

# About Hydraloop

Hydraloop is an award-winning smart water recycling system that helps you save 25–45% on water use—without changing your daily routine.

It collects and treats water from your shower, bath, and optionally from your washing machine and air conditioning, turning it into certified recycled water—safe for toilet flushing, laundry, garden irrigation, and swimming pool top-ups.

- **Flexible Installation:**  
Designed for easy integration in new homes and adaptable solutions for existing homes.
- **Low Maintenance:**  
No filters to replace.
- **Smart App:**  
Track savings & optimize water use.

Why waste water when you can recycle it?  
Join the movement for a smarter, more sustainable home today!
