

Technical Heating Platform

Who We Are

“THP” is a well experienced engineering company in the heating industry.

We are engineers, designers technical specialist, planners, consultants for your demands with over 20 years of experience in engineering.

“THP LTD” combines technical knowledge and commercial awareness to bring added value to our clients.

What We Do

We are able to provide our clients with a comprehensive range of services in ;

Produce Finished or Semi-Finished Customised Products

Product Design

Part Procurement

Production Line Consulting

Project Management

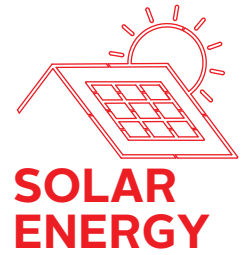

Factory Located in Çanakkale, TÜRKİYE

About Us

With an experienced, professional engineering and production.

We define ourself as an “all in one product service” offering customised product from idea to serial production;

- Design assistance
- Rapid prototyping,
- Engineering,
- Project management,
- Expertise and flexible business approaches.

Carbon Neutral Factory

We are very proud to be carbon neutral already in July 2023, ahead of our target and ahead of the aspirations as set out in the Paris Agreement.

We want this journey to be one that leaves a mark, but not a carbon footprint.

250 kwp On-Grid Roof Top Solar System

Products

Biomass Boilers

Wood Pellet Boilers

- 22 / 35 kW
- Pellet Burners 22 / 35 kW
- Self assembly Pellet Storage Tanks
- Re-Cycling Kits

Wood Log Boiler

- 28 kW
- Compact and Easy Assembly
- Buffer Tank Management

Dual Fuel Wood Log or Pellet

- 35 kW
- Dual Fuel Boiler
- Lambda Probe Management

Heat Pump Back-Up Units

HPB – SOLO / Between Heat Pump and Installations

- 6 or 9 kW Heater
- CH & DHW Lines
- 55 Liter Quadratic Buffer Tank
- Magnetic Filter
- All Components in One Body, 3 Way Valve, Pumps, Piping etc.
- Reduce Installation Costs
- Prevent Piping Installations Faults
- Easy and Fast Installations
- Save Space

Products

HPB – HYBRID / Between Heat Pump + Biomass Boiler and Installations

- 6 or 9 kW Heater
- Biomass Recycling Line & CH Line
- 55 Liter Circular Buffer Tank
- Magnetic Filter
- All Components in One Body, 3 Way Valve, Pumps, Piping etc.
- Reduce Installation Costs
- Prevent Piping Installations Faults
- Easy and Fast Installations
- Save Space

HPB – IDU / Between Heat Pump and Installations + DHW Tank Included

- 6 or 9 kW Heater
- 170 Lt Stainless Steel Tank & CH Line
- 55 Liter Quadratic Buffer Tank
- All Components in One Body, Particle Filter, 3 Way Valve, Pumps, Piping etc.
- Reduce Installation Costs
- Prevent Piping Installations Faults
- Easy and Fast Installations
- Save Space

Finished or Semi-Finished Customised Product

Environmentally friendly biomass boilers and their components can be designed and produced by us in our production branch. We provide your installation components according to your demand as customised.

Hydraulic Set

Pellet Burner

Pellet Boiler Complete Set

Pellet Storage (Self Assembly)

Pellet Boiler

Product Design

From concept to serial production all stages of the process.

Biomass Boiler

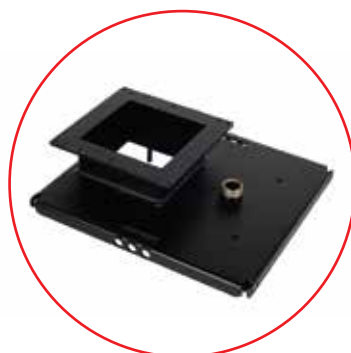

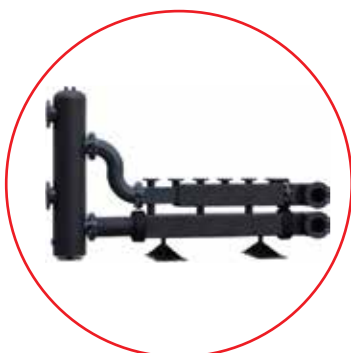

Customised Welded Parts

Metal Parts or Spare for Boilers

Metal Parts for Pellet Burners

Metal Parts for Pipe Sets Manifolds, Flue Gas Parts

Part Procurement

Many kinds of heating system components with various international delivery possibilities

