INNOVATIVE | RELIABLE | EFFICIENT

50 YEARS OF HEATING

For 50 years, Warmflow has created innovative, award-winning heating products for homes in Northern Ireland and Great Britain.

All Warmflow products are made at our state of the art manufacturing facility in Lisburn, Northern Ireland. Our extensive range of home heating products offer value for money, fuel efficiency, ease of installation and top class customer care.

Our comprehensive product portfolio includes the UK's only AA rated boiler, a choice of highly efficient, intelligent renewable products and a selection of cylinders which will satisfy the needs of the most demanding households.

At Warmflow we pride ourselves on leading the way in innovation, working with customers to ensure that:

- we manufacture products which are easy to install and service
- our products are made using only the highest quality materials
- they deliver the highest available efficiency levels and cost savings.

Our products have been independently tested and accredited. Our range of appliances exceed the minimum ErP efficiency requirements and comply with Document L1A, L1B (England & Wales), The Building Standards (Scotland) Regulations Section 6, Approved Document Part F (Northern Ireland) and with the HARP efficiency requirements for Part L (Republic of Ireland).

Agentis

OIL BOILERS

Our outstanding selection of high efficiency, internal and external oil-fired boilers - including the UK's only AA-rated oil boiler - will keep your customers and their loved ones warm and cosy during the chilly months ahead.

★ Trustpilot

I have been fitting warmflow boilers for several years and can not fault them one bit. Competitive price and a high quality build. The warmflow team could not be more helpful unlike competitors. Nice as an installer to have regular contact and professional development with a team determined to make the installation of an oil fired boiler as easy and painless for both installer and consumer. Highly recommended.

High Efficiency Oil Boiler

BOILERHOUSE OIL BOILERS

The Boilerhouse range has been specifically designed for boiler house and garage applications and is suitable for indoor installation.

Its blue casing houses a highly efficient heat exchanger that can be easily accessed for servicing. The latest in Riello low NOx burner technology makes the Boilerhouse range quiet in operation and the perfect choice in oil-fired boilers.

All Boilerhouse models are fully factory wired with burner and thermostat and are supplied with a factory-fitted condensate trap as standard. The appliance has flow and return connections off the top for ease of plumbing.

Range of outputs from 15 – 33kW

GOOD TO KNOW

The Boilerhouse Boilers are supplied with a pre-wired, factory-fitted burner and thermostat. Only one IE320 mains socket (supplied) needs to be wired on site.

AN ENVIRONMENTAL INVESTMENT

Designed to be environmentally friendly, Warmflow boilers are highly efficient in operation and are ErP A-rated.

★ Trustpilot

All boilers are compatible with biofuel however they must be commissioned on site and the flexible fuel line(s), nozzle and fuel filter replaced. Please contact Warmflow for further details.

FLUE & PLUME MANAGEMENT KITS

Warmflow’s Easy-Fit, plastic flue systems have been specifically designed for use on high efficiency, condensing oil boilers.

With the Warmflow Agentis range, you don't need to carry different flue systems for different jobs - with us, one flue will fit all our boilers. Additional benefits include the locking clamp arrangement which offers superior rigidity and security compared with traditional push-fit flues. Since the flue system is plastic all extension and terminal sections can be easily cut to length as required.

All flue kits include:

- Boiler adapter and starter piece
- End terminal
- Flue fittings kit
- Thermal guard (FBF)
- 1000mm extension (HBF)
- 87° bend (HBF)

Horizontal Flue Kit (FBF)

Vertical Flue Kit (VBF)

High Level Flue Kit (HBF)

In instances where discharging flue gasses at low level may cause a problem, such as in a small courtyard or narrow passageway, a Plume Management Kit may provide a useful addition to a standard low-level flue. The kit features extensions and bends in 80mm black UV-stabilised polypropylene and also includes adjustable mounting brackets. Plume Management Kits are suitable for all models up to 44kW (see notes).

KEY

- A - Diverter elbow
- B - 860mm extension
- C - 87° bend
- D - Terminal insert
- E - Adjustable bracket
- F - 45° bend

Note: FBF kit also required Utility (Internal) Plume Management Kit (U-Pmk)

Kabin-Pak (External) Plume Management Kit (K-Pmk)

The following components are available separately

Note: The Utility (Internal) Plume Management Kit (U-PMK) is designed to extend an FBF flue kit. Both an FBF and U-PMK are required to assemble the complete flue.

HE FLUE KIT ACCESSORIES

F3 - 1000mm extension pipe

F4 - 500mm extension pipe

F7 - 45° bend

F8 - 87° bend

F10 - conventional flue adapter

F11 - pitched roof flashing

F12 - flat roof flashing

F14 - terminal guard

FLEXI LINER KITS & ACCESSORIES

With Warmflow's flexible flue liners, connecting a condensing boiler to an existing chimney couldn't be easier. No separate combustion air supply is needed as our flue liners use the chimney for the supply of combustion air, providing a room-sealed installation.

With the Agentis range, you don't need to carry different flue systems for different jobs - with us, one flue will fit all our boilers.

Four kits are available in a choice of either 6 metre or 10 metre flexible sections, with either vertical or horizontal entry options. The connection between the boiler and chimney is made using Warmflow's plastic flue system, so both the flexible liner within the chimney and the rigid flue connecting the boiler can easily be cut to length as required.

Flexi Liner Kits are suitable for all indoor models up to 26kW. For outputs in excess of 26kW, please consult our Customer Care Centre.

All 4 kits include:

- boiler adapter
- vertical starter piece
- flue fittings kit
- flue thermostat
- chimney closure plate
- terminal section
- flexible liner
- liner spacers and couplings

Horizontal kits also include:

- 2 x 0.5 metre balanced flue extensions
- 1 x 87° balanced flue bend
- 1 x 87° liner support elbow

Vertical kits also include:

- 1 x 0.5 metre balanced flue extension

Vertical Entry Kit

VFL6 = 6m vertical entry kit

VFL10 = 10m vertical entry kit

Horizontal Entry Kit

HFL6 = 6m horizontal entry kit

HFL10 = 10m horizontal entry kit

Hot Water Cylinder

The ideal choice for mains pressure, hot water cylinders. A water heating masterpiece.

QUALITY DESIGN WITH BUILT-IN RELIABILITY

The cylinder range from Warmflow has been designed to satisfy the hot water needs of even the most demanding consumer. The innovative design of our range of WRAS approved, unvented cylinders ensures that you benefit from the large hot water volumes.

From the large heat exchangers to the high performance foam insulation, no effort has been spared in developing these market leading hot water cylinders.

Our unvented cylinders work at mains pressure, so they provide outstanding hot water flow rates, far exceeding those experienced with a combi boiler or traditional vented cylinder. As a result, baths fill quickly and showers are invigorating. In addition, due to the inlet control group we supply with a balanced cold water connection, all the hot and cold taps in the house operate at the same pressure and blending valves work at their best to ensure consistent, comfortable hot water temperatures. For ease of installation cylinder connections are made using compression fittings reducing installation time & cost.

Rather than using thin wall corrugated flexible tube for our heat exchanger coils, we use rigid smooth wall exchangers formed from high quality stainless steel pipe, as we believe this provides greater stability, quality and durability. Our coils are formed from long lengths of pipe, so they have large surface areas for heat transfer.

All our models are manufactured from high quality Duplex stainless steel, a strong and lightweight material ideal for unvented cylinders. Our range is fully third-party tested, approved and certified. Employing patented design features, innovative manufacturing techniques and industry best practice, our cylinders have a 'crevice-free' construction which, combined with the use of Duplex stainless steel, ensures corrosion resistance and a long service life.

This, and the fact that we test every cylinder to in excess of the maximum pressure it will experience in operation, means we can confidently offer a 25 year guarantee. So peace of mind comes as standard.

AN ENVIRONMENTAL INVESTMENT

We use a thick layer of high quality polyurethane insulation, saving precious fuel and reducing carbon dioxide emissions.

Our insulation is also CFC/HCFC-free, has a zero Ozone Depletion Potential (ODP) and a Global Warming Potential of only 2. Due to the large surface areas of our heat exchangers it is also possible for a condensing boiler to work in condensing mode for longer, and cycle less frequently when heating the hot water, thereby helping to further reduce fuel use and emissions.

TRIPLE COIL TR290V

TWIN COIL TW240UV

HEAT PUMP HP200UV

TWIN COIL TW170UV

INDIRECT 140UV

DIRECT DI110UV

EASE OF INSTALLATION

Our cylinders are supplied with all the necessary parts for a quick, easy, professional installation. We supply only high-quality components from recognised, market-leading suppliers.

