XSC Heat Pump & Energy Management

Application example

Use PV surplus or cheap grid electricity for thermal energy storage!

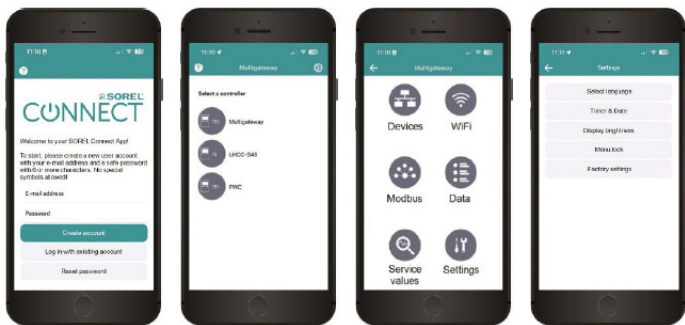

Heating controller XSC for heat pump or hybrid systems with energy management for weather-compensated heating and cooling systems.

Features XSC

- control of multiple energy sources – also in cascade
- up to 3 heating/cooling circuits
- up to 2 storages such as buffer tanks or combi storage
- flexible use of free relays
- full remote control via SOREL Connect App

SOREL Connect App

The SOREL Connect app enables remote access to SOREL controllers with an internet connection.

Available here for free:
