

Friwa

Domestic hot water technology

Product range Friwa

Technical data and product information

FriwaMini

FriwaMega

Friwa modules heat domestic water comfortably and hygienically operating on the principle of a flow-type water heater. Other than in conventional domestic hot water tanks, domestic water as food is not used for energy storage and is not stored as domestic hot water for hours or days. An efficient plate heat exchanger heats it when necessary. The energy required for the hygienic heating of the domestic hot water comes from a buffer tank which can be heated via various systems.

Using efficient plate heat exchangers makes it possible to consistently have low return temperatures, thus increasing the efficiency of systems such as condensing boilers, heat pumps and solar thermal installations.

Advantages of the PAW domestic hot water modules:

- Use in combination with heat pumps possible
- Optional circulation
- Versatile application possibilities due to a great range of performance
- Fast response time thanks to a special control algorithm, greater comfort
- Ideal connection to the building control system via Modbus protocol
- Optional Internet module for system monitoring and parametrisation
- Easy cascability of the modules thanks to premounted pipe sets
- Special heat exchangers for different water qualities (more information on page 9.)

FriwaMicro

1 Primary pump

High-efficiency pump

2 Heat exchanger

Highly efficient plate heat exchanger, coated premium version optionally available for special water qualities. For further information on the product, see page 9.

3 Connections (from left to right)

Return to the buffer tank
Cold water inlet
Hot water outlet

4 Thermostatic valve

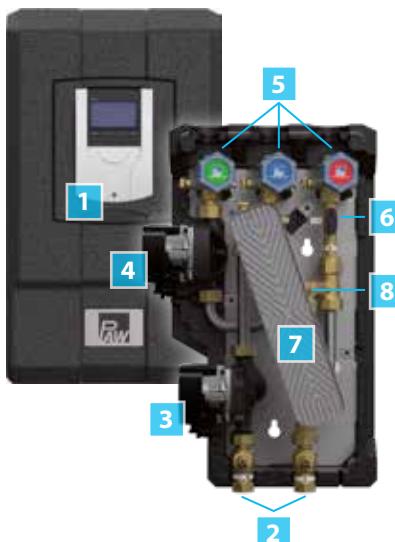

For the setting of the desired temperature range

5 Insulation

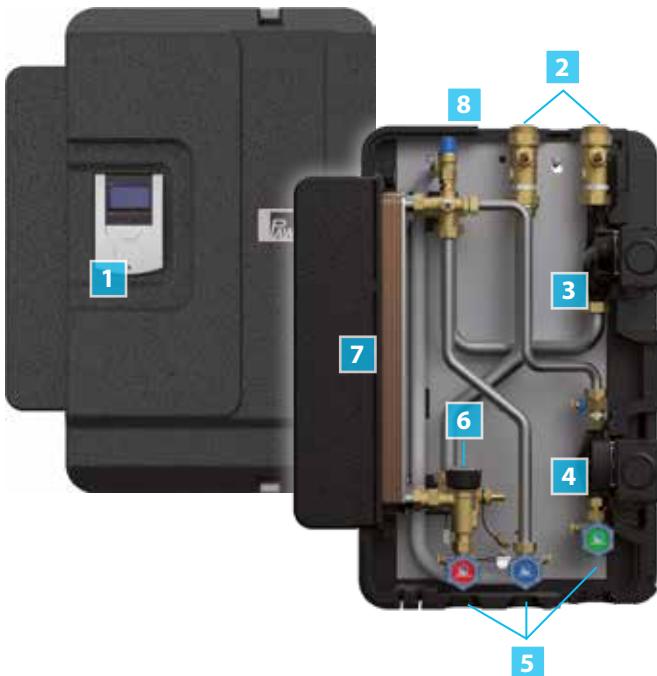

6 Flow from the buffer tank

FriwaMini

FriwaMidi/Maxi

FriwaMega

1 Friwa controller FC3.10
with connection to the building control system and optional Internet module

2 Shut-off valve
ball valve with integrated check valve

3 Primary pump
High-efficiency pump

4 Circulation pump
High-efficiency pump: optional for Mini, Midi, Maxi and Mega

5 Piston valves
maintenance-free and easy to service

6 Flow rate measurement device
Measuring range

Mini: 2 – 40 l/min

Midi: 1 – 130 l/min

Maxi: 1 – 130 l/min

Mega: 4 – 260 l/min

7 Heat exchanger
Highly efficient plate heat exchanger, coated premium version optionally available for special water qualities. For further information on the product, see page 9.

8 Pressure relief valve
integrated pressure relief valve, 10 bar

Product range Friwa

The Friwa product range can be adapted to almost every individual demand for domestic hot water. From the FriwaMini in a single-family house to the FriwaMega in the hotel industry, any withdrawal flow rates can be covered comfortably.

Overview domestic hot water modules and equipment					
Module / type	FriwaMicro	FriwaMini	FriwaMidi	FriwaMaxi	FriwaMega
Application range*	up to 20 l/min	up to 28 l/min	up to 50 l/min	up to 77 l/min	up to 123 l/min
Basic module without circulation	6400010	6401510	6405511	6406511	6407511
	6400030 (coated heat exchanger)	6401530 (coated heat exchanger)	6405531 (coated heat exchanger)	6406531 (coated heat exchanger)	6407530 (coated heat exchanger)
Module with circulation (internal)**	thermally controlled	6401515	6405516	6406516	6407517
		6401535 (coated heat exchanger)	6405536 (coated heat exchanger)	6406536 (coated heat exchanger)	6407535 (coated heat exchanger)

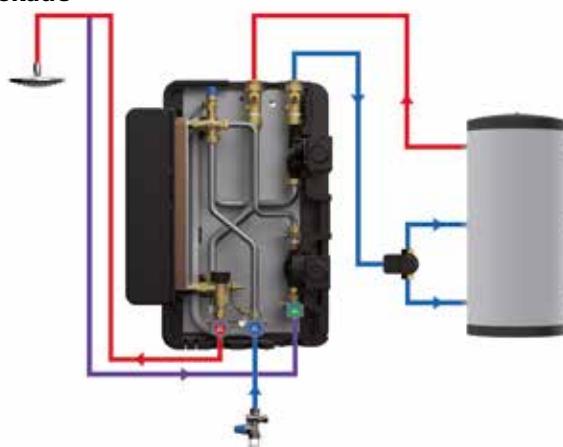

* Range of application at performance indicator 1 (LK 1, as per SPF test procedure): storage tank 60 °C, hot water = 45 °C, cold water = 10 °C

**Friwa modules can be equipped subsequently with internal circulation lines - see equipment

In addition to the Mini, Midi, Maxi and Mega modules, the product range also includes cascade solutions. To cover larger withdrawal flow rates, such as in the hotel industry or in hospitals, the basic module without a circulation line can be extended to a double, triple or quadruple cascade by using a pipe set. For retrofitting, the cascade can be subsequently equipped with an external circulation set as needed. On the right side, the selection options for the cascade solutions are illustrated.

Example FriwaMidi-Kaskade

Cascade solutions Selection table

Required module and pipe set for double cascade*** - example FriwaMini

Example:	2x	+ + +	Basic module	Pipe set for FriwaMini-Kaskade	Return distribution set	Circulation line
			FriwaMini			
Basic modules		2x 6401510				
		2x 6401530 (coated heat exchanger)				
Pipe set Friwa cascade		64042933				
Return distribution set		5675431				
Optional: circulation line		6404111				
Optional accessories: WiFi3.10 Internet Gateway module and MB3.10 Modbus RTU module						

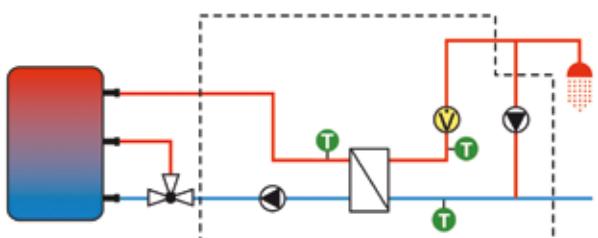

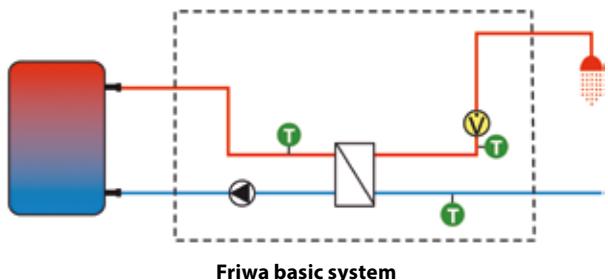

Required module and pipe set for double cascade*** - example FriwaMidi

Example:	2x	+ + +	Basic module	Pipe set for FriwaMidi-Kaskade	Return distribution set	Circulation line
			FriwaMidi	FriwaMaxi	FriwaMega	
Basic modules		2x 6405511	2x 6406511	2x 6407511		
		2x 6405531 (coated heat exchanger)	2x 6406531 (coated heat exchanger)	2x 6407530 (coated heat exchanger)		
Pipe set Friwa cascade		64042943	64042953	64042963		
Return distribution set		5675431	6404242	6404244		
Optional: circulation line		6404136GM7	6404136GM7	6404136GM7		
		6404136GH10	6404136GH10	6404136GH10		
		6404136GH12	6404136GH12	6404136GH12		
Optional accessories: WiFi3.10 Internet Gateway module and MB3.10 Modbus RTU module						

Required module for triple or quadruple cascade*** - example FriwaMidi

Example:	3x or 4x	+ + +	Basic module	Accessory set FriwaMidi-Kaskade	Return distribution set	Circulation line
			FriwaMidi	FriwaMaxi	FriwaMega	
Basic modules		3x or 4x 6405511	3x or 4x 6406511	3x or 4x 6407511		
		3x or 4x 6405531 (coated heat exchanger)	3x or 4x 6406531 (coated heat exchanger)	3x or 4x 6407530 (coated heat exchanger)		
Accessory set for Friwa cascade		64042622 (2-fold) 64042632 (3-fold) 64042642 (4-fold)	64042722 (2-fold) 64042732 (3-fold) 64042742 (4-fold)	64042820 (2-fold) 64042830 (3-fold) 64042840 (4-fold)		
Return distribution set		6404242	6404242	6404244		
Optional: circulation line		6404136GM7	6404136GM7	6404136GM7		
		6404136GH10	6404136GH10	6404136GH10		
		6404136GH12	6404136GH12	6404136GH12		
Optional accessories: WiFi3.10 Internet Gateway module and MB3.10 Modbus RTU module						

*** The cascade solution is available on request; / = not possible

Preset systems:

*Indication of performance as per SPF test procedure, LK1 = performance indicator 1, at a set hot water temperature of 45 °C, at a primary flow temperature of 60 °C

Controller FC3.10 for DHW modules

- for FriwaMini up to 28 l/min* / cascade up to 112 l/min*
- for FriwaMidi up to 50 l/min* / cascade up to 200 l/min*
- for FriwaMaxi up to 77 l/min*/ cascade up to 308 l/min*
- for FriwaMega up to 123 l/min* / cascade up to 492 l/min*
(as per SPF LK 1)*

The controller FC3.10 sets the hot water temperature of the domestic hot water module via the rotation speed control of the primary pump. During operation, a special algorithm adjusts the control functions even faster to the given system conditions.

As additional functions, the controller performs the circulation control and the switching of the return distribution valve. Different circulation modes are possible and can be adapted individually to the system requirements. The controller can, for example in a single-family house, be integrated in the BMS without additional hardware.

The optionally available Internet Gateway module WiFi3.10 allows a monitoring and parametrisation of the system. The connection to the building control system is established via the Modbus protocol. For cascade solutions, the integration in the BMS can be carried out via the optional MB3.10 module. See below.

Function overview controller FC3.10

Display	Graphically animated LCD display
Operation	4 push buttons
Relay outputs	3 x 230 V, switching relay 2 x PWM signal for speed control
Inputs	4 x Pt1000
Flow rate sensors	yes
Heat quantity balancing	yes
Circulation (time-controlled / temperature-controlled / impulse driven)	yes
Return distribution	yes

Characteristics WiFi3.10 Internet Gateway Module

- ✓ For the connection of DHW modules to an internet platform with the controller FC3.10
- ✓ System monitoring and parametrisation
- ✓ Display of the alarm history and graphic overview of the nominal values
- ✓ E-mail notification in case of error messages
- ✓ Display of the alarm history

**Item no. 1339003**

Characteristics MB3.10 Modbus RTU Module

- ✓ Connection of a cascade to a BMS
- ✓ The controller FC3.10 offers 2500 registers that can be processed by means of the MB3.10
- ✓ Communication status visible via LED codification
- ✓ Modbus RTU protocol
- ✓ Modbus specific parameters can be set at the controller – high flexibility and possibility to adapt to an existing BMS

**Item no. 1339002**

Application range

- Domestic hot water preparation operating on the principle of a flow-type water heater

The CE-conformity of the module has been certified according to DIN EN 60335 and SVGW.

Application range

- in thermal solar installations,
- in systems with a solid fuel boiler, oil or gas boiler,
- connection to a buffer tank

*For information on **design data**, see page 18 to 23.

Operating data

Max. pressure	primary: 3 bar, secondary: 10 bar
Max. operating temperature	2-80 °C
Min. flow rate	2 l/min
Max. flow rate as per SPF LK 1*	20 l/min
Transmission performance 1 as per SPF LK 1*	48 kW

Technical data

Equipment	Dimensions	Materials
Heat exchanger	Nominal diameter DN 15 (½")	Valves and fittings Brass
Cartridge sensor	Connections ¾ " int. thread, flat sealing	Seals EPDM / AFM 34
Flow switch	Centre distance 65 mm	Insulation EPP
	Width 282 mm	Cartridge sensor Stainless steel
	Height 420 mm	Flow switch Noryl

FriwaMicro Mounting example

Mounting example: FriwaMicro without circulation,
with safety group for domestic hot water tank

FriwaMicro - DN 15 (1/2")

Item no.

FriwaMicro, thermally controlled

prim.: Wilo Para SC 15/6-43

6400010

FriwaMicro, thermally controlled, with coated heat exchanger

prim.: Wilo Para SC 15/6-43

6400030

Accessories

Item no.

Safety group for domestic hot water tank

563907

Safety group for hot water storage tank, with shut-off valve and adjustable check valve.
For horizontal installation. With seat made of stainless steel.
Brass housing. Chromed.
Certified according to EN 1487.
Opening pressure 7 bar, max. power 10 kW

Accessory set FriwaMicro

64042001

Consisting of: 3x ball valve DN 15

For locking the module during servicing
Authorisation according to DVGW
Connections: 3/4" ext. thread

**Coated heat exchangers –
premium variant**

- ✓ Sealed surface with thin film coating
- ✓ Specifically designed for drinking water applications
- ✓ Additional corrosion protection in case of special water qualities
- ✓ Reduced deposit formation
- ✓ Diffusion barrier
- ✓ Greater durability and therefore longer service life
- ✓ Greater reliability of the system
- ✓ Lower maintenance costs
- ✓ Thermal and hydraulic performance of the heat exchanger remains unchanged

Application range

- Domestic hot water preparation operating on the principle of a flow-type water heater

The CE-conformity of the module has been certified according to DIN EN 60335 and SVGW.

Application range

- combined with thermal solar installations,
- in systems with a solid fuel boiler, oil or gas boiler,
- for the connection to a buffer tank

*For information on **design data**, see page 18 to 23.

Operating data

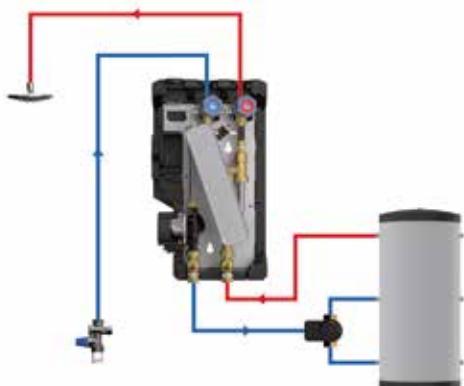

Max. pressure	primary: 3 bar, secondary: 10 bar
Max. operating temperature	95 °C
Min. flow rate	2 l/min
Max. flow rate as per SPF LK 1*	28 l/min
Transmission performance 1 as per SPF LK 1*	69 kW

Technical data

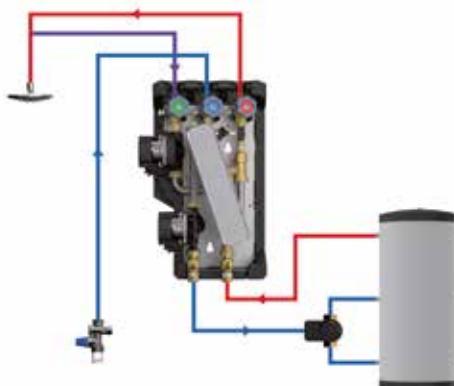

Equipment	Dimensions	Materials
Check valve	Nominal diameter	Valves and fittings

FriwaMini Mounting example

Mounting example: FriwaMini without circulation,
with safety group for domestic hot water tank

Mounting example: FriwaMini with circulation, return distribution
set and safety group for domestic hot water tank

FriwaMini - DN 15 (1/2")

Item no.

FriwaMini without circulation

prim.: Grundfos UPM4 15-75

6401510

FriwaMini with circulation

prim.: Grundfos UPM4 15-75, sec.: Grundfos UPM4 15-70 CIL3

6401515

FriwaMini without circulation, coated heat exchanger

prim.: Grundfos UPM4 15-75

6401530

FriwaMini with circulation, coated heat exchanger

prim.: Grundfos UPM4 15-75, sec.: Grundfos UPM4 15-70 CIL3

6401535

Accessories

Item no.