COMPONENTS SUPPLIED INCLUDE

- Inlet group complete with strainer, pressure-reducing valve, balanced cold connection (except vented)
- Incoloy 3kW immersion heater(s)
- 2 Port zone valve (except Direct, Heat Pump & vented models)
- Expansion vessel complete with hanging bracket (except Vented models)

Available in Indirect, Twin Coil, Twin Coil (Vented), Triple Coil (Vented), Direct and Heat Pump models

Volumes from 110 to 290 litres

Duplex stainless steel construction

316 stainless fittings and grey leathergrain casing

High performance rigid coils

INDIRECT CYLINDER (UNVENTED)

Available in six sizes from 110 to 290 litres to suit the vast majority of domestic installations, our Indirect models are the core of our cylinder range.

Thanks to their large surface area and high performance heat exchange coils, the Indirect models boast impressive heat-up times - the 170 litre model taking just 25 minutes to reach 60°C from cold.

Our Indirect models, like the rest of the unvented range, are designed to be fed directly from the mains water supply via the inlet group supplied, which is capable of receiving incoming water at pressures up to a maximum of 16 bar.

In order to achieve the best performance from our unvented cylinders, the mains water supply must be capable of supplying a flow rate of at least 20 litres per minute with a dynamic pressure of at least 1.5 bar. Should the supply performance be less than this the hot water flow rates will be reduced, however a Warmflow unvented cylinder may still be installed and the benefits of a fast heat-up time and minimal heat losses can still be enjoyed.

TWIN COIL CYLINDER (UNVENTED)

Our Twin Coil unvented models have all the features and benefits of the Indirect models but come with an additional coil for use with a renewable heat source, or an additional boiler. The models feature large dedicated renewable volumes, making them suitable for use with solar thermal systems in line with the recommendations in the Domestic Building Services Compliance Guide.

The renewable coil (the lower of the two coils) has a large surface area to maximise the use of available low grade heat from a renewable resource. The immersion heater and cylinder thermostats for both coils are supplied. Twin Coil models (200 litres & above) feature a dedicated 22mm connection for use with a secondary return (pumped circulation).

TRIPLE COIL CYLINDER (VENTED)

Our Triple Coil vented cylinders feature a total of three 22mm heat exchanger coils. This flexibility means that, for example, the cylinder might be heated by a solar thermal system via the renewable coil, a wood pellet boiler supplying the primary coil and a back-up oil or gas boiler on the tertiary coil.

DIRECT CYLINDER (UNVENTED)

The electrically heated Direct cylinders are designed for instances where the use of fossil fuels is impractical or unavailable. Featuring two immersion heaters, one heating the entire cylinder volume and the other heating a boost volume at the top, the cylinders are able to make use of the Economy 7 tariff in order to minimise the cost of hot water.

If used in this way, the cylinder should be sized to provide the complete anticipated daily hot water use, thereby reducing the use of the boost element which runs on the more expensive standard tariff.

RENEWABLE ENERGY

High-efficiency, low emission appliances with a range of outputs to suit any installation.

AIR SOURCE HEAT PUMPS

GROUND SOURCE HEAT PUMPS

BIOMASS WOOD PELLET BOILER

WARMFLOW HEAT PUMP CYLINDERS

WARMFLOW Zeno

AIR SOURCE

Air to water heat pumps are an increasingly popular choice for homeowners. They can be easily integrated into heating systems, offer excellent energy savings and can help reduce your carbon footprint. Designed to work in lower temperature conditions they are suitable for installation in a wide range of accommodation including smaller houses to larger properties. Electricity is required to operate the appliance resulting in approximately 75% of the energy used coming from renewable sources helping to reduce your carbon footprint.

Using technology which is similar to that which is used in a common household fridge, our Zeno heat pump harnesses the natural heat energy from the air by blowing it through a highly finned evaporator coil. The heat pump then increases the temperature and the heat is used to provide heating & hot water for your home. All Warmflow Zeno air source heat pumps come with Warmlink, Warmflow's cloud based remote control technology which provides effortless and easy to use remote control access for engineers.

Why Warmflow Zeno?

3 MODELS
Zeno 8kW, 12kW & 20kW

ENHANCED VAPOUR INJECTION (EVI) TECHNOLOGY
Extends the operating envelope of the unit.

