in the designing and manufacturing of **customized electric motors and drives**, used primarily in the fields of Energy Efficiency and Industrial Automation.

We create electric motors that improve efficiency in terms of reliability, performance and compact design. This comes from the investment in research and people, and the desire to always propose innovative solutions for a sustainable future.

Lafert in Sumitomo

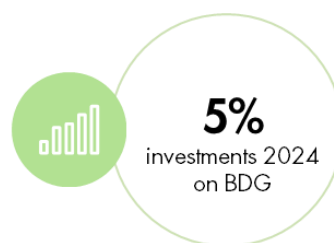

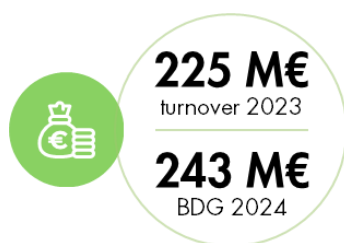

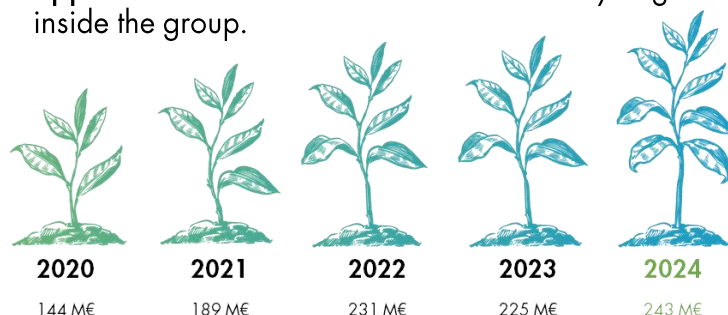

Over the years we have positioned ourselves as a world leader in the electric motor sector with Super Premium performance class.

Today we are firmly part of the Sumitomo brand expansion strategy through the **Sumitomo Heavy Industries (SHI), Power Transmission & Control (PTC) division – EMEIA**, a leader in power transmission and control products.

Together we offer a wide variety of **integrated applications and solutions** thanks to the synergies inside the group.