PAW 3-way switch valve PV3 DN 25

5675431

with 2-point control for managing different temperature zones in the buffer tank,
e.g. for return flow distribution or enabling additional buffer tanks
Setting time: 13 sec., rotation angle: 90°, torque: 5 Nm, Kvs value: 15.5

Safety group for domestic hot water tank

563907

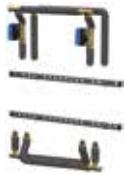

Safety group for hot water storage tank, with shut-off valve and adjustable check valve.
For horizontal installation. With seat made of stainless steel.
Brass housing. Chromed.
Certified according to EN 1487.
Opening pressure 7 bar, max. power 10 kW

Withdrawal valve

640422

Flame-treated valves for sterile withdrawal of water.
For the subsequent installation inside the Friwa module, on each piston valve of the domestic hot water circuit.

Pipe set for FriwaMini-Kaskade

64042933

3-way valve with actuator, Kvs value: 11
for FriwaMini

Application range

- Domestic hot water preparation operating on the principle of a flow-type water heater

The CE-conformity of the module has been certified according to DIN EN 60335 and SVGW.

Application range

- combined with thermal solar installations,
- in systems with a solid fuel boiler, oil or gas boiler,
- for the connection to a buffer tank,
- up to 200 l/min as a quadruple cascade (as per SPF LK 1*)

*For information on **design data**, see page 18 to 23.

Operating data

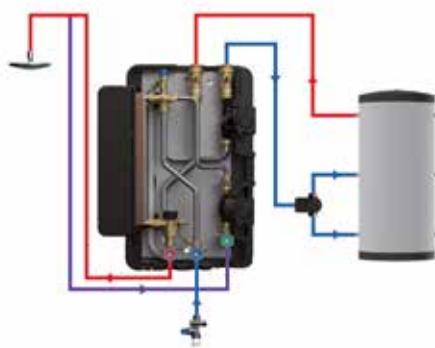

Max. pressure	primary: 3 bar, secondary: 10 bar
Max. operating temperature	95 °C
Min. flow rate	2 l/min
Max. flow rate as per SPF LK 1*	50 l/min
Transmission performance 1 as per SPF LK 1*	129 kW

Technical data

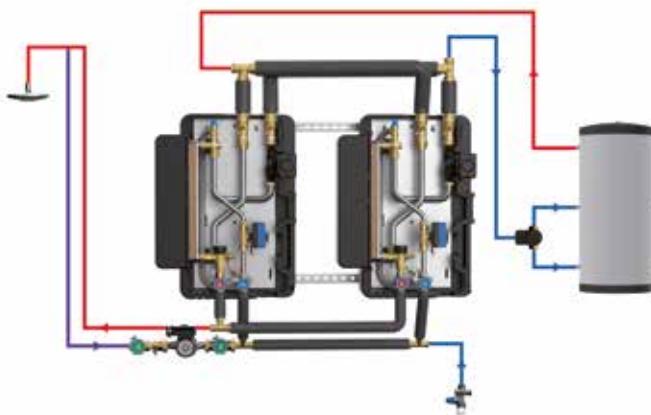

Equipment	Dimensions	Materials

FriwaMidi Mounting example

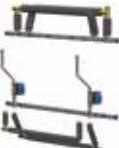

FriwaMidi with circulation

Cascade with 2 basic modules and pipe set for cascade

FriwaMidi – DN 20 (3/4")	Item no.
	
FriwaMidi without circulation	
prim.: Grundfos UPM2 25-75 LowFlow	6405511
FriwaMidi with circulation	
prim.: Grundfos UPM2 25-75 LowFlow, sec.: Grundfos UPM2 15-75 CIL2	6405516
FriwaMidi without circulation, coated heat exchanger	
prim.: Grundfos UPM2 25-75 LowFlow	6405531
FriwaMidi, with circulation, coated heat exchanger	
prim.: Grundfos UPM2 25-75 LowFlow, sec.: Grundfos UPM2 15-75 CIL2	6405536