QUIET OPERATION
All products are Quiet mark approved with super quiet operation. Sound level as low as 54db (A).

ELECTRONIC CONTROLLED EXPANSION VALVES
Optimising system efficiency by allowing the heat pump to run at a range of flow temperatures and capacities.

VARIABLE SPEED-INVERTER DRIVEN COMPRESSOR
Low noise, high efficiency Panasonic rotary compressor; the heart of the system.

HIGH FLOW HEAT EXCHANGERS WITH LARGE SURFACE AREA
Maximising the heat supplied to the property whilst maintaining high flow rates for efficient operation.

USER-FRIENDLY TOUCHSCREEN INTERFACE
Covering all aspects of heat pump and system control; the brain of the system.

LOW CURRENT
Designed to run from a standard single-phase domestic electricity supply.

BUILT IN HIGH EFFICIENCY PUMP
Fully integrated Grundfos high efficiency pump for the heating circuit.

HIGH TEMPERATURE OUTPUT
Flow temperature up to 60°C means domestic hot water (DHW) can be produced without the need for additional heat sources.

INSTALLATION & CONTROL ACCESSORIES AS STANDARD
Hydraulic kit includes: 1" flexibles x 2, 1" ball valves x 2, 1" elbows x 2, 1" Y strainer & Manual. Accessories kit includes: Controller, mounting plate, 10m extension cable, DHW Cylinder sensor (10m), Anti vibration mounts x 4.

INSTALLER FRIENDLY
Includes a number of installation friendly features as standard which will help facilitate a smooth installation.

A RANGE OF PACKAGES TO SUIT ALL YOUR INSTALLATION REQUIREMENTS

All of our Zeno air source heat pumps come with a basic kit which comprises of a touch screen, intelligent controller, factory fitted Grundfos circulating pump, Y strainer, flexi hose kit, isolating ball valve and 2 x 1" male to female elbows.

In addition, we offer a range of custom packs which include our very own Warmflow branded twin coil heat pump cylinder offering further value and a 1 stop shop to ensure your installation is as easy as possible. All the packs have been designed to enhance value for our customers and include only the finest quality, market leading branded goods.

Our range of custom packs are detailed in the tables:

ZENO INVERTER DRIVEN AIR SOURCE HEAT PUMP MODELS

Includes controller, pump, heated drip tray, 1" x Y strainer, 1 x flexi hose kit, 2 x 1" isolating ball valve, 2 x 1" Male to Female Elbows

Code	Description

WARMFLOW WARMLINK

WarmLink is Warmflow's cloud based technology which provides effortless, easy to use remote control technology for homeowners and engineers. WarmLink allows users to control and monitor their Warmflow Zeno air source heat pump remotely or from the comfort of their sofa.

WarmLink is easy to use and offers a range of features including:

APP CONTROL

Fully control your appliance via your smartphone, tablet or PC.

ERROR CODES

In the unlikely event of a fault, your engineer will be able to remotely review error codes allowing for more efficient diagnosis and speedy response

EASY CONTROL

Easy control of the heating and hot water for your appliance from anywhere in the world to ensure maximum comfort in your home

The WarmLink user interface is now included as standard with all Warmflow Zeno air source heat pumps ensuring the smooth and efficient running of your appliance for many years to come.

Setting up WarmLink access on your smartphone, tablet or electronic device couldn't be easier with a simple to use app available on google play or apple app store. Simply download the app, connect your device and start enjoying the benefits of remote control access to your Zeno air source heat pump.

All Warmflow Zeno air source heat pumps come with a communication module with built in SIM card which automatically connects to the cloud when the heat pump is activated. Simply scan the barcode using the WarmLink app to connect to your heat pump.

GROUND SOURCE HEAT PUMPS

What is a Ground source heat pump (GSHP)?

Ground source heat pumps (GSHPs) use a loop of pipe, called a ground loop, which is buried in your garden to extract heat from the ground. Heat from the ground is absorbed into the fluid and then passes through a heat exchanger into the heat pump which then transfers heat into your radiators or underfloor system. The length of the ground loop depends on the size of your home and the amount of heat your home requires to remain warm and cosy during the long winter months.

The Warmflow Zeno ground source heat pump is one of the most efficient and intelligent heat pumps in Europe with an SCoP of up to 5.08%! Independent tests have shown an SCoP of up to 5.08% which means that for every 1kW of electricity consumed, 5.08kW of heat are produced resulting in an ErP rating of A+++.

