# ABOUT US

P.W. DREMEX sp. z o.o. as a company was established in 1978 and initially it was associated with the production of wood and steel products for the mining industry. Over time, the company has evolved, focusing on the production of marble and synthetic granite. Vigorous development and investments in the latest, modern production facilities allowed us to become one of the largest producers of washbasins, shower trays and bathtubs in Europe.

We offer many different forms of cooperation with clients. One of them is the “white label” option, which allows you to create products under your own brand, thanks to the use of a wide selection of materials, structures and colours. In addition, we also offer popular models that reflect the latest trends, created on the basis of our original designs.

In our business, we place great emphasis on the quality, durability and timeless design of our products, which, combined with comprehensive service and attention to detail, allowed us to gain the trust of the largest European bathroom furniture manufacturers, design offices, wholesalers and shipyards.

It is a multi-generational family business with traditions. We are constantly improving our technologies, materials and the cooperation skills with our clients. Dremex products from our technology parks are delivered and used in public facilities, hotels, apartments and, of course, in homes and private apartments. One of the many advantages of Dremex products is their low weight, which allows them to be used, among others on passenger ships.

## OUR MATERIALS

**O**ur sanitary ware are made of the highest quality materials which stand out among common conglomerates. The raw materials we use combine great durability and flexibility, and thanks to the use of innovative methods, we are able to subject them to advanced processing.

# SYNTHETIC MARBLE

**S**ynthetic marble is a material with a homogeneous structure made of minerals, dolomite flour and polyester resins. Products made of this material have an outer layer of polyester gelcoat. Due to the combination of natural minerals and resin, synthetic marble is extremely durable and resistant to damage.

This method allows for almost limitless forming, and casting possibilities of the material. Therefore, synthetic marble is a perfect solution for people who appreciate elegance, functionality and durability of the materials used.

Synthetic marble is a material that stands out among typical conglomerates. It allows to satisfy the most sophisticated needs of our customers who look for non-standard furnishings to their exclusive interiors.

high durability and mechanical strength; it is resistant to impact, damage and scratching, the gelcoat coating protects it against all kinds of damage

easy to maintain; require only general use cleaning agents that do not contain caustic substances

uniform, homogeneous structure without any blemishes, veins or differential structure

flexibility; enables to make large-sized designs

extremely light compared to natural stone

antibacterial properties

# SOLID SURFACE

**T**he undeniable advantage of Solid Surface products is the possibility of repeated and traceless renovation without disassembly. Easiness to renovate causes that it can be used intensively for many years. The matte finish and the uniform structure of the Solid Surface make the wares fit perfectly into almost any interior arrangement.

Solid Surface is a mineral polyester material of versatile applications. It is a material with a homogeneous and porous texture, consisting of 70% natural minerals and 30% resin and hardeners. For this reason, it is often used in the arrangement of modern interiors, where its unique properties are appreciated by both architects and customers looking for high-quality and durable solutions.

high durability and mechanical strength;  
it is resistant to impact, damage and scratching,

easy to renovate; they can be renewed  
many times

uniform, homogeneous structure without  
any blemishes, veins or differential structure

huge arrangement possibilities; matches  
perfectly to wood, steel, stone or glass

easy to maintain; require only general use  
cleaning agents that do not contain caustic  
substances

antibacterial properties

# QUARTZ

**Q**uartz is a very popular, durable aesthetic composite material of a varied colour dyes. We create aesthetic and functional quartz countertops, sinks and washbasins. Our products are made of a combination of natural mineral fillers and binders. Quartz fillers are the main components of the materials from which we manufacture our products. It is the amount of approx. 70% supplemented by approx.. 30% by resins, dyes and hardeners.

The ratio and proportion of all ingredients used contribute to the high quality of our products. The high proportion of quartz gives unique hardness and also a natural stone look. Thanks to special resins, our sinks are characterized by exceptional durability. P.W. Dremex Sp. z o.o. offers wares in a wide range of colours – from white, through beige, brown, grey to deep black.

resistant to chemicals; the sinks do not discolour and are very easy to clean

high durability and mechanical strength,

easy to maintain; it does not require impregnation and specialized maintenance of the surface

available in a wide range of colour dyes

perfectly masks dirt

antibacterial properties

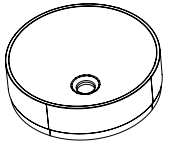

## OUR COLLECTIONS

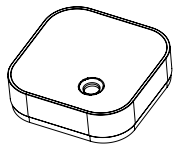

**T**o meet the expectations of our clients and the market, we decided to create three original collections. The idea that guided our designers during their work is to create a universal base that will be the starting point for our client's projects. We want to inspire and encourage you to experiment with our concepts, moreover, to create your own proposals. Many years of our experience and a rich technology park will help to implement almost every project.