Accessories	Item no.
	Circulation set for internal retrofitting (FriwaMidi/Maxi) 6404123 - with high-efficiency pump Grundfos UPM4 15-70 CIL3 - with piston valve and non-return valve Connection: 1" ext. thread
	Withdrawal valve 640422 Flame-treated valves for sterile withdrawal of water. For the subsequent installation inside the Friwa module, on each piston valve of the domestic hot water circuit.
	Pipe set for FriwaMidi-Kaskade, 2-fold 64042943 Insulated pipe set for the cascading of two DHW modules (item no. 6405511). - with two 2-way valves for switching - with mounting rail for an easy wall assembly
	Accessory set for FriwaMidi-Kaskade, 2-fold 64042622 Accessory set for FriwaMidi-Kaskade, 3-fold 64042632 Accessory set for FriwaMidi-Kaskade, 4-fold 64042642 Accessory set for cascading of two, three or four identically constructed domestic hot water modules (item no. 6405511 / 6405531). The two-way valves are pre-assembled and can therefore be easily installed in the cold water line. Thanks to the short opening time of the valve, there is no loss of comfort when connecting or disconnecting single cascade modules. <i>The pipe set for cascade must be obtained by the customer!</i>
	PAW 3-way switch valve PV3 DN 25 5675431 with 2-point control for managing different temperature zones in the buffer tank, e.g. for return flow distribution or enabling additional buffer tanks Setting time: 13 sec., rotation angle: 90°, torque: 5 Nm, Kvs value: 15.5
	Return distribution set 1 1/2" int. thread 6404242 3-way valve with actuator, setting time for 90°: 35 sec., Kvs value: 25 for FriwaMidi/Maxi-Kaskade, FriwaMega
	Circulation set for Friwa cascade (Midi, Maxi, Mega) 6404136GM7 - with high-efficiency pump Grundfos UPM4 15-70 CIL3 - with piston valves, non-return valve and drain valve Connection: 1" ext. thread Circulation set for Friwa cascade (Midi, Maxi, Mega) 6404136GH10 - High-efficiency pump Grundfos UPML 25-105 N - with piston valves, non-return valve and drain valve Connection: 1 1/2" ext. thread

Application range

- Domestic hot water preparation operating on the principle of a flow-type water heater

The CE-conformity of the module has been certified according to DIN EN 60335 and SVGW.

Application range

- combined with thermal solar installations,
- in systems with a solid fuel boiler, oil or gas boiler,
- for the connection to a buffer tank,
- up to 308 l/min as a quadruple cascade (as per SPF LK 1)*

*For information on **design data**, see page 18 to 23.

Operating data

Max. pressure	primary: 3 bar, secondary: 10 bar
Max. operating temperature	95 °C
Min. flow rate	2 l/min
Max. flow rate as per SPF LK 1*	77 l/min
Transmission performance 1 as per SPF LK 1*	187 kW

Technical data

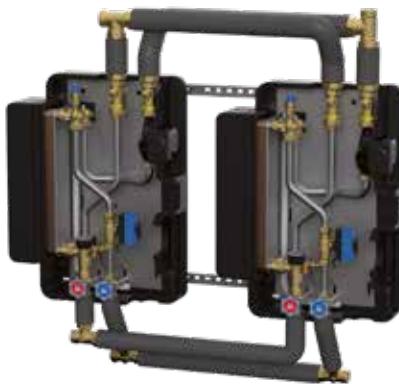

Equipment	Dimensions	Materials
Check valve	Nominal diameter	Valves and fittings
primary: 2 x 400 mm wc	DN 25 (1")	Brass
Circulation line	Connections	Seals
optional	primary: 2" ext. thread secondary: 1¼" ext. thread	AFM34 / EPDM
Heat exchanger	Circulation line	Insulation
60 plates, copper solder/coated	1" ext. thread	EPP

FriwaMaxi Mounting example

FriwaMaxi with circulation

Cascade with 2 basic modules and pipe set for cascade

FriwaMaxi DN 25 (1")

Item no.

FriwaMaxi without circulation

prim.: Grundfos UPML 25-105

6406511

FriwaMaxi with circulation

prim.: Grundfos UPML 25-105, sec.: Grundfos UPM2 15-75 CIL2

6406516

FriwaMaxi without circulation, coated heat exchanger

prim.: Grundfos UPML 25-105

6406531

FriwaMaxi with circulation, coated heat exchanger

prim.: Grundfos UPML 25-105, sec.: Grundfos UPM2 15-75 CIL2

6406536

Accessories

Item no.

