

Manage the invisible

PRODUCTS

Produal &
HK Instruments

Seamless integration, attentive service

Produal is dedicated to providing top-tier building automation and HVAC solutions in collaboration with you, the customer. HK Instruments' innovative products now complement our portfolio, expanding and enhancing our capabilities. You benefit directly from our centralised and comprehensive range of products that paves the way for more efficient and effective solutions than ever before.

As Produal evolves, we ensure our company's core commitment to customer satisfaction and excellence stays intact. Your familiar, trustworthy team remains dedicated to prioritising your needs and adding value to your co-operation with us, under a single unified Produal brand.

With our combined forces, we're better equipped to make the invisible changes in buildings visible and measurable. The familiar customer-oriented approach continues and our customer service is set to reach ever-increasing heights.

Let's make the changes in buildings visible and measurable – and manage the invisible together.

Pekka Keskiaho
Director, Sales and Marketing

We manage the invisible. Together.

Produal makes invisible changes measurable and visible in all buildings. The accurate data our devices provide for building automation and HVAC professionals give buildings the ability to sense, and enable the development of intelligent and sustainable buildings, together.

The demand to optimise the building ecosystem and to minimise costs and environmental impacts guides us. Therefore, our highly skilled professionals have developed accurate and reliable measurement and control devices to react to changing indoor conditions and to manage premises with data.

In cooperation with our partners, we make the invisible visible to maximise indoor comfort, optimise performance, and extend the life cycle of buildings – doing our share for a sustainable world.

London Design Award-winning learning centre resembles a village community

Multipurpose centre Akvarelli, Forssa, Finland

Over 200 Produal touchscreen TRC room controllers, plus transmitters and sensors, create an ideal indoor learning environment in a new, multifunctional, and energy-efficient 10,000 m² building, merging two schools and two kindergartens. Instead of a single large building, the centre is designed as a modern yet traditional village consisting of five blocks, providing manageable facilities to 800 daily users for primary and early childhood education and leisure activities.

Class A energy efficiency

Demand-based ventilation and lighting control optimise building sustainability. Cooling is limited to the kindergarten, which is also used in summer, and to the gymnasium, where precise humidity control is essential for high-quality parquet flooring used for basketball.

A new, inspiring venue promotes lifecycle sustainability in the historic Kotka port area

Event Centre Satama, Kotka, Finland

In this modern event centre, Produal room controllers, transmitters, and HVAC measurement devices meet the needs of owners and guests as part of building automation. Adaptable spaces and demand-controlled building automation ensure comfort and energy efficiency for a wide range of occasions, from small gatherings to events with over 3,000 participants.

BREEAM certification

Event Centre Satama pursues a “Very Good” rating from BREEAM, Europe’s leading environmental certification. Satama prioritises energy and water efficiency, low-emission indoor climate, and operates as a zero-emission building.

Photos: Aston Martin
Residences

Luxury skyscraper with nearly
400 premium-level apartments

Aston Martin Residences, Miami, USA

Produal's TRC touchscreen room controllers provide design and functionality for the premium-level apartments in what may be the tallest all-residential skyscraper south of New York City. This one-of-a-kind building representing the pinnacle of elegant living also features a full-service marina that can accommodate superyachts.

Design and functionality

TRC touchscreen room controllers bring simplicity of touch to all 400 apartments, including HVAC, lighting and blind control.

Better indoor conditions for Mecca pilgrims

The Great Mosque of Mecca, Saudi Arabia

Proximal sensors and transmitters are integrated into the Sacred Mosque's largest expansion project in its four-thousand-year history. The multi-stage project on the northern side has taken years, expanding multiple zones and levels, indoor and outdoor prayer areas, and existing service facilities. The new BMS and existing system upgrades improved indoor conditions, incorporating temperature and air quality control with added air conditioning for enclosed spaces.

Architecture meets technology

The extension project excelled in terms of architecture, technology, and sustainability, using the best state-of-the-art, energy-efficient ventilation systems.

Small photos: Pixabay

A new kind of hospital architecture, cutting-edge hospital technology

Hospital Nova, Jyväskylä, Finland

HK Instruments' reliable differential pressure and air flow transmitters contribute to the impressive automation system enabling demand-controlled ventilation for various functions at the Nova Hospital complex. This includes meeting strict indoor climate standards in the 24 state-of-the-art operating theaters, enhancing patient safety, and precise ventilation control ensuring energy efficiency across the whole building.

A floor dedicated to AHUs

An entire floor of one building is almost completely dedicated to AHUs, housing around 200 units across 13 engine rooms, each equipped with HK Instruments' pressure and airflow measuring devices.

The world-class, energy-efficient and award-winning architectural building

Helsinki Central Library Oodi, Finland

Oodi is located in the heart of Helsinki and offers both active and peaceful atmospheres with a wide range of services. As a part of the building automation solution, Produal's wide range of measurement and control devices fulfill the strict, demand-based requirements for indoor conditions serving up to 10,000 visitors a day.

Oodi's complex geometry limits space for building automation

Oodi has limited space for building automation. The top floor houses 100,000 books, and the almost completely open space is equipped with ventilation that blends into the structures, being efficient, quiet, and draught-free. However, in the multifunctional spaces on the middle floor, the visible HVAC technology adds a personal touch. The twenty air handling units in the four technical rooms and stairwells are operated with individual controls according to air volume specifications tailored for various uses of the spaces.

Comfortable downtown offices for all types of businesses

Scotia Square Complex, Halifax, N.S., Canada

Occupant comfort is prioritised in all five modern and energy-efficient 14- to 16-floor office buildings located in the 170,000 m² Scotia Square complex. Real-time temperature data from over 400 wireless Proxima room transmitters is used to ensure each space is within appropriate temperature ranges as defined by the end users.

Brunswick Place | 1809 Barrington

Monitoring real-time conditions for optimization

Produal's wireless transmitters are integrated into the Ecopilot® HVAC optimisation system. The current Building Automation Systems in North America utilise the system widely, for example, to improve the energy efficiency of commercial buildings.

We give buildings the ability to sense

Produal develops and produces user-friendly measurement and control devices for building automation and the HVAC industry.

R&D

Our extensive R&D team focuses on innovative digital solutions and customised products.

Products

We design, manufacture and market measurement and room control devices to our partners, OEMs and system integrators.

Tailored solutions

Solution-oriented service ensures flexibility, efficiency, and fast delivery. Our experts support you from design to implementation.

Reliable local service for delivery, trust and advice

Our customers need more than products – they need reliable delivery, trust and advice. We have developed our service range to support and assist our customers during all phases of the building automation lifecycle. Our competent and reliable local service provides you with rapid and flexible delivery, advice in product selection, configuration and problem solving, and training for maximum product performance. Product adaptation and pre-configurations are offered for special needs and fast commissioning. Our online services with a webshop, versatile search functions, filtering options, product comparison tools and application descriptions support our local operations. You can find the summary of the services in the picture below.

Adaptation Service

The Adaptation Service includes a wide range of solutions to speed up your building automation projects, to match the visual appearance of products to specific requirements, or to add additional logos or markings to products.

The following Adaptation Services are available:

- ▶ White labelling, additional stickers and markings (e.g. position marking)
- ▶ Pre-configuration of controllers and bus products, pre-setting of valves
- ▶ Adjustment of cable or probe length
- ▶ Calibration certificates
- ▶ Modification of the software functionality
- ▶ Special colouring of the products – see examples in the picture below.

Adaptation Services are implemented at Produal's factory with high quality and efficiency. A separate service-specific fee is charged, which is typically on a price-per-product basis and includes a minimum order quantity. In addition to standard classroom training dealing with applications, products, and technologies, our Training Services also offer an option for modified training modules to match your specific competence development needs. Training Services also offer certificates to support you in becoming a certified Produal distributor or solution provider.

New products

In Produal's **next-generation room transmitters**, improved accuracy, multifunctionality, extensive connectivity, and enhanced commissioning are combined with an updated design for indoor environment monitoring. New sensors allow measuring and managing the indoor climate as a whole, avoiding reacting to temporary changes. Minimised measurement errors translate directly into energy savings by avoiding unnecessary heating or cooling.

The **RTX room transmitter family** offers measurement combinations of all indoor air aspects, including temperature, humidity, CO₂, VOC, and PIR movement. Versatile features, such as built-in P/PI controller, freely configurable outputs, universal input, and relay option guarantee true multifunctionality. With improved sensor properties, RTX room transmitters comply with even the strictest measurement requirements of certification and rating systems for sustainable buildings.

[Pages 68, 74, 84 and 136](#)

RT-CO2 room transmitters are a streamlined solution for reliable temperature and CO₂ monitoring, including a humidity measurement option. [Page 75](#)

The enhanced **MyProdual mobile app**, available free of charge for Android and iOS, is a more powerful tool than ever for easy configuration and management of next-generation room transmitters, even for a large number of devices. [Page 212](#)

Siro indoor air quality room transmitters bring PM2.5 (PM1, PM10) measurement to Produal's product range. The Siro series devices are available with or without a user interface that includes an LCD display and push-buttons, making configuration and use of the device quick and easy.

[Pages 82–83](#)

The RS room temperature sensor, with a black or white IP30 class housing, is an elegant solution, for example, for public spaces. The sensor provides an expanded temperature measurement range from -30...+70 °C and improved measurement accuracy via a 4-wire connection. [Page 135](#)

New products

NEW

Our wide selection of **TRC touchscreen room controllers** now includes an option to show consumption details. The new **TRC-A-3A-CD apartment controller** shows consumption meter data through the BMS system on the device display. The TRC controller family provides simplicity of touch for all types of room control and measurement applications and is available in both Modbus and BACnet models and in black and white designs. [Pages 22-27](#)

We have cooperated closely with OEM customers for decades, particularly with air handling unit manufacturers. HK Instruments' highly accurate and easy-to-use measuring devices now complement the Produal portfolio, and together, we excel at unique, customer-focused implementations and functional solutions.

The new, enhanced **AVT air velocity transmitters** provide improved measurement accuracy and an extended temperature measurement range for in-duct monitoring and control. An internal controller for constant air velocity is included, and you can now implement, for example, alarms with a relay. With Modbus communication and three flexible commissioning methods for different needs, AVT transmitters are the perfect choice to ensure optimal ventilation in various air flow/velocity monitoring and control applications. [Pages 66 and 198](#)

Are you looking for an accurate and reliable pressure switch for low-pressure ranges? The technologically advanced **DPI-24-BT differential pressure switch and transmitter** is ideal, for example, for fan, blower, and filter monitoring, staircase monitoring/alarm, pressure monitoring in cleanrooms, and boiler pressure monitoring/alarm. The multifunctional device features 8 field selectable pressure ranges per model, one or two 24 V relays, span and zero-point calibration, and easy commissioning with a mobile phone application. [Page 59](#)

DPT-2W differential pressure transmitters measure static and differential pressure. They are designed to simplify installation in applications where two-wire loop-powered measurements can be used. The current output enables accurate measurement results even when using long cables. DPT-2W transmitters are especially well suited for fan, blower and filter monitoring, as well as monitoring pressure in cleanrooms. [Page 58](#)

Produal classics

Since 1987, we have been active in the technical development of building automation measurement and control, in cooperation with our customers. The goal has always been to support customers in achieving excellent outcomes in the evolving business of building automation. Our wide product portfolio includes over 1000 items for controlling, measuring, actuating and commissioning, complemented with system components. These traditional Produal products, as an example of our extensive portfolio, offer effective solutions for customer projects, simplifying installation and saving costs.

RY 1-U is a **voltage controlled relay** with 0...10 V input, converting an analogue signal to digital. Useful for e.g. alarms and step-controls. [Page 165](#)

Relay units RYM 8-KK and RYM 8-KK-0 have eight relay outputs that can be controlled manually or by using 24 Vdc or 0 V input signal. The manual control helps, for example, in commissioning and in fault situations. [Page 166](#)

Isolator ISO 10 is a brilliant device for signal conversions and galvanic isolation. The device is very useful for e.g., solving ground loop problems. [Page 161](#)

LA 14E and LA 15E are occupancy sensors for controlling ventilation and lighting. Intelligent, processor-based logic prevents false detections while remaining highly responsive. Relay function is quiet and the release delay is adjustable. LA 15E is especially designed for lighting control due to its extra output relay for lighting. [Pages 152-153](#)

Condensation switches KA 10 and KA 10-EXT are powerful solutions for detecting water condensation in cooling systems, for example in cooling beams. The condensation switch allows control of the cooling water supply when the water starts to condensate on the pipe. [Page 147](#)

The **YM-3 overpressure meter** is used to measure and monitor overpressure in civil defence and military shelters. The meter is designed and tested to withstand strong blast loadings through its connection pipe. [Page 206](#)

Produal classics

TH5 is a versatile product, used when controller output for the load is not powerful enough. TH 5 is a surface mounted driver that can drive several parallel connected thermal actuators. The driver input signal can be any 5...30 V signal (time proportional) intended for thermal actuator control. [Page 167](#)

AO 2 / AO 3 signal dividers are used for splitting one signal into 2 or 3 separate signals. The dividers are used, for example, for adding controlled stages from 1 stage to 2 or 3 stages. [Page 163](#)

The **switch mode power supply JY** is a multifunction AC/DC to DC converter – essentially all the DC power supply you need. Useful as a power supply for current loops. [Page 168](#)

Timers ETT6 and LAP 5E are designed for energy saving and boosting functions in ventilation applications. The enhanced ventilation may also be necessary during exceptional working hours. ETT6 timer offers modern design for surface mounted applications and improved functionalities such as illustrative indicator lights, providing timer status information. For flush mounting purposes we offer the LAP 5E timer. [Pages 173–174](#)

Control relay FCRY 3 for 3-speed motors has an input of 0...10 V and is especially useful for combining analogue control with digitally controlled motors. [Page 166](#)

The **MIO 12 I/O module** is the perfect product for reading multiple digital or analogue inputs and for controlling thermal or 3-point actuators and 0...10 V outputs using Modbus communication. [Page 175](#)

Frost protection thermostats JVA 24 and JVS 24 are an excellent way to prevent heating coils from freezing in air handling units. Protection is based on proactive valve control by temperature measurement. [Page 146](#)

Controllers

A wide range of multifunctional and reliable controllers is available for all types of building automation applications, from chilled beams, radiators and fan coils to VAV and beyond. Our range covers single-room or zone control, integration with intelligent building automation systems and interoperability with overall smart building management in larger or smaller scale applications. Our selection and designs cater to all budgets, covering both bus and stand-alone products.