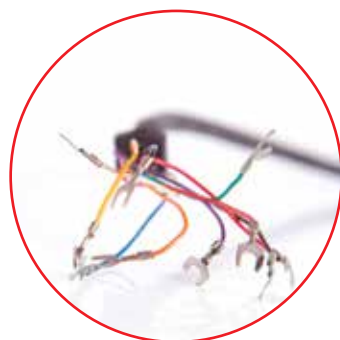

Flue Systems

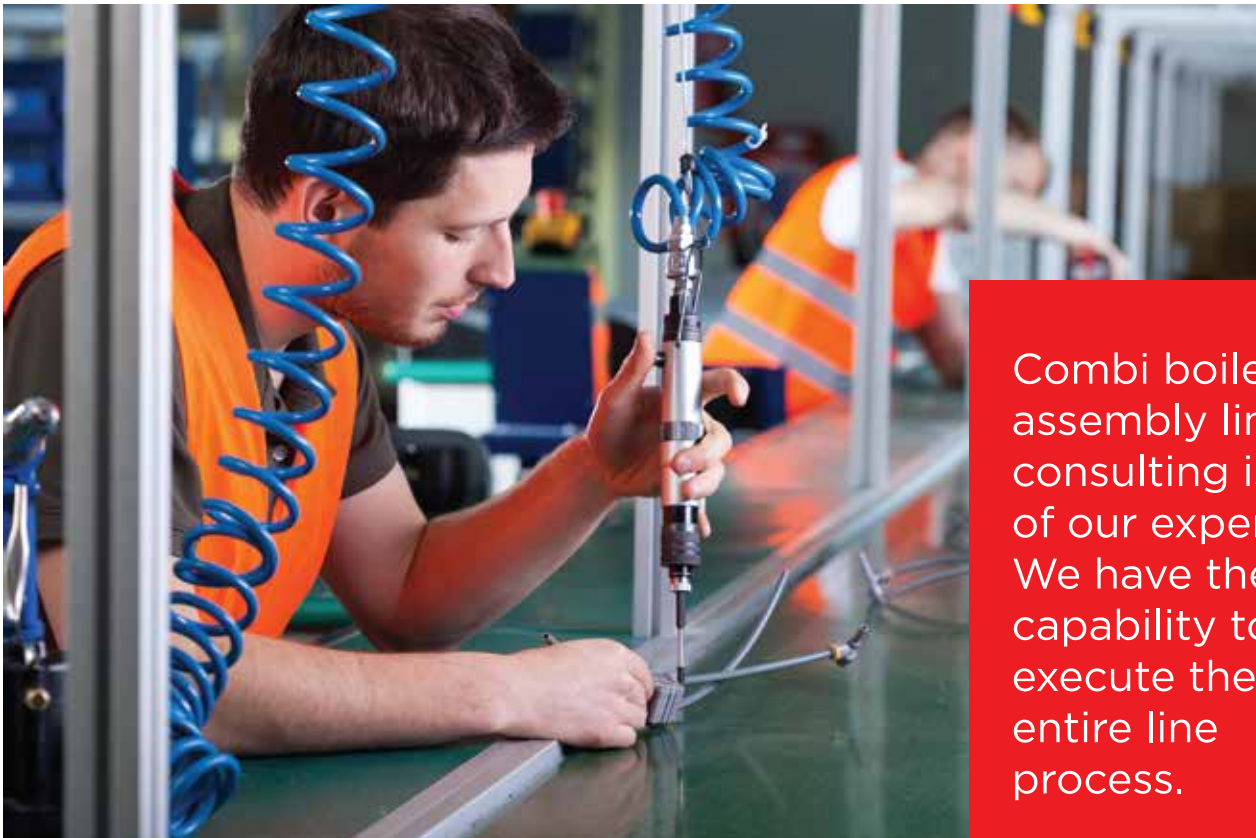

Brass Parts

Electrical Cable Sets and Parts

Production Line Consulting

Combi boiler assembly line consulting is one of our expertise. We have the capability to execute the entire line process.

Production Line

Fiber Laser Cutting Machine

Metal Sheet Bending

CNC Router

Welding Shop

Laser / TIG Welding

Assembly Shop

Technical Heating Platform

A Customised Service & Solutions With Global Reach