Circulation set for internal retrofitting (FriwaMidi/Maxi)

6404123

- with high-efficiency pump Grundfos UPM4 15-70 CIL3
- with piston valve and non-return valve

Connection: 1" ext. thread

Return distribution set 1 1/4" int. thread

640424

3-way valve with actuator, setting time for 90°: 35 sec., Kvs value: 16
for FriwaMaxi, tank heat transfer module Maxi

Withdrawal valve

640422

Flame-treated valves for sterile withdrawal of water.
For the subsequent installation inside the Friwa module,
on each piston valve of the domestic hot water circuit.

Pipe set for FriwaMaxi-Kaskade, 2-fold

64042953

Insulated pipe set for the cascading of two DHW modules (item no. 6406511).

- with two 2-way valves for switching
- with mounting rail for an easy wall assembly

Accessory set for FriwaMaxi-Kaskade, 2-fold

64042722

Accessory set for FriwaMaxi-Kaskade, 3-fold

64042732

Accessory set for FriwaMaxi-Kaskade, 4-fold

64042742

Accessory set for cascading of two, three or four identically constructed domestic hot water modules (item no. 6406511 / 6406531). The two-way valves are pre-assembled and can therefore be easily installed in the cold water line. Thanks to the short opening time of the valve, there is no loss of comfort when connecting or disconnecting single cascade modules.

The pipe set for cascade must be obtained by the customer!

PAW 3-way switch valve PV3 DN 25

5675431

with 2-point control for managing different temperature zones in the buffer tank, e.g. for return flow distribution or enabling additional buffer tanks

Setting time: 13 sec., rotation angle: 90°, torque: 5 Nm, Kvs value: 15.5

Return distribution set 1 1/2" int. thread

6404242

3-way valve with actuator, setting time for 90°: 35 sec., Kvs value: 25
for FriwaMidi/Maxi-Kaskade, FriwaMega

Circulation set for Friwa cascade (Midi, Maxi, Mega)

6404136GM7

- with high-efficiency pump Grundfos UPM4 15-70 CIL3
- with piston valves, non-return valve and drain valve, connection 1" ext. thread

Circulation set for Friwa cascade (Midi, Maxi, Mega)

6404136GH10

- High-efficiency pump Grundfos UPML 25-105 N
- with piston valves, non-return valve and drain valve, connection 1 1/2" ext. thread

Circulation set for Friwa cascade (Maxi, Mega)

6404136GH12

- with high-efficiency pump Grundfos UPMXL GEO 25-125 N
- with piston valves, non-return valve and drain valve

Connection: 1 1/2" ext. thread

Application range

- Domestic hot water preparation operating on the principle of a flow-type water heater

The CE-conformity of the module has been certified according to DIN EN 60335 and SVGW.

Application range

- combined with thermal solar installations,
- in systems with a solid fuel boiler, oil or gas boiler,
- for the connection to a buffer tank,
- up to 492 l/min as a quadruple cascade (as per SPF LK 1)*

*For information on **design data**, see page 18 to 23.

Operating data

Max. pressure	primary: 3 bar, secondary: 10 bar
Max. operating temperature	95 °C
Min. flow rate	4 l/min
Max. flow rate as per SPF LK 1*	123 l/min
Transmission performance 1 as per SPF LK 1*	300 kW

Technical data

--	----------------

Accessories	Item no.
	6404135GH10 - with high-efficiency pump Grundfos UPML GEO 25-105 N - with piston valve and non-return valve Connection: 1¼" ext. thread
	640422 Flame-treated valves for sterile withdrawal of water. For the subsequent installation inside the DHW module, on each piston valve of the domestic hot water circuit.
	6404242 3-way valve with actuator, setting time for 90°: 35 sec., Kvs value: 25 for FriwaMidi/Maxi-Kaskade, FriwaMega
	6404244 3-way valve with actuator, setting time for 90°: 35 sec., Kvs value: 40 for FriwaMega-Kaskade
	64042820 64042830 64042840 Accessory set for cascading of two, three or four identically constructed domestic hot water modules (item no. 6407511 / 6407530). The two-way valves are pre-assembled and can therefore be easily installed in the cold water line. Thanks to the short opening time of the valve, there is no loss of comfort when connecting or disconnecting single cascade modules. <i>The pipe set for cascade must be obtained by the customer!</i>
	64042963 Insulated pipe set for the cascading of two DHW modules (item no. 6407511). - with two 2-way valves for switching 2x 64042963 <i>Please order 2x 64042963 for a 4-fold FriwaMega-Kaskade.</i>
	6404136GM7 - with high-efficiency pump Grundfos UPM4 15-70 CIL3 - with piston valves, non-return valve and drain valve, connection 1" ext. thread
	6404136GH10 - High-efficiency pump Grundfos UPML 25-105 N - with piston valves, non-return valve and drain valve, connection 1½" ext. thread
	6404136GH12 - with high-efficiency pump Grundfos UPMXL GEO 25-125 N - with piston valves, non-return valve and drain valve, connection 1½" ext. thread

The performance of the Friwa primarily depends on the temperature in the buffer tank which delivers the energy to heat up the domestic hot water module.