The room controllers include all intelligence and connections in the same unit, covering various controller types for different requirements, with an add-on sensor, button capability and full-screen touch display. Touchscreen controllers have an additional light and blinds control interface.

Our control units cover controllers for false ceiling mounting or other hidden installations, minimising the need for cables run through walls, and universal controllers for a wide range of applications in heating, ventilation, pressure, and humidity control.

The user-friendly room units are available for various needs and budgets, from high-class applications to simple yet stylish solutions. Add-on capabilities for the desired functions in one housing remove the need for separate sensors in the room and make the systems flexible and future-proof.

Please note that most of our transmitters are equipped with control output and can be used as single-sequence controllers for heating/cooling or ventilation.

Room controllers

Produal offers complete solutions for different applications. Our room controllers are suitable for various applications, such as hotel rooms, office rooms, waiting areas, conference rooms, and more. HLS 44 and TRC room controller families can both handle different output and input types, with simple touch buttons or with an intuitive full-screen touch display.

¹⁾ Relay outputs

²⁾ These inputs can also be configured to work as digital inputs.

In conference rooms, HLS 44-CO2 (page 28) can control chilled beams with cooling and a damper actuator for ventilation if the CO₂ values are too high, or if cooling is required. Heating is controlled with radiators.

HLS 45 (page 28) can be used to control fan coil units with 2-pipe systems with summer and winter change-over. It is also suitable for controlling heated floors with a return water temperature limit. HLS 45 controls EC fan speed directly via 0...10 V output. The 3-speed fan can be controlled by using FCRY 3 (page 166). HLS 45 can be connected to Modbus RTU.

Room controllers

1

TRC touchscreen room controllers have been designed for climate control in room spaces. The controllers have up to two heating and cooling temperature control stages, fan speed control, optional CO₂ level control and humidity control. The units can be used in various climate control applications, fan coil units, chilled ceilings and zone heating/cooling systems. Light and blinds control are also available. The devices provide accurate energy saving PI control and an intuitive, slim line 3.5" colour touchscreen interface.

TOOLS

SW-DCT-USB 1139040 configuration cable

Ordering guide explanation:

- RI/DI** External NTC 10 temperature input (optional, selectable function, control, limit control, measurement, heating/cooling changeover, high/low limit, aux control loop, 0...10 V external CO₂ and temperature, 0...10 V pressure measurement). These inputs can be configured also to work as digital inputs.
- DI** Voltage free digital input (optional, selectable function e.g. occupancy, night mode, condensation, alarm, summer/winter)
- RO** 230 V relay output for 230 V actuators (typically 3–speed fan, optional heating/cooling stat)
- AO** 0...10 Vdc analogue output (selectable function e.g. heating, cooling, max VAV, EC fan, lights control, blinds control, humidity control, alarm output)
- DO** 24 Vac PWM output (thermal actuator heating/cooling control, requires 24 Vac supply)
- CE** Control extension. The extension provides control for lights and blinds and extension override function.

TRC-3A is an advanced room temperature and CO₂ controller where the analogue outputs can be configured for wide range of functions (e.g. heating, cooling, EC fan, maximum of CO₂ and cooling stages, humidity control, change-over control).

NOTE: You can select also Fahrenheit as the temperature unit during commissioning.

Room controllers

1

Room controllers

1

The TRC-A-3A series room controllers have been designed for apartment climate control. They have a sharp, slim-line 3.5" colour touchscreen interface. The controllers have heating and/or cooling controls with summer/winter change-over. With the Home / Away / Boost operation button, the user can set the apartment conditions to the required state with a simple press of a button. Combined with extractor fans, the TRC-A-3A series controllers can control the supply and extract air flow in the apartment, maintaining comfortable and correctly pressurized climatic conditions in all operating conditions. Available with both Modbus RTU and BACnet MS/TP communication.

Consumption data view is a new feature available in -CD models. This view can display, for example, water, energy and heating consumption details to the user. The BMS system reads this data from the different sensors in the building and sends it to the TRC-A-3A controller via Modbus or BACnet.

room °C, %rH, CO₂

Temperature measurement range	0...50 °C
Temperature measurement accuracy	±0.5 °C (25 °C)

Ordering guide explanation:

- RI** External NTC 10 temperature input (optional, selectable function, control, limit control, measurement, heating/cooling changeover, high/low limit, aux control loop, 0...10 V external CO₂ and temperature, 0...10 V pressure measurement).
- DI** Voltage free digital input (optional, selectable function e.g. occupancy, night mode, condensation, alarm, summer/winter)
- AO** 0...10 Vdc analogue output (selectable function e.g. heating, cooling, max VAV, EC fan, lights control, blinds control, humidity control, alarm output)
- DO** 24 Vac PWM output (thermal actuator heating/cooling control, requires 24 Vac supply)
- CE** Control extension. The extension provides control for lights and blinds and extension override function.
- CD** Consumption data. This option adds a consumption data view to the controller. This view shows the consumption data the BMS system has read from different sensors in the building and sent to the controller via bus.

TRC-A-3A is designed for apartment control with pressure balancing of the supply and extract flows, interlinks to the kitchen extractor, heating/cooling control and simple Home/Away/Boost selection screens.

NOTE: You can select also Fahrenheit as the temperature unit during commissioning.

Room controllers

Room controllers

1

TRC-P touchscreen room controllers have been designed for climate control in room spaces. The controllers have up to two heating and cooling temperature control stages, fan speed control, optional CO₂ level control and humidity control, and 7-day clock for scheduling operation modes. The units can be used in various climate control applications, fan coil units, chilled ceilings and zone heating/cooling systems. Light and blinds control are also available. The devices provide accurate energy saving PI control and an intuitive, slim line 3.5" colour touchscreen interface.

Ordering guide explanation:

RI/DI External NTC 10 temperature input (optional, selectable function, control, limit control, measurement, heating/cooling changeover, high/low limit, aux control loop, 0...10 V external CO₂ and temperature, 0...10 V pressure measurement). These inputs can be configured also to work as digital inputs.

DI Voltage free digital input (optional, selectable function e.g. occupancy, night mode, condensation, alarm, summer/winter)

RO 230 V relay output for 230 V actuators (typically 3-speed fan, optional heating/cooling stat)

AO 0...10 Vdc analogue output (selectable function e.g. heating, cooling, max VAV, EC fan, lights control, blinds control, humidity control, alarm output)

DO 24 Vac PWM output (thermal actuator heating/cooling control, requires 24 Vac supply)

TRC-P-3A is an advanced room temperature and CO₂ controller where the analogue outputs can be configured for wide range of functions (e.g. heating cooling, EC fan, maximum of CO₂ and cooling stages, humidity control, change-over control).

NOTE: You can also select Fahrenheit as the temperature unit during commissioning.

Room controllers

Room controllers

room °C

HLS 44 multifunctional controller family is specifically designed for individual room temperature and zone control applications. All controllers include the basic control functionalities, such as temperature, VAV, and fan control. The controllers have a built-in, galvanic isolated RS-485 channel for Modbus RTU communication.

HLS 44-SE includes advanced functionalities, e.g., 6-way valve control, adjustable 3-speed fan voltages, dimming the display with a timer, and changing the display to show + and - instead of the set temperature (relative setpoint adjustment).

All HLS 44 product variants can be ordered with our adaptation service. With the service you can order the product preconfigured with all the settings that are required by the application.

HLS 45 is excellent for both 2-pipe FCU and floor heating and cooling applications.

Power supply	24 Vac/dc, <1 VA

Room controllers

1

HLS 44-SE-P is the latest arrival to the HLS 44 multifunctional controller family. As the other tried-and-true members of this family, it is designed for individual room temperature and zone control applications. Unlike the other models, HLS 44-SE-P has a potentiometer for easy setpoint adjustment. The controller includes the basic control functionalities, such as temperature, VAV and fan control. It supports 0...10 V controlled actuators and/or thermal actuators, and 0...10 V controlled dampers.

The controller also has day and night operating modes. These operating modes can be controlled by an external card switch, occupancy detector and via Modbus. The controller has a built-in, galvanic isolated RS-485 channel for Modbus RTU communication.

Smart thermostats

1

The slim design of the flush-mounted TRT smart thermostat gives a modern look and feel to heating or cooling control applications. TRT series thermostats have a 3.5" backlit colour touchscreen and provide a wide range of power options. The MOD models have built-in Modbus RTU communication. The BAC models provide BACnet MS/TP communication. TRT smart thermostats can also be used as lighting and/or air conditioning interfaces. The thermostats are also available with 7-day schedule with multiple setpoints.

Produal Proxima® CU-LH control unit combines all the flexibility and power of Produal Proxima® CU into a compact package, especially optimized for individual room temperature, VAV and zone control applications. The control unit supports the following communication protocols: Modbus RTU (MOD models) and BACnet MS/TP (BAC models). The BAC models also support Modbus RTU. The control unit is equipped with two separate control loops and a cascade controller loop. The unit has three operation modes for energy saving control functions. The outputs, setpoints and the controller dead zone can be configured separately for each operation mode.

Power supply	24 Vac/dc (22...26 V), < 2 VA

Room units

Our selection of room units allows the implementation of easy-to-use, premium class applications, or simple yet stylish room solutions in various commercial and public facilities. Versatile models with user-friendly touchscreens, graphical displays, or touch-button interfaces offer a wide range of functionalities – you can simply select the suitable product variant for your purposes.

- ▶ temperature, relative humidity, CO₂, occupancy detection
- ▶ light and blinds control
- ▶ weekly time programme
- ▶ fan speed control, temporary day mode with man-in-house, continuously rotating setpoint knob enabling setpoint reset via Modbus
- ▶ RS-485 Modbus RTU communication
- ▶ BACnet MS/TP communication

The Proxima RU, Proxima RU-D, and ROU room units can either be connected to the Proxima CU or Proxima CU-LH control unit, or operate stand-alone as a general room interface option when connected via Modbus RTU directly to a BMS or PLC system. With an intuitive touchscreen interface, the ROU unit is a versatile and adaptable room interface solution.

The TRI room unit can be connected to Proxima CU or Proxima CU-LH control unit, or via Modbus and BACnet communications to most BMS and PLC systems, providing an attractive user interface. Offering a full-screen touch display, with a clear and visible layout and intuitive control, the TRI is a versatile and adaptable room interface solution.

A simple, local room solution can also be implemented with the help of TEHR NTC 10-P temperature sensor by reading analogue signals to the PLC system. The temperature sensor TEHR-M is also directly connectable to BMS system.

The Pro dual Proxima® CU control unit can be used to control two rooms at the same time with its two built-in control loops. Two room units can be installed into CU's room unit port, greatly reducing system costs. In this case, the installer can choose which inputs and outputs are available in Proxima CU, and easily assign them to each control loop. The configuration is carried out using the MyTool® Android application. In this illustration, Proxima CU is controlling two conference rooms with the RU room unit.

Room units

1

TRI touchscreen room units provide an intuitive user interface and a sensor for room control applications. The devices are connected to CU or CU-LH control units, or linked to BMS via Modbus or BACnet communication interfaces. The 320 x 480 pixel 255K colour touchscreen displays the control status information. Users can change the control settings, including the setpoint, fan speed, and operation mode. They can switch lights and air conditioning units on/off, or activate the Boost mode to improve ventilation.

All TRI units have additional measurement inputs/outputs that can be used as inputs/outputs in the BMS (can be controlled over the network).

Room units

1

ROU is an advanced room unit with an easy-to-use touchscreen. It is designed for above-the-ceiling control units. The basic model includes temperature measurement. Other measurements, including CO₂, RH and PIR, are available as options. ROU can be used as a room unit for CU and CU-LH, or as a Modbus slave unit.

Power supply	24 Vac/dc, < 2.5 VA
Set point	18...26 °C
Temperature measurement range	0...50 °C
Temperature measurement accuracy	±0.5 °C
IP protection class	IP20
Ambient temperature	5...40 °C

Transmitters

Versatile high-quality transmitters for measuring a wide range of parameters in different demanding HVAC applications: accurate measurement of differential pressure, air quality, temperature, humidity, water pressure, air velocity, illuminance, wind speed and more. Several measured properties are also possible with single devices. The devices are available with different measurement ranges and with or without displays.

- ▶ Wide range of measured properties
- ▶ Several measurements with one device
- ▶ 0...10 V, 4...20 mA
- ▶ Wide range of Modbus and BACnet products for interoperability
- ▶ Control output on selected products

Note: Temperature transmitters are in the Temperature measurement section (page 104)

Modbus

Modbus

Transmitters

The high-accuracy air pressure transmitter PEL is an optimal solution for applications requiring high precision and reliability

2

The automatic zero-element regularly calibrates the 0-point, eliminating possible long-term and temperature drift of the sensor in differential pressure transmitter PEL-N. This also makes the transmitter temperature-compensated in ambient temperatures.