Why Warmflow Zeno?

 2 MODELS Zeno 2-8kW & 4-18kW	 VARIABLE SPEED, HIGH EFFICIENCY PUMPS Fully integrated, variable speed, high efficiency pump for the heating & brine circuits modulates flow to match heating demand and overcome hydraulic resistance whilst maintaining peak efficiency.
 SINGLE PHASE ELECTRICITY SUPPLY UP TO 18kW Designed to run from a standard single-phase domestic electricity supply.	 INSTALLATION ACCESSORIES AS STANDARD Includes flexible hoses, filters and 3 port diverting valve. Built-in system kit (inc expansion vessel) for heating systems up to 150L
 QUIET OPERATION All products are Quiet mark approved with super quiet operation. Sound level as low as 54db (A).	 ELECTRONIC CONTROLLED EXPANSION VALVES Optimising system efficiency by allowing the heat pump to run at a range of flow temperatures and capacities.
 VARIABLE SPEED-INVERTER DRIVEN COPELAND COMPRESSOR Low noise, high efficiency Copeland compressor; the heart of the system.	 HIGH FLOW HEAT EXCHANGERS WITH LARGE SURFACE AREA Maximising the heat supplied to the property whilst maintaining high flow rates for efficient operation.
 USER-FRIENDLY INTERFACE Powerful programmer with unique features to assist the installation, operation and servicing.	 HIGH TEMPERATURE OUTPUT Flow temperature up to 65°C means domestic hot water (DHW) can be produced without the need for additional heat sources.

BIOMASS WOOD PELLET BOILERS

Biomass boilers are very similar to conventional gas boilers that you will be familiar with, providing you with space heating and hot water for the entire home, but instead of using gas to produce the heat, they combust sustainably sourced wood pellets.

Using wood in place of fossil fuels helps to prevent long-term climate change, since the carbon dioxide released during the combustion was actually absorbed while the tree was growing, so they are essentially carbon neutral.

The Warmflow Zeno biomass wood pellet boiler has been uniquely designed for ease of installation & homeowner use ensuring it meets all performance demands. Intelligent control and design ensures maximum efficiencies are achieved with long intervals between cleaning and maintenance.

KEY FEATURES

At Warmflow we pride ourselves on our innovation and customer focus so we designed our biomass boiler to meet all possible performance demands.

USER FRIENDLY CONTROL PANEL

WS18 / WP18	
Output	4~18kW; Modulating
Flue Options	Black powder coated conventional flue system
Conventional flue size (mm)	100
EN303-5 Efficiency class	Class 5
Height (mm)	1135
Depth (mm)	1170
Width (mm)	650
Service access	Front, Top & Sides
Circulating pump	Factory-fitted UPM 25-75

WOOD PELLET FLUE SYSTEM & FLUE KIT ACCESSORIES

The 'Easy-Fit' twin wall metal flue system has been specifically designed for use on biomass appliances. The inner wall is manufactured from high grade aluminium with the outer wall finished in a weather-resistant and durable black powder coating.

Utilising a push-fit system ensures ease of use and quick installation. The system is also suitable for internal use and can be used in conjunction with our Roof Flashings kits as required.

Pitched Roof Flashing

4348

Flat Roof Flashing

4349

Vertical Flue Kit 080/100

4142

- Included with every WP18 is:
- 500mm Extension
 - Flue Terminal (584mm)

45° Bend

4187

Wall Brackets

- Supporting Collar for pipes (4189 standard)
- Supporting Collar for pipes (4347 extended)

Concentric Extension

4181 - 500mm
4188 - 1000mm

KEY FEATURES CONTINUED

- Can be fitted in a garage, an outbuilding or outdoors.
- 60 litre boiler capacity eliminates the need for a buffer tank in the majority of installations.
- Only uses ENPlus A1 pellets.
- High durable, black powder-coated, push-fit flue with options.
- Ceramic ignitor with intelligent software to give quick and reliable ignition.
- Fits through a doorway and takes up similar footprint to a slimline oil tank, saving you valuable space.
- Smart induced draught fan technology with lambda control continually adjusts to give you the best efficiency all the time.
- Auto restart after power cuts – no manual intervention needed so you won't be waking up to cold water and a cold house after an overnight power cut while you were sleeping.
- User-friendly, menu-based controller guides you through every step. Future-proofed to allow new software developments such as smart phone technology to be uploaded at routine services.
- Installer friendly – simplified wiring.
- Simple flow and return plumbing.
- Optional patent pending installation buggy kit, making it easy to move into place.