The demand of domestic hot water depends on the flow and the number of consumers. In larger apartment buildings, a certain statistic distribution of withdrawals can be observed. The following table gives a general overview of the application range of the different DHW modules.

Housing unit	70 °C / 60 °C / 10 °C	70 °C / 45 °C / 10 °C ***	60 °C / 50 °C / 10 °C ***

* The maximum output capacity depends on the pressure drop on the primary side.

** The maximum withdrawal quantity at the mixing valve depends on the length and the insulation of the pipes.

*** Maximum flow rate: 30 l/min, with pressure drop of the DHW module of 1000 mbar (for hydraulic reasons, higher values are only partly possible)

Example: The temperature in the heating storage tank (primary) is 65 °C and the hot water temperature set at the controller is 50 °C (secondary):

- With 65 °C in the heating buffer tank, a maximum of 18 litres of domestic water per minute can be heated to 50 °C.
- This withdrawal corresponds to a performance of 50 kW.
- In order to obtain 1 litre (or 100 litres) of hot water with a temperature of 50 °C, the heating buffer tank must contain 1 litre (or 100 litres) with a temperature of 65 °C.
- These 18 litres of warm water per minute with 50 °C can be mixed with cold water (10 °C) at the tap (mixing valve) to obtain 20 litres per minute with 45 °C. The primary return temperature for a withdrawal of 18 litres of warm water per minute is about 25 °C.

* The maximum output capacity depends on the pressure drop on the primary side.

** The maximum withdrawal quantity at the mixing valve depends on the length and the insulation of the pipes.

*** Maximum flow rate: 42 l/min, with pressure drop of the DHW module of 1000 mbar (for hydraulic reasons, higher values are only partly possible, measuring limit of the flow rate sensor ~42 l/min)

Example: The temperature in the heating storage tank (primary) is 65 °C and the hot water temperature set at the controller is 50 °C (secondary):

- With 65 °C in the heating buffer tank, a maximum of 27 litres of domestic water per minute can be heated to 50 °C.

- This withdrawal corresponds to a performance of 74 kW.

- In order to obtain 1 litre (or 100 litres) of hot water with a temperature of 50 °C, the heating buffer tank must contain 1.2 litres (or 120 litres) with a temperature of 65 °C.

- These 27 litres of warm water per minute with 50 °C can be mixed with cold water (10 °C) at the tap (mixing valve) to obtain 30 litres per minute with 45 °C. The primary return temperature for a withdrawal of 27 litres of warm water per minute is about 25 °C.

* The maximum output capacity depends on the pressure drop on the primary side. Assumption: 1 m wc
In the case of higher pressure drops, the maximum output capacity drops accordingly.

** The maximum withdrawal quantity at the mixing valve depends on the length and the insulation of the pipes.

*** Maximum flow rate: 88 l/min, with pressure drop of the DHW module of 1000 mbar (for hydraulic reasons, higher values are only partly possible, measuring limit of the flow rate sensor ~133 l/min)

Example: The temperature in the heating storage tank (primary) is 65 °C and the hot water temperature set at the controller is 50 °C (secondary):

- With 65 °C in the heating buffer tank, a maximum of 73 litres of domestic water per minute can be heated to 50 °C.
- This withdrawal corresponds to a performance of 203 kW.
- In order to obtain 1 litre (or 100 litres) of hot water with a temperature of 50 °C, the heating buffer tank must contain 0.9 litre (or 90 litres) with a temperature of 65 °C.
- These 73 litres of warm water per minute with 50 °C can be mixed with cold water (10 °C) at the tap (mixing valve) to obtain 83 litres per minute with 45 °C. The primary return temperature for a withdrawal of 73 litres of warm water per minute is about 19 °C.

Output capacity table FriWaMega

Temperature of the heating storage tank	Domestic hot water temperature set at the controller	Maximum output capacity* of the Friwa	Transmission performance	Required tank volume per litre of hot water	for an inlet temperature of 10 °C (cold water temperature) - maximum withdrawal quantity** at the mixing valve at				Return temperature to the storage tank