Appropriate ventilation based on differential pressure measurement through the building envelope ensures healthy indoor air quality. The **protective cover PEL-USK**, installed in the outer measuring hose of **pressure transmitter PEL**, protects the hose from pressure impacts and contamination.

Transmitters

Many Produal transmitters are equipped with a control output and can be used as single-sequence controllers for heating/cooling or ventilation

2

By using the 0...10 V controller output, a built-in, stand-alone PI-controller in the **CO₂ transmitter HDH** can be used to control, for example, an EC FAN or VAV system. Measurements can be read to BMS by using Modbus RTU or a 0...10 V output.

There are also various options available for our HDH transmitter:

- ▶ Humidity measurement
- ▶ Occupancy sensor
- ▶ CO₂ level indicator
- ▶ Temperature setpoint
- ▶ Relay output

Several Produal transmitters can be used as an external I/O unit for flexibility and cost savings

The differential pressure transmitter KPEL-M works as an external I/O unit, for example, for controlling supply air fans, by overwriting 0...10 V outputs via the BMS system.

- - - 0...10 V control signal
- Pressure hose from duct to KPEL-M
- Modbus RTU bus from BMS to KPEL-M

The **CO₂ transmitter RTX-CO₂-MOD** operates as a remote I/O unit by controlling four 0...10 V outputs remotely from the BMS and reading the values to the system by using the Modbus RTU field bus.

Transmitters

Fine dust measurement is an important addition to building indoor air monitoring and control to prevent hazardous health effects

Good indoor air quality is the sum of many different factors. Traditionally, temperature, humidity, CO₂, and VOC gases have been measured in indoor air. Standards, regulations and recommendations increasingly focus on comprehensive IAQ, including particulate matter monitoring, for building occupier health and wellbeing. With the Siro indoor air quality transmitter, you can measure PM_{2.5} particles in addition to temperature and humidity to ensure that the filtration in your building is working at the required level and air handling can react to possible small particles in the air.

We help you provide healthy and comfortable indoor air quality through measurements and address indoor risk factors through on-demand ventilation control

- ▶ Temperature to ensure comfortable and stable conditions, and to maintain an optimal balance with humidity
- ▶ Humidity to ensure comfort, to fight against airborne viruses and to prevent water damage and mold problems
- ▶ Carbon dioxide for fresh air to increase focus, productivity and learning skills
- ▶ Volatile organic compounds for detecting hazardous gas emissions and to prevent health hazards and unpleasant smells
- ▶ PM_{2.5} fine particles to detect fine dust and reduce the risk of lung and heart diseases (PM₁ and PM₁₀ particles are calculated based on PM_{2.5} measurement using a default particle size distribution)

Differential pressure transmitters for air

m³/s, m³/h, l/s, Pa

DPT-Ctrl-MOD Modbus differential pressure or airflow controllers are designed for building automation systems. Controller can control constant pressure or flow of fans, VAV systems or dampers. When controlling air flow, it is possible to select a fan manufacturer or a common measuring probe that has a K-value.

DPT-Ctrl-MOD includes an Input terminal that enables the reading of multiple signals, such as temperature or control relays over Modbus. The Input terminal has one input channel designed to accept 0–10 V, NTC10k, Pt1000, Ni1000/(-LG), and BIN IN (potential free contact) signals.

Power supply	24 Vac/dc (22...26 V), < 1 VA

Differential pressure transmitters for air

NEW

Pa, m³/s

Technologically advanced and versatile DPI-24-BT differential pressure switches and transmitters are typically used in HVAC/R systems for fan, blower and filter monitoring, staircase pressure monitoring and alarm, pressure monitoring in cleanrooms, and boiler pressure monitoring and alarm. 8 measurement ranges per model.

Options include display, three different pressure measurement ranges, one or two relays and manual or automatic zero point calibration. The switch can control the relays based on differential pressure or air flow.

DPI-24-BT is easy to commission with a MyTool Connect Bluetooth dongle and mobile application.

Air flow transmitters

2

DPT-Flow-MOD air flow transmitters are designed for building automation systems. These technologically advanced transmitters can measure volume flow, velocity, and static and differential pressure. The transmitters can be connected directly to the pressure measurement points of a centrifugal fan, providing accurate flow measurement. The user interface enables easy selection of settings according to the selected fan or measurement probe. The transmitters have an RS-485 channel for Modbus RTU communication.

Filter guard

PEL 2500–SV filter guard is designed for filter monitoring in systems that handle air and other non-flammable gases. The device has three indicator lights that indicate the filter status.

2

Power supply	24 Vac/dc, < 2 VA
Differential air pressure measurement ranges	±100 Pa, 0...100 Pa, 0...200 Pa, 0...500 Pa, 0...1000 Pa, 0...1500 Pa, 0...2000 Pa, 0...2500 Pa
Time constant	2 s or *8 s
Voltage output	0...10 / 2...10 / 0...5 Vdc, < 2 mA (pressure)
Current output	4...20 / 0...20 mA, 700 Ω (pressure)
Output	3 x potential free contact (filter status)
Zeroing	automatic; regularly eliminates the possible zero point drifting
IP protection class	IP54, cable downwards
Ambient temperature	0...45 °C
Mounting	with screws, external lugs
Materials	polycarbonate
Product dimensions	105 x 102 x 46 mm

Air velocity transmitters

NEW

m/s, ft/min, °C

AVT air velocity transmitters measure air velocity and temperature in ventilation ducts. They have separate readings and outputs for air velocity and temperature. The -BT models are easy to commission with a MyTool Connect Bluetooth dongle and mobile application. The -MOD models have Modbus communication instead of analogue outputs.

Power supply	24 Vac/dc ± 10 %
Temperature measurement range	-25...50 °C (probe)
Air velocity measurement range	0...2 m/s, 0...10 m/s, 0...20 m/s, freely selectable
Temperature measurement accuracy	±0.5 °C (25 °C, air velocity > 0.5 m/s)
Air velocity measurement accuracy	0.5 m/s + 3 % from reading (velocity > 2 m/s and ≤ 10 m/s at 25 °C)
Probe	Ø10 x 100 / 200 / 400 mm
Temperature output	0...10 Vdc, load > 1 kΩ / 4...20 mA, load 20...400 Ω
Air velocity output	0...10 Vdc, load > 1 kΩ / 4...20 mA, load 20...400 Ω
IP protection class	IP54, cable downwards / -R and -MOD models: cables downwards and a cable in each cable gland
Cable gland	M16 / 2 x M16 (-R, -MOD)
Ambient temperature	-25...50 °C (probe), 0...50 °C (housing)
Ambient humidity	0...95 %rH
Mounting	with flange, adjustable probe depth
Materials	ABS, PC, LLPDP and stainless steel
Product dimensions	86 x 95 x 268 mm

Air velocity transmitters

IVLJ air velocity transmitters are designed for measuring air velocity and temperature inside air ducts. The probe is attached to a cable for more flexible positioning on the duct.

The minimum installation depth in the duct is 50 mm for all probe lengths. The maximum installation depth is 10 mm less than the probe length. For example, if the probe length is 200 mm, the installation depth is 50...190 mm.

Humidity transmitters

RRH-BAC transmitters are designed for measuring and controlling temperature and humidity in dry room spaces. The transmitters have built-in single stage heating/cooling and humidity control loops. The transmitters have a RS-485 channel for BACnet MS/TP communication. The transmitter inputs and outputs can also be controlled from the BACnet network making the device an effective I/O module.

CO₂ transmitters

NEW

RTX-CO₂ room transmitters provide improved temperature, CO₂, humidity and VOC measurement as well as motion detection (PIR). Standard features include temperature and CO₂ measurement, built-in P/PI controller, seamless integration with existing devices and systems, and easy commissioning and configuration with MyProdual mobile application.

room ppm CO₂, °C, %rH, PIR

Power supply	24 Vac (22...26 V) / 24 Vdc (22...39 V), < 3.2 VA
Temp. meas. range	0...50 °C
Humidity meas. range	0...100 %rH
CO ₂ meas. range	0...5000 ppm
Time constant	adjustable (> 1 min)
Temp. meas. accuracy	±0.3 °C (20...25 °C) / R models: ±0.5 °C (25 °C)
Humidity meas. accuracy	RH models: typ. ±2 %rH (20...25 °C, 30...75 %rH), max. ±3 %rH
CO ₂ measurement accuracy	With ABC calibration typ. ±40 ppm +2 % from reading, max. ±50 ppm +2 % from reading (15...35 °C / 0...80 %rH)
Multifunctional input	1x NTC 10 / Pt1000 / Resistive / Digital / 0...10 Vdc
Multifunctional output	4 x 0...10 Vdc, 2 mA
IP protection class	IP30
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	ABS plastic
Product dimensions	97 x 97 x 27 mm

CO₂ transmitters

NEW

RT-CO₂ transmitters are versatile room temperature and CO₂ transmitters best suited for simple measuring applications in building automation. Their outputs can be configured separately for each measurement. Easy to install to a wall or on a flush mounting box, RT-CO₂ transmitters are also quick to commission with MyProdual mobile phone application and MyTool Connect commissioning tool.

CO₂ transmitters

RCD-BAC transmitters are designed for measuring and controlling CO₂, temperature and humidity in dry room spaces. Automatic self-calibration method eliminates the possible long-term drift. The transmitters have built-in single stage heating/cooling, humidity, CO₂ and maximum VAV control loops. The transmitters have a RS-485 channel for BACnet MS/TP communication. The transmitter inputs and outputs can also be controlled from the BACnet network making the device an effective I/O module.

Air quality transmitters

room CO₂, °C, %rH, VOC, PM

Siro is an indoor air quality transmitter with a modern design. The modular device can be equipped with CO₂ concentration and VOC (Volatile Organic Compounds) measurements or alternatively PM (Particulate Matter, PM_{2.5} (PM₁, PM₁₀) measurement and in addition temperature and humidity measurements. It offers easy installation and adjustment, several different model options and various output signals that are configurable separately for each measurement. The devices are available with user interface that includes a display and buttons making the configuration of the device quick and easy. A configuration tool is available for devices without user interface.

Power supply	24 Vac/dc (22...26 V)
Temperature measurement range	0...50 °C
Humidity measurement range	0...100 %rH
PM measurement range	0...50 µg/m ³ / 0...500 µg/m ³
Temperature measurement accuracy	±0.5 °C (20 °C) / MOD models: ±0.4 °C (20 °C)
Humidity measurement accuracy	RH models: typ. ±2.4 %rH / MOD-models: typ. ±2.2 %rH (20 °C, 30 %rH)
CO ₂ measurement accuracy	typ. ±43 ppm +3 % of value
PM measurement accuracy	0...100 µg/m ³ : PM _{2.5} : ±15 µg/m ³ (at 20...30 °C), PM ₁ /PM ₁₀ : ±25 µg/m ³ (at 20...30 °C), 100...1000 µg/m ³ : PM _{2.5} : ±15 % (at 20...30 °C), PM ₁ /PM ₁₀ : ±25 % (at 20...30 °C)
Voltage output	4 x 0...10 V / 2...10 V / 0...5 V
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	ABS plastic
Product dimensions	95 x 103 x 30 mm

Siro-CT 304.009.002 commissioning tool for Siro transmitters

Air quality transmitters

NEW

RTX-VOC room transmitters provide improved temperature and VOC measurement as well as motion detection (PIR). Standard features include temperature and VOC measurement, built-in P/PI controller, seamless integration with existing devices and systems, and easy commissioning and configuration with MyProdual mobile application.

room VOC, °C, PIR

Power supply	24 Vac (22...26 V) / 24 Vdc (22...39 V), < 3.2 VA
VOC measurement range	0...65000 ppb (CO ₂ equivalent 400...2000 ppm)
Temperature measurement range	0...50 °C
Time constant	adjustable (> 1 min)
Temperature measurement accuracy	±0.5 °C (25 °C)
Temperature measurement accuracy	±0.5 °C (25 °C)
Multifunctional input	1xNTC10 / Pt1000 / Resistive / Digital / 0...10 Vdc
Relay output	None
Multifunctional output	4x0...10 Vdc, 2 mA
IP protection class	IP30
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	ABS plastic
Product dimensions	97 x 97 x 27 mm

Air quality transmitters

ILK transmitters are designed for measuring and controlling VOC (Volatile Organic Compound) level, temperature and humidity inside ventilation ducts. MEMS sensing technology ensures accurate and durable VOC measurement that is related to the CO₂ level.

duct VOC, °C, %rH

2

Power supply	24 Vac/dc, < 2 VA
VOC measurement range	450...2000 ppm (CO ₂ equivalent)
Temperature measurement range	0...50 °C
Temperature measurement accuracy	±0.5 °C
Control output	0...10 Vdc, 2 mA
Temperature output	0...10 Vdc, 2 mA
VOC output	0...10 Vdc, 2 mA
IP protection class	IP54, cable downwards
Cable gland	M16
Ambient temperature	0...50 °C
Ambient humidity	0...85 %rH
Mounting	in a Ø10 mm hole, with screws, external lugs
Materials	PC plastic
Product dimensions	105 x 104 x 155 mm

TYPE	ART. NO.	
ILK	1135630	duct transmitter
ILK-N	1135631	duct transmitter with display
ILK-RH	1135632	duct transmitter with humidity measurement
ILK-RH-N	1135633	duct transmitter with humidity measurement and display

------	---------	------------------

TOOLS

ML-SER	1139010	transmitter commissioning tool
--------	---------	--------------------------------

Carbon monoxide transmitters

outdoor ppm CO

HML transmitters are designed for measuring carbon monoxide concentration in underground parking garages and parking halls. The measuring is based on electro-chemical cell. The transmitter measuring range is 0...100 or 0...300 ppm.

