T A P S & S H O W E R S

At Standard Hidraulica,
we reaffirm our
commitment in the fight
against climate change

The change to a more environmentally responsible consumption model and **Clever's firm commitment to sustainability and energy efficiency** of its products has been rewarded with the **UWLA label**. A recognition of the effort and innovation that makes us proud.

The **UWLA label, Unified Water Label Association**, aims to establish the standardized energy classification throughout Europe for all products that use water in their operation so that the user can visually understand their level of energy efficiency. In this way, when choosing a product with the UWLA distinction, the user is guaranteed to have chosen a product that will help them consume water and energy in a more intelligent and efficient way.

In Clever we are proud to be one of these more than 160 international brands that have products distinguished with UWLA label in their catalog. At the moment, **more than 100 products** of our catalog already have this labeling, guaranteeing their efficiency in the use of water and energy. Among all these products with the UWLA labeling, there are the new series of taps **ROCKET**.

At Clever we reaffirm our commitment to sustainability and the environment, with products that allow our users to consume resources more responsibly on a daily basis.
