

SOREL[®]
Mikroelektronik GMBH

Solar thermal gets SMART!

View solar yields on your smartphone?

Check the system status remotely?

Give service technicians the option of remote parameterisation?

→ The new generation of TDC Smart controllers from SOREL brings your solar thermal systems into the digital age.

Features TDC Smart

For solar thermal systems from small to complex

Clear user guidance via colour touch display with full-text menu and animated system graphics

Predefined basic systems that can be flexibly expanded with additional functions

SOREL Connect app for yield statistics and remote parameterisation

PC simulation for service & support

Comprehensive customisation options for OEM customers

TDC Smart in 90 seconds