Power supply	24 Vac/dc, < 2 VA
CO measurement range	0...100 ppm / 0...300 ppm
Time constant	1.5 min
CO measurement accuracy	± 10 ppm for < 70 ppm value; ± 15 % of value for > 70 ppm value
Output	0...10 Vdc, 1 mA / 4...20 mA, < 500 Ω
IP protection class	IP54, cable downwards
Cable gland	M16
Ambient temperature	-30...40 °C
Mounting	with screws, external lugs
Materials	PC plastic
Product dimensions	100 x 113 x 46 mm

TYPE

ART. NO.

HML	1135520	CO transmitter
HML-N	1135521	CO transmitter with display

OPTIONS

HMV	1135510	exchange kit for HML
-----	---------	----------------------

Light level transmitters

LUX 34 is designed for measuring outdoor light level and temperature. Measured values can be used for controlling lighting and heating.

outdoor lx, °C

2

Power supply	24 Vac/dc, < 0.1 VA
Temperature measurement range	-50...50 °C
Temperature output	0...10 Vdc, 1 mA
Light level output	0...10 Vdc, 1 mA
IP protection class	IP54, cable downwards
Cable gland	M16
Ambient temperature	-40...40 °C
Mounting	with screws, external lugs
Materials	PBT, PC, PA
Product dimensions	90 x 94 x 44 mm

TYPE	ART. NO.	
LUX 34	1133310	light level transmitter, selectable range 0...1000 lx or 0...10000 lx
LUX 34-100	1133311	light level transmitter, selectable range 0...100 lx or 0...500 lx

OPTIONS

WS-1	9000520	weather shield
------	---------	----------------

Light intensity transmitter

MMSP1 is designed for measuring sun light intensity.

outdoor W/m²

Power supply	24 Vdc, < 0.03 W (5...30 Vdc)
Light level range	0...1500 W/m²
Light level accuracy	±5 % (annual mean)
Voltage output	0...10 Vdc / 0...3.125 Vdc / 0...150 mVdc, the supply voltage must be at least 12 V
Current output	4...20 mA
IP protection class	IP65
Cable gland	M16
Product dimensions	80 x 150 x 60 mm

TYPE	ART. NO.	
MMSP1	1133360	sun light intensity transmitter

Differential pressure transmitters for water

VPEL differential pressure transmitter is designed for measuring water/glycol pressures in heating and cooling systems.

bar

2

Power supply	24 Vac/dc, <1 VA
Differential water pressure measurement accuracy	±2.5 % from the full scale
Voltage output	0...10 Vdc, 5 mA
Current output	4...20 mA, < 500 Ω
Zeroing	manually by using the push button
Process connection	8 mm compression fittings for copper pipes
IP protection class	IP54
Cable gland	M16
Ambient temperature	-20...70 °C
Mounting	with screws, external lugs, position allowed only process connectors downwards
Materials	PC plastic
Product dimensions	118 x 113 x 46 mm

TYPE

ART. NO.

VPEL 1.0/2.5	1134060	differential water pressure transmitter, range 0...1.0 or 0...2.5 bar
VPEL 1.0/2.5-N	1134061	differential water pressure transmitter with display, range 0...1.0 or 0...2.5 bar
VPEL 4.0/6.0	1134070	differential water pressure transmitter, range 0...4.0 or 0...6.0 bar
VPEL 4.0/6.0-N	1134071	differential water pressure transmitter with display, range 0...4.0 or 0...6.0 bar

Pressure transmitters for water

VPL pressure transmitter (3-wire) is designed for measuring fluid pressures in heating and cooling systems.

bar

Power supply	24 Vac/dc, <1 VA
Voltage output	0...10 Vdc, 2 mA
Current output	4...20 mA, 800 Ω
IP protection class	IP54, cable or probe downwards
Cable gland	M16
Ambient temperature	0...60 °C
Mounting	R½"
Materials	PBT, PC, PA and stainless steel
Product dimensions	70 x 95 x 81 mm

TYPE

ART. NO.

VPL 60	1134030	water pressure transmitter, range 0...16, 0...25, 0...40 or 0...60 bar
VPL 60-N	1134031	water pressure transmitter with display, range 0...16, 0...25, 0...40 or 0...60 bar
VPL 16	1134050	water pressure transmitter, range 0...2.5, 0...6, 0...10 or 0...16 bar
VPL 16-N	1134051	water pressure transmitter with display, range 0...2.5, 0...6, 0...10 or 0...16 bar

Rain sensor

RV2-24 is a rain sensor designed for HVAC and building automation systems to detect precipitation (rain/snow).

Power supply	24 Vac/dc, < 2 VA
Rain output	relay, max. 230 Vac, 3 A
IP protection class	IP65
Cable gland	1X M16
Ambient temperature	-35...50 °C
Product dimensions	80 x 82 x 55 mm

2

TYPE

ART. NO.

RV2-24	1136070	rain sensor
--------	---------	-------------

Wind sensors

UV7+UV7-VV ultrasonic wind transmitter is designed for measuring wind speed and direction in HVAC applications. The sensor is robust and stable.

m/s, °

Power supply	24 Vac/dc, < 0.75 A
Air direction measurement range	0...359 degrees
Air velocity measurement range	0...15 m/s / 0...40 m/s
Time constant	1, 2, 4, 8, 16 s
Air direction measurement accuracy	±1°
Voltage output	3 x 0...10 Vdc
Output	RS232 NMEA0183®
IP protection class	IP65
Ambient temperature	-15...55 °C
Cable	25 m

TYPE

ART. NO.

UV7	1136030	wind sensor
UV7-VV	1136032	transmitter module for wind sensor
UV7+UV7-VV	1136033	wind sensor and transmitter module

Wind sensors

VS 3000 wind sensor is designed for measuring wind speed and direction in HVAC applications.

m/s, °

2

Power supply	24 Vac/dc, < 2 VA
Air direction measurement range	0...359 degrees
Air velocity measurement range	0...35 m/s
Air direction measurement accuracy	±1°
Air velocity measurement accuracy	±1 m/s
Air direction measurement output	0...10 Vdc
Air velocity output	0...10 Vdc
IP protection class	IP65
Ambient temperature	-35...70 °C
Mounting	< Ø 50 mm
Cable	10 m

TYPE

ART. NO.

VS 3000	1136040	wind speed and direction sensor
VH1000	1136050	wind speed sensor
VR1000	1136060	wind direction sensor

Wind speed detector

TUNA 20 is designed for measuring wind speed and outside air temperature.

m/s, °C

Power supply	24 Vac/dc, < 1.5 VA
Temperature measurement range	-50...50 °C
Air velocity measurement range	0...20 m/s
Voltage output	0...10 Vdc, 2 mA
Current output	4...20 mA, 600 Ω
IP protection class	IP54
Cable gland	M16
Ambient temperature	-50...50 °C
Mounting	with screws on wall
Materials	PBT, PC, PA, painted steel

TYPE

ART. NO.

TUNA 20	1136010	wind speed detector
---------	---------	---------------------

Smoke detectors

KRM-X-2 duct smoke detector is designed for smoke detection in ventilation ducts. The detector is a combination of a smoke detector and an adapter system. The adapter system has been specially designed for optimal air flow through the smoke detector. KRM-X-2 detectors are for 24 Vac/dc supply voltage.

2

Power supply	24 Vac/dc
Probe	160 mm
Sensor	Optical RM3.3-X(ALN-E)
Alarm output	250 Vac / 24 Vdc, 8 A, change-over contact and 250 Vac / 24 Vdc, 8 A, NC contact
Contamination output	250 Vac / 24 Vdc, 6 A, NC contact
IP protection class	IP54
Cable gland	3 X M16
Ambient temperature	-20...50 °C
Materials	ABS plastic, aluminium
Product dimensions	172 x 271 x 85 mm

TYPE	ART. NO.	
KRM-X-2-0,16	1137060	duct smoke detector
KRM-X-2-MOD-0,16	1137070	Modbus duct smoke detector
KRM-X-2-BAC-0,16	1137080	BACnet duct smoke detector

OPTIONS		
KS-X	1137093	mounting plate for round or insulated ducts
WDG-X	1137094	protective insulating housing with alarm display for outdoor installation
KS-WDG-X	1137095	mounting plate for round or insulated ducts (with WDG-X)
ASR-A10	1137096	test gas
KRM-RM3.3-X	1137097	smoke sensor (spare part)

Smoke detectors

KRM-X-1 duct smoke detector is designed for smoke detection in ventilation ducts. The detector is a combination of a smoke detector and an adapter system. The adapter system has been specially designed for optimal air flow through the smoke detector. KRM-X-1 detector is for 230 Vac supply voltage.

Power supply	230 Vac
Probe	160 mm
Sensor	Optical RM3.3-X (ALN-E)
Alarm output	250 Vac / 24 Vdc, 8 A, change-over contact and 250 Vac / 24 Vdc, 8 A, NC contact
Contamination output	250 Vac / 24 Vdc, 6 A, NC contact
IP protection class	IP65
Cable gland	M16
Ambient temperature	-20...50 °C
Materials	ABS plastic, aluminium
Product dimensions	172 x 271 x 85 mm

TYPE

ART. NO.

KRM-X-1-0,16	1137050	duct smoke detector
--------------	---------	---------------------

KRM-RM3.3-X	1137097	smoke sensor (spare part)

Wireless transmitters

Wireless functionality is one of the fastest-growing trends globally – including in building automation. Produal has been a pioneer in offering wireless solutions for the market since 2006.

Our reliable, fully battery-operated Produal Proxima® MESH 2.4 GHz solution offers unparalleled reliability for wireless building automation. Based on the intelligent and self-healing MESH network, the device utilises the best available communication frequencies dynamically in the building. The patented technology minimises the likelihood of interference by or with other wireless systems. The wireless Produal MESH allows you to share the network connection across a wider area than ever before, and dedicated wireless applications can be built and commissioned easily.

Wireless Modbus and wireless BACnet technologies allow the creation of a wireless Modbus RTU or BACnet MS/TP network that maintains the standardisation of the protocol. As a result, you can reduce materials and workload by converting your devices to wireless Modbus or BACnet network and sending your measurement messages wirelessly with low latency.

We also offer transmitters for your long-range wireless LoRaWAN network. Our range makes it possible to convert Modbus RTU device communications to wireless LoRaWAN network communications, as well as to measure a wide range of properties and transmit the measurements as small-size payloads over long distances. LoRaWAN is a beneficial technology, especially in various IoT solutions.

Wireless Produal Proxima® MESH

Wireless Produal Proxima® is a fully battery-operated MESH platform, featuring an impressive battery life of up to 8 years in “always-on” wireless transmitters. The network utilises the latest wireless technology innovations, ensuring extreme reliability in even the most challenging radio environments. We offer a wide range of measurements and options, including products for converting digital contacts, NTC 10 temperature measurement, and 0...10 V inputs to wireless messages. This allows for almost unlimited application possibilities, from building automation to environment monitoring and IoT applications. Wireless Produal Proxima® is designed to be future-proof, aiming to offer one of the most comprehensive and multifunctional wireless portfolios on the market.

The platform operates on the globally accepted frequency of 2.4 GHz, which is acknowledged in various environments. Its stunning multifunctionality offers broad possibilities and options for system integrators. The mobile MyTool app allows easy network commissioning, monitoring, and updating. All the network messages are encrypted at the AES-128 level.

Wireless base unit

WBU is a base station for wireless Proximal Proxima® MESH network transmitters and input modules. The transmitter information can be read via Modbus or through the 6 analogue outputs. The base unit supports Modbus RTU and Modbus TCP.

Power supply	24 Vac/dc (22...26 V), < 7 VA
Frequency	2,4 GHz
Input	100 wireless transmitters and 6 analogue inputs
Supply output	2 x 24 Vac, total load < 8 A
Output	6 x analogue output
IP protection class	IP22
Ambient temperature	0...50 °C
Ambient humidity	0...85 %rH
Mounting	with screws on wall or on 35 mm DIN rail
Materials	PC plastic
Product dimensions	186 x 136 x 55 mm

CONVERT THE WIRED MEASUREMENTS TO WIRELESS MESSAGES FOR ALMOST UNLIMITED APPLICATIONS.

Wireless Modbus and BACnet

Wireless Modbus and wireless BACnet technologies allow the creation of a wireless Modbus RTU or BACnet MS/TP network that maintains the standardisation of the protocol. By converting the Modbus or BACnet signals to a wireless network, you can send your Modbus or BACnet measurement messages wirelessly with low latency. This option significantly reduces the need for control cables in your installations, saving valuable time and costs in installation planning, cabling work, daisy-chaining, and troubleshooting. A wireless Modbus or BACnet system is also an excellent choice for projects where cables are not wanted or are impossible to use.

For example, the wireless Modbus network utilises the latest wireless technology innovations for extreme reliability even in the most challenging radio environments. The wireless Modbus bridge, used for conversion, can be configured either as a gateway connected to the Modbus client or as a node connected to the Modbus server with cables. The Wireless Modbus network can consist of up to 100 nodes, and it utilises the international license-free ISM band at 2.4 GHz.