Easy installation in a matter of hours

- DEFRA exempt
- Approved by MCS
- HETAS approved appliance scheme

Eligible for government grants

Exempt from the Clean Air Act

WARMFLOW
Nero
Hot Water Cylinder

WARMFLOW HEAT PUMP CYLINDERS

The Warmflow cylinder range has been designed to satisfy the needs of even the most demanding household.

The innovative design of our range of heat pump cylinders ensures that you benefit from the largest hot water volumes, shortest heat-up times and lowest possible heat losses.

Available in four sizes from 170 to 290 litres to suit the vast majority of heat pump installations. Thanks to their large surface area and high performance plate heat exchanger, the heat pump models boast impressive heat-up times - the 170 litre model taking just 25 minutes to reach 60°C from cold.

Our Heat pump models, like the rest of the unvented range, are designed to be fed directly from the mains water supply via the inlet group supplied, which is capable of receiving incoming water at pressures up to a maximum of 16 bar.

WARMFLOW CUSTOMER SERVICE

Total peace of mind with our dedicated Customer Service team

All Warmflow Agentis oil boilers come with a 2 year parts and labour warranty and a 5 year warranty on the heat exchanger as standard. These can easily be upgraded to a 5 year parts and labour warranty*, providing peace of mind that your appliance is in safe hands should any problems occur.

Our dedicated and knowledgeable customer support team is on hand to provide expert support before, during and after-sales, to ensure that your queries are addressed in a timely fashion. All Warmflow products must be registered in line with terms and conditions otherwise warranty may be invalid.

*Full details of terms and conditions of warranty for your Warmflow product are available at www.warmflow.co.uk.

TRAINING COURSES

Become a Warmflow Connect installer and gain a number of benefits including a free 5 year parts and labour warranty* on all of your Warmflow Agentis oil boiler installations.

At Warmflow we offer a range of oil and renewable training course to suit all requirements at our training centres around the UK.

For more information please email salesgb@warmflow.co.uk or call 01952 607750

Are you a Warmflow installer,
Why not sign up to our Installer Scheme?

The Warmflow Installer Scheme will allow you to register all of your Warmflow products, purchase extended warranties and claim rewards for every purchase you make. Points mean rewards with Warmflow. Sign up online today at the Warmflow Connect platform connect.warmflow.co.uk Email connect@warmflow.co.uk or contact your Warmflow sales representative.

REDUCING OUR CARBON FOOTPRINT

At Warmflow we are committed to reducing our carbon footprint and are constantly striving towards a way to heat homes and businesses with net zero carbon emissions.

Recent initiatives include heating the factory entirely with our Zeno range of environmentally friendly, renewable heating appliances, generating electricity for the site through 550kW solar panels and recycling water used in testing our products.

We have taken significant strides to future proof our product ranges. Our Zeno ground and air source heat pumps are one of the most efficient ranges in Europe, helping homeowners reduce their carbon footprint.

In addition we have continued to increase the efficiency of our current Agentis oil (liquid fuel) range which includes the UK & Ireland's only AA rated combi boiler, saving up to 5ltrs of fuel per week.

Although heat pumps are not suitable for many existing properties we have been working extensively with Government & industry agencies, test centres and colleges to pioneer a solution to replace existing oil and gas appliances.

A switch to a 100% renewable fuel is required to ensure the highest level of carbon reductions, and in particular a biofuel known as Hydrotreated Vegetable Oil (HVO). HVO is a renewable liquid fuel made from certified waste fats and oils and manufactured by a synthesised process with hydrogen to create a greener, cleaner fuel. The ISCC (International Sustainability and Carbon Certification) confirms that HVO is made from waste products or crops and doesn't contribute to deforestation.

We are delighted to announce that all Warmflow Agentis oil boilers are HVO compatible and will run on the renewable fuel with only some minor recommissioning. This ensures almost 90% cut in carbon emissions immediately.

Although it is currently classed and taxed as a road fuel the industry is currently in discussions with Government to see how to best introduce HVO as a home heating fuel and reduce the cost to homeowners.