3

Wireless Modbus bridge

NEW

W-Modbus converts the communication of Modbus RTU devices to wireless communication. W-Modbus supports up to 100 devices in one Modbus network. W-Modbus PRO supports up to four Modbus servers and up to 247 devices in one Modbus network. Compatible with all Modbus RTU devices.

3

Power supply	24 Vac/dc, < 2.5 VA
Frequency	2.45 GHz, ISM band (2400...2483 MHz)
Supply output	24 Vac/dc, < 10 VA
IP protection class	IP40
Ambient temperature	-20...55 °C
Ambient humidity	10...95 %rH
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	ABS plastic
Product dimensions	86 x 86 x 26 mm

Wireless LoRaWAN

Produal's wireless LoRaWAN selection offers transmitters for your long-range wireless network. LoRaWAN is a Low Power, Wide Area (LPWA) networking protocol designed to wirelessly connect all kinds of devices to the internet in regional, national, or global networks. LoRaWAN is one of the leading IoT (Internet of Things) technologies for wireless communication.

With our Modbus LoRaWAN bridge, it is easy to connect Produal or 3rd party Modbus measurement and control devices to the LoRaWAN network by converting Modbus RTU messages to wireless LoRaWAN communication, and vice versa. The MLB bridge acts as a Modbus master device and can read and write 32 freely configured Modbus registers via Modbus RTU bus, supporting two-direction communication. Commissioning is done conveniently with the Produal MyTool® mobile application, where you can find ready description files of the most common Produal Modbus devices.

Additionally, the wireless LoRaWAN room transmitter selection fully covers your various battery-powered measurement needs for humidity, CO₂, light, and sound, as well as occupancy detection.

CONTACT OUR SALES FOR OTHER LORAWAN PRODUCTS.

Wireless Modbus LoRaWAN bridge

LoRaWAN 

MLB is a Class A LoRaWAN device that can operate in a public or private network. MLB is designed for converting Modbus RTU messages to wireless LoRaWAN messages and vice versa. The device functions as a Modbus master and it can read and write up to 32 registers via Modbus RTU bus. The slave device registers can be configured freely. Up to 16 Modbus slave devices can be connected to MLB and up to 32 registers can be read and written in total. MLB can be connected to any Modbus RTU slave device, and it supports two-way communication.

Power supply	10...30 Vac/dc, 30 mA
Frequency	863...870 MHz (868 MHz)
IP protection class	IP54, cable downwards
Cable gland	2 X M16
Ambient temperature	-5...50 °C
Ambient humidity	0...95 %rH

Temperature measurement

Comprehensive range of temperature sensors for different applications in buildings' control and heating, cooling and air-conditioning systems. Thanks to the unique housing design, the sensors are easy to install, which offers major advantages during commissioning. Our sensor range covers the most commonly used passive temperature sensor elements and transmitters. Versatile installation options cover ducts, pipes, construction, ground, room and exterior.

- ▶ Wide range of HVAC temperature measurements
- ▶ Sensor element options include PT, NTC and NI series
- ▶ On transmitters 0...10 V, 4...20 mA
- ▶ Heating / cooling control
- ▶ Modbus communication with override feature

Hot domestic water transmitters

TENA temperature transmitters are designed for measuring and controlling hot domestic water temperature.

°C

Temperature measurement range	-50...150 °C, -50...50 °C, 0...50 °C, 0...100 °C
Temperature measurement accuracy	±0.5 °C
Probe	Ø 4.1 x 80 / 50 / 120 / 210 mm
IP protection class	IP54, cable or probe downwards
Cable gland	M16
Mounting	R 1/2"
Materials	PBT, PC, PA, acid proof steel

TYPE

ART. NO.

TENALL	1177050	2-wire transmitter/controller, supply 15...35 Vdc, output 4...20 mA, probe 80 mm
TENALL-50	1177051	2-wire transmitter/controller, supply 15...35 Vdc, output 4...20 mA, probe 50 mm
TENALL-50-N	1177051N00	2-wire transmitter/controller with display, supply 15...35 Vdc, output 4...20 mA, probe 50 mm
TENALL-120	1177052	2-wire transmitter/controller, supply 15...35 Vdc, output 4...20 mA, probe 120 mm
TENALL-210	1177053	2-wire transmitter/controller, supply 15...35 Vdc, output 4...20 mA, probe 210 mm
TENALU	1179050	3-wire transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA
TENALU-N	1179050N00	3-wire transmitter/controller with display, supply 24 Vac/dc, output 0...10 V < 2 mA
TENALU-50	1179051	3-wire transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA, probe 50 mm
TENALU-50-N	1179051N00	3-wire transmitter/controller with display, supply 24 Vac/dc, output 0...10 V < 2 mA
TENALU-120	1179052	3-wire transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA, probe 120 mm
TENALU-210	1179053	3-wire transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA, probe 210 mm
TENA-M	117Z050	Modbus transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA, probe 80 mm
TENA-M-50	117Z051	Modbus transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA, probe 50 mm
TENA-M-210	117Z052	Modbus transmitter/controller, supply 24 Vac/dc, output 0...10 V < 2 mA, probe 210 mm

Room temperature transmitters

NEW

RTX room transmitters provide improved temperature measurement as well as motion detection (PIR). Standard features include temperature measurement, built-in P/PI controller, seamless integration with existing devices and systems, and easy commissioning and configuration with MyProdual mobile application.

°C, PIR

Power supply	24 Vac (22...26 V) / 24 Vdc (22...39 V), < 3, 2 VA
Temperature measurement range	0...50 °C
Temperature measurement accuracy	±0.3 °C (20...25 °C)
Multifunctional input	1xNTC10 / Pt1000 / Resistive / Digital / 0...10 Vdc
Relay output	None
Multifunctional output	4x0...10 Vdc, 2 mA
IP protection class	IP30
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	ABS plastic
Product dimensions	97 x 97 x 27 mm

Room temperature transmitters

RTE-BAC transmitters are designed for measuring and controlling temperature in dry room spaces. Transmitters have built-in single stage heating/cooling control loops. The transmitters have a RS-485 channel for BACnet MS/TP communication. The transmitter inputs and outputs can also be controlled from the BACnet network making the device an effective I/O module.

Special measurement and detection

The special measurement and detection products cover protective thermostats for heating coils' freezing protection, safety components for water leakage monitoring, thermometers, differential pressure switches, filter guards and occupancy sensors. With these components, you can complete your installation to secure air conditioning heaters, avoid water leakage damage, save energy with occupancy sensors and schedule the replacement of filters.

Water leakage relay

VVK2 monitors the status of the water leakage sensors connected to the relay. When the sensor becomes wet the resistance decreases and the alarm relay will be activated. Also the sensor circuit is monitored (alarms if $R > 330 \text{ k}\Omega$).

Power supply	24 Vac/dc, < 2 VA
Relay output	60 Vdc, 2 A, res. Changeover
IP protection class	IP20
Mounting	For 35 mm DIN rail
Product dimensions	53 x 90 x 61 mm

TYPE

ART. NO.

VVK2	1187024	water leakage relay
------	---------	---------------------

OPTIONS

VVA1	1187020	sensor with connection box, e.g. on floor and dip tray
VVA2	1187021	sensor with 2 m cable
VVA3	1187026	sensor (25 x 200 mm) with 2 m cable and adhesive tape

Water leakage relay

LPH 10 monitors the resistance of the connected sensor. When the sensor becomes wet the resistance decreases. If the resistance decreases below the alarm limit, the alarm relay, indicator light and buzzer activate. The buzzer can be muted by pressing the button, but the relay and indicator light stay active until the sensor resistance increases over the alarm limit.

Power supply	24 Vac/dc, < 2 VA
Set point	approx. 10 kΩ
Relay output	Changeover
Alarm output	60 Vdc, 300 mA, res. change-over contact. Alarm is also indicated with an indicator light and buzzer.
IP protection class	IP20
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	ABS plastic
Product dimensions	87 x 86 x 32 mm

5

TYPE ART. NO.

LPH 10	1187010	water leakage relay
--------	---------	---------------------

OPTIONS

VVA 1	1187020	sensor with connection box, e.g. on floor and dip tray
VVA 2	1187021	sensor with 2 m cable
VVA 3	1187026	sensor (25 x 200 mm) with 2 m cable and adhesive tape

Water leakage sensors

VVA and VVN sensors will be used with VVK 2 and LPH 10. The sensors can be installed on the floor and VVN also e.g. on the side of the pipe monitoring possible condensation.

Nominal resistance	approx. 300 kΩ when dry
--------------------	-------------------------

DTM-S -40/40	1240070	duct thermometer -40...40 °C
DTM-S 0/60	1240080	duct thermometer 0...60 °C

Differential pressure switches

PS differential pressure switches are designed for monitoring over and under pressures and pressure differences in systems that handle air and other non-aggressive gases. PS switches offer a cost-effective solution for filter, fan and duct pressure monitoring for building automation systems. The switching point can be adjusted manually.

Switching accuracy	max. ±15 %
Output	250 Vac, 3 A, res. (0.1 A, res. in PS200)
IP protection class	IP54
Cable gland	M16
Ambient temperature	-20...60 °C
Ambient humidity	0...95 %rH
Product dimensions	90x105x63 mm

TYPE	ART. NO.	
PS200	105.001.061	differential pressure switch 20...200 Pa
PS300	105.002.065	differential pressure switch 30...300 Pa
PS500	105.003.070	differential pressure switch 30...500 Pa
PS600	105.004.063	differential pressure switch 40...600 Pa
PS1500	105.005.068	differential pressure switch 100...1500 Pa
PS4500	105.006.050	differential pressure switch 500...4500 Pa

Filter guards

DPG/PS filter guards are designed for filter monitoring in systems that handle air and other non-flammable gases. The guards include a pressure gauge and a differential pressure switch. The differential pressure switch switching point is adjustable.

Gauge accuracy	±2 % from the full scale
Relay output	250 Vac, 0.1A, res. Changeover
IP protection class	IP54
Cable gland	M16
Ambient temperature	-5...60 °C
Ambient humidity	0...95 %rH
Mounting	vertically (with screws)
Product dimensions	219 x 136 x 68 mm

TYPE

ART. NO.

DPG200/PS200	109.001.005	filter guard, 200 Pa
DPG300/PS300	109.005.005	filter guard, 300 Pa
DPG500/PS500	109.004.008	filter guard, 500 Pa

Occupancy sensors

LA 14E is an occupancy sensor for controlling ventilation and lighting. Intelligent, processor based, logic prevents false functions being at the same time very sensible. Relay function is quiet and the release delay is adjustable.

Power supply	24 Vac/dc, < 0.5 VA
Relay output	60 Vdc, 100 mA, delay is selectable (2 s, 2 min, 10 min or 20 min) NC or NO
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...85 %rH
Mounting	flush (surface mounting casing optional)
Materials	white plastic
Product dimensions	85 x 85 x 34 mm

TYPE

ART. NO.

LA 14E	1185130	occupancy sensor
--------	---------	------------------

Occupancy sensors

LA 15E is designed for controlling lighting. Up to 1.5 A continuous fluorescent lighting load is allowed.

Power supply	24 Vac/dc, < 0.5 VA
Relay output	60 Vdc, 100 mA, delay 2 s, NC or NO
Lighting output	250 Vac, 1.5 VA, hold on time is selectable (2 s, 2 min, 10 min or 20 min)
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...85 %rH
Mounting	flush (surface mounting casing optional)
Materials	white plastic
Product dimensions	85 x 85 x 34 mm

Thermal actuators and control valves

Thermal actuators, control valves and solenoid valves designed for building automation needs complement our wide product offering for automated HVAC management systems.

- ▶ Complementary products for all HVAC systems
- ▶ Valves for heating and cooling applications
- ▶ Adapters for almost all manufacturers' valves

Thermal actuators

Valve actuators are available for 24 Vac/dc and for 230 Vac supply with a NC or NO function. Control signal may be a PWM or a 0...10 Vdc signal. Connection cables may be fixed or removable. Different lengths of removable cables are available. An adapter between the valve and the actuator is always needed.

IP protection class	IP54
Ambient temperature	0...65 °C

To connect a thermal actuator to control valve, a special adapter ring is needed. Thermal actuators can be mounted to the Produal NV2 control valves by using a VA 80 adapter ring.

The adapter rings are also available for other manufacturers' valves. See the following table for more information.

NOTE: If you can't find the needed valve from the table, you can fill in the form on our website (scan the QR code on the right to open the PDF or browse to Product selection guides / Valve measuring guide) and send the dimensions to Produal customer support. The customer support will determine the correct adapter ring.

OPTIONS

VA 80	1220010	adapter for Produal NV valves
-------	---------	-------------------------------

Motorized valve actuators

The motorized valve actuators are designed for applications that need short response time for the valve control. The actuators are equipped with removable cable (1 m) and they are available for 3-point control and 0...10 V control. An adapter between the valve and the actuator is always needed.

Power supply	24 Vac/dc, <2.6 VA
IP protection class	IP54
Running time	15 s/mm
Ambient temperature	0...50 °C
Cable	1 m, 3 x 0,22 mm ² (PVC)
Product dimensions	45 x 65 x 90 mm

TYPE	ART. NO.	
MPV-46845-30N00-1S	1210111	motorized valve actuator, 0...10 V control, running time 15 s/mm
M3P-46845-20N00-1S	1210120	motorized valve actuator, 3-point control, running time 30 s/mm

Solenoid valves

MV solenoid valves are designed for building automation needs of the water control, for example in heating and cooling systems with closed circuit (valves are not suitable for domestic water circuit). Solenoid valves work in zero pressure difference and the valves are either normally closed (NC) or normally open (NO). Standard coils are for 230 Vac supply and 24 Vac or 24 Vdc coils are available as options. The valve coils are not designed for continuously energized applications.

Power supply	230 Vac
IP protection class	IP65
Ambient temperature	-5...90 °C
Materials	brass

TYPE	ART. NO.	
MV1/2 NC 230	1260220	1/2" solenoid valve (NC, DN15)
MV1/2 NO 230	1260250	1/2" solenoid valve (NO, DN15)
MV 3/4 NC 230	1260230	3/4" solenoid valve (NC, DN20)
MV 3/4 NO 230	1260260	3/4" solenoid valve (NO, DN20)
MV1 NC 230	1260240	1" solenoid valve (NC, DN25)
MV1 NO 230V	1260270	1" solenoid valve (NO, DN25)
MV1 1/4 NC 230	1260290	1 1/4" solenoid valve (NC, DN32)

OPTIONS		
MV-VK 24 VAC-8W	1260280	changeable coil 24 Vac for the solenoid valves (sizes 1/2" - 1")
MV-VK 24 VDC-8W	1260281	changeable coil 24 Vac for the solenoid valves (sizes 1/2" - 1")
MV-VK 24 VDC-14W	1260282	changeable coil 24 Vac for the solenoid valves (sizes 1/2" - 1")

Transducers and accessories

Our wide selection of transducers and accessories helps you finalise regulation and control solutions. For example, I/O modules, dividers and transducers allow various signal type changes between Modbus, digital, analogue and 3-point signals. Transformers and electric power regulators with relay modules and solid state relays are useful for voltage supply and control load power. Our wide range of input signals and adjustable setpoints on relay modules enable applications like control fan coils, heaters and actuators.

- ▶ Useful devices for finalising building automation projects
- ▶ Galvanic isolation
- ▶ Inputs 0...10 V, 2...10 V, 0...20 mA, 4...20 mA
- ▶ Outputs 0...10 V, 2...10 V, 0...20 mA, 4...20 mA, relay

Converters

DA 6 converts 1...6 digital (contact) inputs into one analogue 0...10 V or 4...20 mA output. The state of each contact can be identified by the control system software.

Power supply	24 Vac/dc, <1 VA
Digital input	6 x potential free input
Voltage output	0...10 Vdc, 2 mA
Current output	4...20 mA, 500 Ω
IP protection class	IP20
Mounting	for 35 mm DIN rail
Product dimensions	68 x 77 x 42 mm

TYPE	ART. NO.	
DA 6	1182040	DI/AO converter

7

Converters

ISO 10 provides galvanic isolation between input and output signals and supply. Signal can also be converted, e.g. a 0...10 V signal into a 4...20 mA signal.

Power supply	24 Vac/dc, < 2 VA
Voltage input	0...1 Vdc / 0...10 Vdc / 2...10 Vdc
Voltage output	0...10 Vdc, 2 mA / 2...10 Vdc, 2 mA
Current output	0...20 mA, 500 Ω / 4...20 mA, 500 Ω
IP protection class	IP20
Ambient temperature	0...50 °C
Mounting	for 35 mm DIN rail
Product dimensions	12.5 x 90 x 112 mm

signal isolator

TYPE	ART. NO.	
ISO 10	1182060	signal isolator

Converters

PMU 3 converts a 0...10 Vdc signal into a 24 Vac 3-point control signal.

0...10 V -> 3-point control

Power supply	24 Vac, < 1 VA
Voltage input	0...10 Vdc, 1 mA
Actuator output	24 Vac, 2 A, 3-speed actuator
IP protection class	IP20
Running time	adjustable, 15...240 s
Mounting	11-pole relay housing
Product dimensions	35 x 78 x 103 mm

7

TYPE

ART. NO.

PMU 3	1182120	from 0...10 V to 3-point converter
-------	---------	------------------------------------

Converters

UMP 3 converts a 3-point control signal into a 0...10 Vdc signal.

3-point control -> 0...10 V

Power supply	24 Vac, < 1 VA
Voltage input	10...40 Vac/dc
Voltage output	0...10 Vdc, 1 mA
Output change speed	adjustable, 15...240 s
IP protection class	IP20
Mounting	11-pole relay housing
Product dimensions	35 x 78 x 103 mm

TYPE

ART. NO.

UMP 3	1182150	from 3-point to 0...10 V converter
-------	---------	------------------------------------

Converters

UV 10 is an amplifier and inverter for 0...10 V signals. UV 10 can also be used for controlling fluorescent lamps with electronic transformers.

0...10 V → 0...10 V (10...0 V)

Power supply	24 Vac/dc, < 2 VA
Voltage input	0...10 V / 2...10 V, 0.5 mA
Voltage output	0...10 V / 2...10 V / 10...0 V / 10...2 V, < 20 mA
IP protection class	IP20
Mounting	for 35 mm DIN rail
Product dimensions	23 x 77 x 42 mm

TYPE	ART. NO.	
UV 10	1182160	signal amplifier

Converters

AO 2 and AO 3 are signal converters designed for HVAC applications. The converters divide one 0...10 V signal to two (AO 2) or three (AO 3) 0...10 V signals.

0...10 V → 2 x 0...10 V / 3 x 0...10 V

Power supply	24 Vac/dc, < 0.5 VA
Voltage input	0...10 Vdc, 0.2 mA
IP protection class	IP20
Mounting	for 35 mm DIN rail
Product dimensions	23 x 77 x 41 mm

TYPE	ART. NO.	
AO 3	1182210	signal divider, 3 outputs
AO 2	1182220	signal divider, 2 outputs

Electric power regulation

BAK 64 binary step controller is designed for controlling electric heating power. It can be used with all systems with 0...10 V outputs. Relays like AR1 or RY1 are needed for contact outputs. Power steps must be in binary sequence e.g. 1, 2, 4, 8, 16, 32 kW.

Power supply	24 Vac, < 3 VA
Voltage input	0...10 Vdc or 10...0 Vdc
Voltage output	40 Vdc, 100 mA, for AR1 and RY1 relays
Step delay	adjustable, 0.7...60 s
IP protection class	IP20
Mounting	11-pole relay housing
Product dimensions	39 x 78 x 103 mm

TYPE

ART. NO.

BAK 64	1140010	binary step controller
--------	---------	------------------------

OPTIONS

AR1	1183010	relay with normally open (NO) contact, width 13 mm
RY1	1183020	relay with change-over contact, width 23 mm

Electric power regulation

STS 4 converts 0...10 V signal to one time proportional and up to 3 contact outputs. Each step must be identical in power.

Power supply	24 Vac/dc, < 1 VA
Voltage input	0...10 Vdc, 1 mA
Voltage output	3 x 35 Vdc, 100 mA, for AR1 and RY1 relays
Relay output	25 Vdc, 50 mA, for solid state relay, time proportional
Number of steps	selectable, 1...4 pcs
IP protection class	IP20
Mounting	11-pole relay housing
Product dimensions	39 x 78 x 103 mm

TYPE

ART. NO.

STS 4	1140020	electric power controller
-------	---------	---------------------------

OPTIONS

PR50/440	1140030	solid state relay 230...400 Vac, < 25 A, input 3...32 Vdc
PRMK	1140070	solid state relay control signal converter, Vac -> Vdc
AR1	1183010	relay with normally open (NO) contact, width 13 mm
RY1	1183020	relay with change-over contact, width 23 mm

Relay modules

RY1 and AR1 are relays with a 24 Vac/dc coil voltage. RYVA16 can be used for lighting control because it withstands a short-term inrush current peak.

Control signal	24 Vac/dc, 0.5 VA
Relay output	250 Vac, 10 A, res. NO
IP protection class	IP20
Mounting	on 35 mm DIN rail

coil 24 Vac/dc

TYPE	ART. NO.	
AR1	1183010	relay with normally open (NO) contact, width 13 mm
RY1	1183020	relay with change-over contact, width 23 mm
RY1-K	1183021	relay with change-over contact, width 23 mm
RYVA16	1183060	relay for fluorescent lamps, 10 A (inrush current < 80 A, < 2,5 ms)

Relay modules

RY1-U and RY1-U-K are voltage controlled relays with 0...10 V input.

Power supply	24 Vac/dc, <1 VA
Set point	adjustable, 0...10 V
Control signal	0...10 Vdc, 0.2 mA
Relay output	250 Vac, 8 A, res. Changeover
IP protection class	IP20
Mounting	on 35 mm DIN rail
Product dimensions	23 x 77 x 41 mm

input 0...10 Vdc

TYPE	ART. NO.	
RY1-U	1183040	voltage controlled relay
RY1-U-K	1183041	voltage controlled relay, socket connection at the output

Relay modules

FCRY 3 is a 3 speed fan coil control relay, with 0..10 Vdc control input.

for fan coil controls

Power supply	24 Vac/dc, <1.5 VA
Set point	adjustable, factory settings 2,5 V, 5,0 V and 7,5 V
Control signal	0..10 Vdc, 0.2 mA
Relay output	3 x 230 Vac, 8 A, res. NO (interlocked)
IP protection class	IP20
Mounting	on 35 mm DIN rail
Product dimensions	45 x 90 x 48 mm

7

TYPE

ART. NO.

FCRY 3	1183070	fan coil relay, input 0...10 Vdc
--------	---------	----------------------------------

Relay modules

RYM 8-KK is a relay module with eight relay outputs that can be controlled manually (switch in OFF or ON position) or by using control signal (switch in A position). The manual control is useful for example in commissioning and in fault situations.

Power supply	24 Vdc
Input type	24 V
Control signal	8 x 24 Vdc
Relay output	8 x 230 Vac, 4 A res. Changeover
IP protection class	IP20
Mounting	on 35 mm DIN rail
Product dimensions	136 x 90 x 65 mm

TYPE

ART. NO.

RYM 8-KK	1181110	relay module, 8 outputs, 24 Vdc control
RYM 8-KK-O	1181111	relay module, 8 outputs, 24 Vdc control

Relay modules

TH5 is a surface mounted driver that can drive several parallel connected thermal actuators.

driver for thermal actuators

Power supply	24 Vac
Control signal	5...30 Vac/dc, 10 mA
Output	5 x 24 Vac, 0.6 A, total load max. 3 A
IP protection class	IP66
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	PP plastic
Product dimensions	76 x 76 x 52 mm

7

TYPE

ART. NO.

TH 5	1183090	driver for thermal actuators, 5 outputs
------	---------	---

Set point selectors

The setpoint selector is designed to control for example temperature, humidity, lights or ventilation. The device can be mounted in a splash water proof surface mounted housing or on a flush mounting box. The selector provides a proportional 0...10 Vdc output signal that can be adjusted with internal trimmers. The selector has also off position.

Power supply	24 Vac/dc, ≤20 mA
Setpoint scale	0...100 %
Voltage output	0...10 Vdc
IP protection class	IP44/IP54, Flush mounting IP44, surface mounting IP54
Ambient temperature	0...40 °C
Ambient humidity	0...95 %rH
Mounting	On a flush mounting box or surface mounting
Product dimensions	82 x 82 x 65 mm

TYPE

ART. NO.

LC-P24-P	1182250	set point selector, scale 0...100 %
----------	---------	-------------------------------------

Transformers

JY is a switch mode power supply converting a 24 Vac/dc supply into a lower DC voltage supply. Electronic protection for overloading.

24 Vac/dc → 3.6...24 Vdc

Voltage input	24 Vac/dc, < 30 VA
Voltage output	3.6...24 Vdc, 1A (0...12 V); 0.5 A (12...24 V)
IP protection class	IP20
Mounting	on 35 mm DIN rail
Product dimensions	45 x 90 x 58 mm

7

TYPE

ART. NO.

JY	1184020	AC/DC to DC transformer
----	---------	-------------------------

Transformers

M230/24-15 transforms 230 Vac supply to 12/24 Vac supply.

230 Vac → 12/24 Vac, 15 VA

Voltage input	230 Vac, < 15 VA
Voltage output	24 Vac, 15 VA, / 12 Vac, 7.5 VA
IP protection class	IP20
Ambient temperature	0...40 °C
Mounting	on 35 mm DIN rail
Product dimensions	35 x 87 x 60 mm

Transformers

M230/24-30 transforms 230 Vac supply to 12/24 Vac supply.

230 Vac -> 12/24 Vac, 30 VA

Voltage input	230 Vac, < 30 VA
Voltage output	24 Vac, 30 VA, /12 Vac, 15 VA
IP protection class	IP20
Ambient temperature	0...40 °C
Mounting	on 35 mm DIN rail
Product dimensions	54 x 87 x 60 mm

TYPE	ART. NO.	
M230/24-30	1184050	transformer

7

Transformers

T20 transforms 230 Vac supply to 24 Vac supply.

230 Vac -> 24 Vac

Voltage input	230 Vac, < 20 VA
Voltage output	24 Vac, 20 VA
IP protection class	IP33
Ambient temperature	0...40 °C
Cable	3 m, AMP connector (cable delivered with the transformer)
Product dimensions	61 x 85 x 50 mm

TYPE	ART. NO.	
T20	1184100	transformer

Transformers

T35 transforms 230 Vac supply to 24 Vac supply.

230 Vac -> 24 Vac

Voltage input	230 Vac, < 35 VA
Voltage output	24 Vac, 35 VA
IP protection class	IP44
Ambient temperature	0...40 °C
Mounting	with screws
Cable	300 mm on both sides
Product dimensions	63x103x55 mm

7

TYPE	ART. NO.	
T35	1184111	transformer

Transformers

T40 transforms 230 Vac supply to 24 Vac supply.

230 Vac -> 24 Vac

Voltage input	230 Vac, < 38 VA
Voltage output	24 Vac, 38 VA
IP protection class	IP54
Ambient temperature	0...40 °C
Mounting	with screws
Product dimensions	77x123x70 mm

TYPE	ART. NO.	
T40	1184120	transformer

Transformers

T60 transforms 230 Vac supply to 24 Vac supply.

230 Vac -> 24 Vac

Voltage input	230 Vac, < 60 VA
Voltage output	24 Vac, 60 VA
IP protection class	IP54
Ambient temperature	0...40 °C
Mounting	with screws
Product dimensions	77x123x70 mm

TYPE	ART. NO.	
T60	1184130	transformer

7

Transformers

T120 transforms 230 Vac supply to 24 Vac supply.

230 Vac -> 24 Vac

Voltage input	230 Vac, < 120 VA
Voltage output	24 Vac, 120 VA
IP protection class	IP54
Ambient temperature	0...40 °C
Mounting	with screws
Product dimensions	89x174x92 mm

TYPE	ART. NO.	
T120	1184140	transformer

Transformers

T220 transforms 230 Vac supply to 24 Vac supply.

230 Vac → 24 Vac

Voltage input	230 Vac, < 220 VA
Voltage output	24 Vac, 220 VA
IP protection class	IP54
Ambient temperature	0...40 °C
Mounting	with screws
Product dimensions	104 x 168 x 105 mm

Timers

ETT electronic timers are designed for energy saving and boosting functions in ventilation and lighting applications. The timer functions can be used for example in offices, if enhanced ventilation is needed outside the normal working hours.

Power supply	24 Vac/dc (22...26 V) or 230 Vac (207...253 V)
Timer accuracy	±10 s/h
Relay output	250 Vac, 10 A Changeover
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	5...95 %rH
Mounting	on the wall surface or on a flush mounting box (60 mm hole distance)
Materials	PC plastic
Product dimensions	97 × 97 × 27 mm

7

TYPE	ART. NO.	
ETT1B	560011B000	electronic timer, black, 10...60 min
ETT1	560011W000	electronic timer, white, 10...60 min
ETT6B	560012B000	electronic timer, black, 1...6 h
ETT6	560012W000	electronic timer, white, 1...6 h
ETT12B	560013B000	electronic timer, black, 2...12 h
ETT12	560013W000	electronic timer, white, 2...12 h

Timers

LAP timers are designed for extending plant operating hours by pushing a button. The selected time is indicated by an indicator light.

Power supply	24 Vac/dc or 230 Vac, 2 VA
Timer accuracy	±10 s/h
Relay output	250 Vac, 8 A, res. Changeover
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...85 %rH
Mounting	flush (surface mounting casing optional)
Product dimensions	85 x 85 x 30 mm

TYPE

ART. NO.

LAP 1E	1185110	12...60 minutes (max. time can be restricted to 12...36 minutes)

I/O modules

MIO 12 I/O modules can read analogue and/or digital inputs, and control thermal or 3-point actuators and also 0...10 V analogue outputs. The module has RS-485 connection for Modbus RTU communication.

Power supply	24 Vac, < 2 VA
Voltage output	4 x 0...10 Vdc, 2 mA
Triac output	4 x 24 Vac, 1 A, for thermal actuators or two 3-point actuators
IP protection class	IP20
Ambient temperature	5...40 °C
Mounting	on 35 mm DIN rail
Product dimensions	53 x 90 x 58 mm

TYPE	ART. NO.	
MIO 12-PT	1181300	Modbus I/O, 4 analogue inputs (Pt1000) or potential free digital inputs
MIO 12-V	1181310	Modbus I/O, 4 analogue inputs (0...10 V) or potential free digital inputs
MIO 12-NILG	1181320	Modbus I/O, 4 analogue inputs (Ni1000-LG) or potential free digital inputs

I/O modules

DIO4-BAC-DIN is designed to be a compact DIN-rail mounted BACnet MS/TP input and output module. The module has two potential free contact inputs and two digital outputs (24 Vac triac).

Power supply	24 Vac, < 2 VA
Digital input	2 x potential free contact, impedance <1 kΩ. Pulse counting: max 25 Hz, min pulse length 20 ms (volatile)
Triac output	2 x 24 Vac, 1 A
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on 35 mm DIN rail
Materials	ABS plastic, self extinguishing
Product dimensions	106 x 97 x 38 mm

TYPE

ART. NO.

DIO4-BAC-DIN	6011A00000	BACnet I/O module, 2DI, 2DO
--------------	------------	-----------------------------

I/O modules

IO10-BAC-DIN is designed to be compact DIN-rail mounted BACnet MS/TP input and output module. The module has two potential free contact inputs, two resistive inputs, two digital outputs and four analogue outputs. The resistive inputs can also operate as potential free contact inputs.

Power supply	24 Vac, < 2 VA
Digital input	2 x potential free input
Resistive input	2 x NTC10 / resistive / potential free digital input
Voltage output	4 x 0...10 Vdc, 5 mA
Triac output	2 x 24 Vac, 1 A
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on 35 mm DIN rail
Materials	ABS plastic, self extinguishing
Product dimensions	106 x 97 x 38 mm

TYPE

ART. NO.

IO10-BAC-DIN	6011B00000	BACnet I/O module, 2RI/DI, 2DI, 2DO, 4AO
--------------	------------	--

I/O modules

IO10-BAC-DIN-AI is designed to be compact DIN-rail mounted BACnet MS/TP input and output module. The module has two analogue inputs, two potential free contact inputs, two digital outputs and four analogue outputs.

Power supply	24 Vac, < 2 VA
Voltage input	2 x 0...10 Vdc
Digital input	2 x potential free input
Voltage output	4 x 0...10 Vdc, 5 mA
Triac output	2 x 24 Vac, 1 A
IP protection class	IP20
Ambient temperature	0...50 °C
Ambient humidity	0...95 %rH
Mounting	on 35 mm DIN rail
Materials	ABS plastic, self extinguishing
Product dimensions	106 x 97 x 38 mm

TYPE	ART. NO.	
IO10-BAC-DIN-AI	6011C00000	BACnet I/O module, 2AI, 2DI, 2DO, 4AO

Casings

KO IVS and VP-PROX are protective casings for room products in spaces like sports halls. Casing is transparent and with a lock.

Ambient temperature	0...50 °C
Mounting	with screws (included)
Materials	PC plastic
Product dimensions	136 x 136 x 40 mm

TYPE	ART. NO.	
VP-PROX	9000460	protective casing for Proxima room products
KO IVS	KO5239	protective casing for room products

Casings

WS-1 weather shield is designed to protect Produal's outdoor products from sun, rain and snow.

Materials	stainless steel, AISI 304 (1.4301)
Product dimensions	171x170 x 80 mm

TYPE

ART. NO.

WS-1	9000520	weather shield
------	---------	----------------

Table stand

A table stand for Produal's room products. Fixing screws (2 pcs) are included in the delivery.

Materials	stainless steel
Product dimensions	78 x 90 x 52 mm

TYPE

ART. NO.

TMS	9000480	table stand for room products
-----	---------	-------------------------------

The background of the entire page is a blue gradient, transitioning from a darker blue at the top to a lighter blue and then a greenish-blue at the bottom. On the left side, there is a series of white, curved, parallel lines that originate from the top left and curve downwards and to the right, creating a sense of depth and movement.

HK Instruments

HK Instruments products complementing Produal portfolio

HK Instruments' highly accurate and easy-to-use measuring devices now complement Produal portfolio, primarily for HVAC applications in ventilation and building automation systems.

Air handling unit applications: traditional and Modbus

Air handling units are used in nearly all new and renovated buildings to ensure high-quality indoor air. In addition to providing clean indoor air, our easy-to-use devices improve cost-efficiency and enable effortless installation and monitoring of air handling units.

Roof extraction unit application

In apartment buildings, roof extraction units are often necessary to ensure clean, high-quality indoor air. Ventilation in apartment buildings is often set at a default level, even though the load varies. This results in a significant loss of energy. Ventilation applications in apartment buildings are easy to implement by using our measurement devices. Our cost-efficient solutions do not necessarily need to be supported by an expensive building automation system.

In comparison with analogue devices, modern Modbus devices require less wiring, which reduces the cost of cabling work. DPT-Dual-MOD-AHU is especially designed for air handling units, combining two differential pressure transmitters into one device, allowing the measurement of pressure from two different points. One of the measurements can be set to show the air flow rate. DPT-Dual-MOD-AHU has a Modbus interface and an input terminal. When using the input terminal, temperature transmitters can be replaced with temperature sensors. As a result, you save on equipment and installation costs.

Commercial building solutions

We produce user-friendly measurement devices for indoor and outdoor facilities. Passive outdoor temperature and light sensors are reliable in use and reduce the need for cabling. These sensors predict the need for heating in a building and control outdoor lighting sensibly and energy-efficiently. Liquid pressure transmitters can be used to monitor heating and cooling systems, as well as detecting any leaks and preventing water damage. Surveillance of differential pressure across the building envelope takes care of the health of the building and prevents serious structural problems.

Differential pressure transmitters

DPT series pressure transmitters are accurate and user-friendly devices with a stylish and modern design. Fully automated zero point calibration, AZ-calibration, offers reliability in the most sensitive applications. In addition, the AZ-calibration provides cost savings over the lifetime of a building, as it makes the device completely maintenance-free.

The excellent usability of DPT-R8 series is widely known among electricians and installers all over the world. DPT-Priima is designed especially for high-accuracy applications and is also available as a Modbus version, DPT-Priima-MOD, that includes air flow measurement. DPT-MOD and DPT-IO-MOD series Modbus transmitters can be connected on serial lines and therefore require less wiring than traditional transmitters. Modbus communication is a modern and distortion-free way to transmit measurement data.

The DPT-Dual-MOD with Modbus communication offers savings in device and installation costs due to its two pressure sensors and an input terminal. DPT-Dual-MOD-AHU is designed especially for air handling units, allowing the measurement of pressure from two different points, and one of the measurements can be set to show the air flow rate.

Differential pressure transmitters

three-wire

The DPT-R8 series includes electronic differential pressure transmitters that offer exceptional performance, high quality and competitive pricing. Because of the high accuracy of the devices, it is usually not necessary to narrow down the range to get accurate measurements. DPT-R8 devices are easily customizable, and also available for private labeling.

Usage & applications

The differential pressure transmitter is used for measuring low pressures of air and non-combustible gases in order to monitor and control building automation, HVAC and cleanroom systems.

8

Accuracy, from applied pressure (models 250 and 2500)	Pressure < 125 Pa = 1 % + ± 2 Pa Pressure > 125 Pa = 1 % + ± 1 Pa
Accuracy, from applied pressure (model 7000)	Pressure < 125 Pa = 1.5 % + ± 2 Pa Pressure > 125 Pa = 1.5 % + ± 1 Pa
Zero point calibration	automatic with autozero element (-AZ) or by pushbutton

Differential pressure transmitters

DPT-Priima-MOD is a multifunctional high accuracy differential pressure transmitter with Modbus communication and air flow measurement. It is designed for cleanrooms and other demanding applications. DPT-Priima-MOD has a new, extremely accurate sensor and automatic zero point calibration, and optional calibration certificate.

Usage & applications

The DPT-Priima-MOD is used for measuring differential pressure and air flow in building automation, HVAC and cleanroom systems. It can also be used with several different measurement probes such as FloXact™ or pitot tube, and air dampers. The most common applications are pressure monitoring in cleanrooms and over the building envelope.

high accuracy, Modbus

Differential pressure transmitters

air flow measurement, Modbus

DPT-MOD is a multifunctional transmitter for measuring volume flow, velocity, and static and differential pressure. The measurements can be read and the configuration done via Modbus communication. DPT-MOD requires less wiring than the traditional 3-wire transmitters because multiple devices can be connected on serial line.

Usage & applications

The DPT-MOD is used for measuring air flow or low pressures of air and non-combustible gases in order to monitor and control building automation, HVAC and cleanroom systems. It can also be used with several different measurement probes such as FloXact™ or pitot tube, and air dampers.

Communication	RS-485 Modbus (RTU)
Accuracy, from applied pressure (model 2500)	Pressure < 125 Pa = 1 % + ±2 Pa Pressure > 125 Pa = 1 % + ±1 Pa
Accuracy, from applied pressure (model 7000)	Pressure < 125 Pa = 1.5 % + ±2 Pa Pressure > 125 Pa = 1.5 % + ±1 Pa
Zero point calibration	automatic with autozero element (-AZ), by pushbutton or via Modbus
Measuring units	Pressure: Pa, kPa, mbar, inchWC, mmWC, psi Flow: m³/s, m³/h, cfm, l/s, m/s, ft/min
Supply voltage	24 VAC ±10 % / 24 VDC ±10 %

Differential pressure transmitters

DPT-IO-MOD differential pressure transmitter for air is designed for Modbus (RTU) communication network. The DPT-IO-MOD has an input terminal that turns it into a multifeatured transmitter. When using the input terminal, temperature transmitters can be replaced with temperature sensors. Very precise pressure sensor and easily operated interface make the device reliable and user-friendly.

Usage & applications

The DPT-IO-MOD is used for measuring low pressures of air and non-combustible gases in order to monitor and control building automation, HVAC and cleanroom systems.

Differential pressure transmitters

for cleanroom monitoring

DPT-CR-MOD is a differential pressure transmitter designed specially for cleanroom monitoring. In addition to differential pressure, the device enables monitoring temperature and relative humidity. A 0...10 V voltage input of an external humidity and temperature transmitter (for example Siro-rH-T) can be connected to the input terminal of the device. In this case, all three measured values (differential pressure, relative humidity, temperature) can be shown simultaneously on the display. Alternatively, a passive temperature sensor can be connected to the input terminal. DPT-CR-MOD is compatible with Modbus serial communication protocol.

Usage & applications

DPT-CR-MOD is used for monitoring and controlling differential pressure, relative humidity and temperature in cleanrooms.

Model	DPT	-CR-MOD	-D With display
			-D

DPT-CR-MOD measures the pressure difference between the cleanroom and the anteroom and sends the information to the automation system via Modbus to maintain optimal conditions in the cleanroom. DPT-CR-MOD is connected to the Siro indoor air quality transmitter that measures relative humidity and temperature. Siro sends the information to DPT-CR-MOD that shows it on its display, together with differential pressure measurement.

Differential pressure transmitters

two pressure sensors, Modbus

DPT-Dual-MOD combines two differential pressure transmitters into one device. It offers a possibility to measure pressure from two different points. DPT-Dual-MOD has a Modbus interface and an input terminal. When using the input terminal, temperature transmitters can be replaced with temperature sensors. As a result, you will save in costs of the devices and in the installation costs.

Usage & applications

DPT-Dual-MOD can be used in all applications where you need to measure two different pressures. The devices are suitable for air and non-combustible gases.

Differential pressure transmitters

for air handling units

DPT-Dual-MOD-AHU is especially designed for air handling units, combining two differential pressure transmitters into one device. It offers a possibility to measure pressure from two different points. One of the measurements can be set to show the air flow rate. DPT-Dual-MOD-AHU has a Modbus interface and an input terminal. When using the input terminal, temperature transmitters can be replaced with temperature sensors. As a result, you will save in costs of the devices and in the installation costs.

Usage & applications

DPT-Dual-MOD-AHU is designed for air handling units where one sensor monitors the air flow across the centrifugal fan while the other sensor monitors the filter cleanliness. The devices are suitable for air and non-combustible gases.

Communication	RS-485 Modbus (RTU)
Accuracy, from applied pressure	Sensor A (-700...7000 Pa): Pressure < 125 Pa = 1.5 % + ±2 Pa Pressure > 125 Pa = 1.5 % + ±1 Pa Sensor B (-250...2500 Pa): Pressure < 125 Pa = 1 % + ±2 Pa Pressure > 125 Pa = 1 % + ±1 Pa
Zero point calibration	by pushbutton or via Modbus
Measuring units	Pressure: Pa, kPa, mbar, inchWC, mmWC, psi Flow: m³/s, m³/h, cfm, l/s, m/s, ft/min

DPT-Dual-MOD-AHU transmitters can be used to measure four different types of data, for example air flow, filter condition, heating coil and air temperature.

Differential pressure transmitters

DPT-Dual series differential pressure transmitters are engineered for building automation in the HVAC/R industry. DPT-Dual is a technologically advanced transmitter measuring static and differential pressure from two different points, with field selectable units, range and output, all in a single device.

Usage & applications

The differential pressure transmitter is used for measuring low pressures of air and non-combustible gases in order to monitor and control building automation and HVAC systems.

Accuracy, from applied pressure (model 2500)	Pressure < 125 Pa = 1 % + ±2 Pa Pressure > 125 Pa = 1 % + ±1 Pa
Accuracy, from applied pressure (model 7000)	Pressure < 125 Pa = 1.5 % + ±2 Pa Pressure > 125 Pa = 1.5 % + ±1 Pa
Zero point calibration	by pushbutton
Measuring units	Pa, kPa, mbar, inchWC, mmWC, psi
Supply voltage	24 VDC ±10 % / 24 VAC ±10 %
Power consumption	< 1.0 W
Output signals (3-wire)	2 x 0...10 VDC or 2 x 0...5 VDC (selectable by jumper)
Operating temperature	-20...+50 °C
Response time	0.8 / 4 s
Protection standard	IP54

Air flow and velocity transmitters

DPT-Flow transmitters are unique devices that make measuring air flow easier than ever before. In conjunction with FloXact™ measurement probes, these devices are the right option when measuring flow in a duct.

AVT is our solution for measuring air velocity, offering multiple measuring ranges in a single device together with relay and temperature output signals. DPT-Flow-Batt is an on-site display for air flow or differential pressure designed for environments where electricity is not available.

Air flow and velocity transmitters

air flow

DPT-Flow is a flow transmitter that provides an easy way to measure the flow rate on centrifugal fans or in a duct system. One device is suitable for a range of fan types. It can also be used with several different measurement probes such as FloXact™ or pitot tube, and air dampers.

Usage & applications

The DPT-Flow can be used to measure the air flow on centrifugal fans or as a transmitter to regulate the air flow in a duct or on the selected fan or blower. It can also be used in a duct system or in air-handling units as an on-site display for flow. The DPT-Flow is an ideal instrument for air flow monitoring and control, and fan and blower control.

Air flow and velocity transmitters

The FloXact™ probe is a differential air pressure device designed to measure air volume flow in a duct. It includes multiple sensing points to measure total and static pressures. The FloXact™ probe incorporates a unique design to amplify the differential pressure by 2.5 times for accurate measurement of lower air velocities down to 1.0 m/s (200 fpm). It is easy to install and cost-effective.

measuring probe

Design features

- ▶ Multiple sensing points for greater accuracy
- ▶ 2 % accuracy
- ▶ 2.5 X signal amplification
- ▶ Easy installation
- ▶ Accepts 1/4" OD tubing
- ▶ Chamfered sensing points for consistent readings.

Pressure and flow controllers

The DPT-Ctrl series PID controllers are engineered for stand-alone building automation in the HVAC/R industry. With the built-in controller, you can control the constant pressure or flow of fans, VAV systems and dampers. The DPT-Ctrl series offers various models for energy-efficient control of modern EC fans in all sizes of systems.

The DPT-Ctrl-MOD can be used as a pressure or flow controller in modular building automation systems. Setpoints and other parameters can be adjusted remotely via bus. With the temperature compensation feature, the fan speed can be adjusted according to temperature, saving energy by exhausting the right amount of air in cold environments.

DPT-Ctrl can be used to control air flow or constant pressure in applications where it is important to keep a constant vacuum or a steady air flow, such as vacuuming units in renovation sites that keep a constant negative pressure so that impurities do not spread to other spaces.

Accuracy, from applied pressure (model 2500)	Pressure < 125 Pa = 1 % + ±2 Pa Pressure > 125 Pa = 1 % + ±1 Pa
Accuracy, from applied pressure (model 7000)	Pressure < 125 Pa = 1.5 % + ±2 Pa Pressure > 125 Pa = 1.5 % + ±1 Pa

200

Pressure and flow controllers

Modbus

The DPT-Ctrl-MOD controller is engineered for building automation in the HVAC industry. With the built-in controller of the DPT-Ctrl-MOD it is possible to control the constant pressure or flow of fans, VAV systems or dampers. When controlling air flow, it is possible to select a fan manufacturer or a common measuring probe that has a K-value. Modbus communication enables remote adjustment of the setpoint and other parameters, so it can be used as a part of building management systems (BMS).

Usage & applications

DPT-Ctrl-MOD is designed to be used in buildings with a BMS to control air flow or constant pressure of an individual zone. A building operator can easily monitor and adjust the parameters via Modbus. The outdoor temperature compensation feature brings energy savings in cold areas automatically by decreasing extract air flow rates to preserve warm air.

DPG3K	0-3 kPa
DPG5K	0-5 kPa

Flush mounting option (-F) available for all models.

Liquid column manometers

Reliable inclined column manometer with leakage protection system.

MM±100500 delivered with level bubble. Optional level bubble is available to MM200600 on request.

Measuring range MM±100500	-100...100...500 Pa
------------------------------	---------------------

Accuracy MM±100500	2 Pa/25 Pa
-----------------------	------------

Measuring range MM200600	0...200...600 Pa
-----------------------------	------------------

Accuracy MM200600	5 Pa/25 Pa
----------------------	------------

8

Liquid column manometers

Traditional U-tube manometer with easy zero point calibration.

Measuring range MMU±500	±500 Pa
----------------------------	---------

Accuracy MMU±500	10 Pa
---------------------	-------

Air pressure gauges & manometers

YM-3 is an overpressure meter for civil defence and military shelters. It is designed and tested to withstand strong blast loadings exerted on the meter through its connection pipe. YM-3 is type-tested and approved by the Technical Research Centre of Finland / VTT that performs type inspecting mandated by the Finnish Ministry of the Interior.

Usage & applications

Measures and monitors overpressure in civil defence and military shelters.

Accuracy (MM±100500)	-100...100 Pa ±5 Pa 100...500 Pa ±25 Pa
Overpressure	Static pressure -20...300 kPa
Measurement ranges	-100...100...500 Pa
Safety	Withstands rapid change in velocity 2.5 m/s, 30 g Withstands vibration with acceleration of 2.5 m/s, 30 g Protected against blast shock and static pressure loads Certificate VTT-C-12329-18 granted by VTT / Technical Research Centre of Finland

Pressure switches

PS is a robust, easy-to-use differential pressure switch for air and non-combustible gases.

Usage

The pressure switches are used in ventilation and air-conditioning systems to monitor changes in overpressure, vacuum and differential pressure.

Applications

- ▶ monitoring filters and fans
- ▶ monitoring vacuum and overpressure in air ducts
- ▶ controlling defrosting functions

Accuracy of switching point (low limit typ.)	±8 Pa (PS1500: ±20 Pa, PS4500: ±100 Pa)
Accuracy of switching point (high limit typ.)	±15 %
Service life	over 1 000 000 switching operations
Electrical rating (resistive load)	3 A / 250 VAC (PS200: 0.1 A / 250 VAC)
Electrical rating (inductive load)	2 A / 250 VAC (PS200: --)
Operating temperature	-20...+60 °C
Protection standard	IP54

Product	Measuring range
PS200	20...200 Pa
PS300	30...300 Pa
PS500	30...500 Pa
PS600	40...600 Pa
PS1500	100...1500 Pa
PS4500	500...4500 Pa

Filter alerts

Inclined tube manometer and pressure switch combination (MM/PS).

Micromanometer

PHM-V1 micromanometer is a handheld instrument for measuring air pressure and air flow. Its patented technology includes over 1000 preprogrammed ventilation valve and diffuser K-factor databases. This feature allows measuring without manual calculations or knowing the manufacturer's K-factors. Over 500 measuring results can be saved and then downloaded to PHM-V1 Manager computer software for documentations.

Applications

- ▶ Air flow and pressure measurements from air diffusers, ventilation valves, dampers and grilles
- ▶ Measuring room-to-room pressures or across the building envelope
- ▶ In-duct measurements with pitot tube
- ▶ Measuring pressure drop across the filter
- ▶ Fan flow measurement
- ▶ Cleanroom air flow measurements

Preprogrammed valve manufacturers include for example:

- ▶ EH-Muovi
- ▶ Fläkt Woods
- ▶ Halton
- ▶ Lindab
- ▶ Climecon
- ▶ Swegon
- ▶ Uponor

Can be used with pitot tube.

Range	-250...2550 Pa
Maximum overpressure	30 kPa
Accuracy	± 1.4 % from applied pressure
USB	Mini B
Units on display	Pressure: Pa, mmH ₂ O, inchWC, mbar Flow: l/s, m ³ /h, m ³ /s
Output signal	via Modbus
Operating temperature	-10 ... +50 °C

Commissioning tools for easy and quick configurations

MyProdual application

Available on Android and iOS, the completely redesigned MyProdual app provides more possibilities than ever to manage and control our next-generation RTX and RT-CO2 room transmitters. The app's visualised device management gives a clear understanding and makes building even the most complex setups effortless.

MyTool application

Android application for commissioning and configuring second-generation Produal products, providing ease of use and a unified user experience on your mobile phone or tablet

- ▶ Firmware updates
- ▶ Easy and fast configuration
- ▶ Test installations
- ▶ Save configurations
- ▶ Wireless network installation

ML-SER

Easy and quick tool for commissioning on the field

Configuration tool for Produal first-generation transmitters

- ▶ Easy to configure the settings or execute a one-point field calibration when required
- ▶ Configuration of one device at a time
 - Activation of built-in controller option
 - Modbus addressing
 - Factory settings restore

Examples:

1 Easy configuration of the controller functions for the CO₂ room transmitter

2 Easy tuning of the duct sensor's temperature measurement

3 Easy configuration of the differential pressure transmitter's user selectable measurement and output ranges

See the transmitter selection guide (page 52)

Other useful configuration tools

- ▶ Configuration cable SW-DCT-USB for backup and replication of TRC room controllers (pages 22–27), TRT smart thermostats (page 32), TRI room units (page 44), RRH-BAC (page 69) and RCD-BAC (page 79) transmitters, and RTE temperature transmitters (page 140).
- ▶ Configuration tools for HLS temperature controllers: HLS 44-SE-SER (page 28), HLS 44-SER (page 28), HLS 44-CO2-SER (page 28), HLS 44-3P-SER (page 28), HLS 45-SER (page 28).
- ▶ Configuration tool Siro-CT for Siro transmitters (page 83).

We manage the invisible. Together.

Produal develops and produces user-friendly measurement and control devices for building automation and the HVAC industry. We make invisible changes measurable and visible, doing our part to develop intelligent and sustainable buildings with our customers.