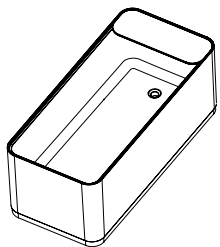

# GLOW COLLECTION

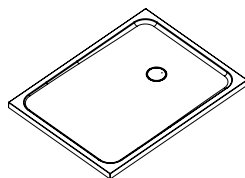

Washbasins Glow Circle

Washbasins Glow Square

Bathtubs Glow

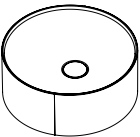

Shower trays Glow

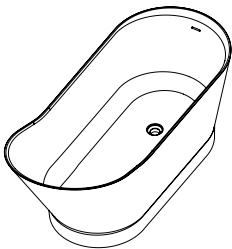

A subtly sophisticated cutting on each product from this collection gives it originality and makes sanitary ware not only essential bathroom equipment, but also elegant decorative modern interior elements.

The unique, gentle shapes and subdued colours of the products in this collection provide both elegance and timeless character. All products have been carefully designed in accordance with the principles of ergonomics to ensure quality, comfort and convenience of use.

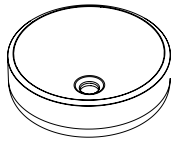

Washbasins Cozy

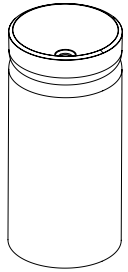

Bathtubs Cozy

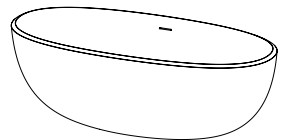

# SPACE COLLECTION

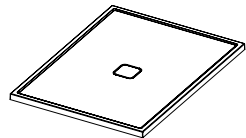

Washbasins Space

Washbasins Space Stand

Bathtubs Space

Shower trays Space

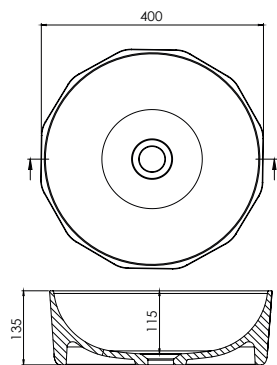

**S**tylish and timeless design that suits both modern and classic projects. All elements of the collection are perfect for arranging large, spacious rooms. The collection is distinguished by solid forms and a wide spacious bathtub element.

# WASHBASINS

**W**ashbasins are one of the many products on our offer. The wide selection includes various specifications, shapes and sizes, along with the possibility of making them of durable materials such as gelcoat, Solid Surface or quartz. The products we offer are the perfect combination of beauty and durability that will add splendor to any bathroom.

# SHOWER TRAYS

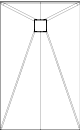

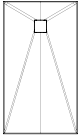

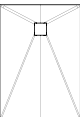

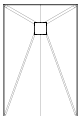

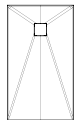

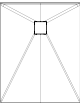

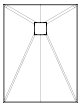

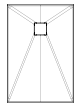

**O**ur synthetic marble shower trays are designed with attention to every detail. We produce them based on the same technology as the washbasins, so they can be used for many years without any changes in their look and durability. Their surfaces have increased resistance to mechanical damage and chemical agents, and most importantly, they are fully anti-slip. Moreover, at the customer's request, we make shower trays in various colours, structures and sizes.

# OUR PRODUCT COLOURS

Our products are available in many varied colours. Our production is dominated by a wide range of whites, from cool to warm shades: off-white with slightly grey, beige or blue hues. We also make products in black hues. At the customer's special request, we can do a project in any colour. All colours presented in the catalogue are available in gloss and matt finishes which allows you to match the products to different tastes and preferences of customers.

# QUARTZ COLOURS

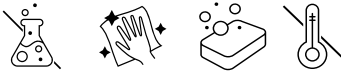

As a manufacturer of kitchen sinks, bathroom countertops and washbasins made of quartz, we offer sanitary products made of this material in a wide range of colours. A wide range of shades allows you to adjust our products to your individual aesthetic preferences.

# MAINTENANCE

## GLOSS SURFACE

1. For everyday care, we recommend mild dishwashing liquids, solutions of water and vinegar (e.g. in the case of scale deposits), or mild cleaning agents. Dirt (grease, oil, paint, ink, etc.) should be removed with soapy water or a mild detergent.
2. Products maintenance with inappropriate agents containing abrasive elements in their composition may cause damage to the surface (loss of gloss/tarnishing of the sanitary coating).
3. It is recommended to protect the product with natural waxes or generally available pastes and polishing milks used in the paint and coating industry.
4. Small scratches on the surface of the product can be removed using polishing paste.
5. Larger scratches can be removed with P1200 grit sandpaper, then P2000. When sanding, sprinkle the surfaces with a small amount of water. Then polish the matted surface with polishing paste applied to a cloth or felt fabric.
6. In the case of major damage, deep scratches or cavities, we recommend to purchase a repair kit appropriate to the finishing method directly from the manufacturer, and to comply with the instructions contained therein.
7. It is very important to avoid placing hot items directly on the surface.
8. Caustic chemicals left on the product for a long period of time may cause discoloration or damage. Keep solvents, acids, strong dyes and chemical cleaners away from the surface.

In case of direct contact with the surface - rinse with water immediately.

## MATT SURFACE

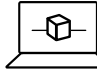

1. Matte finish products need to be cared for with mild dishwashing liquids, solutions of water with vinegar or universal cleaning agents that do not contain aggressive abrasives. Cleaning may require more effort than for gloss finish surfaces.
2. After each use, rinse the surface with running water and clean it with a cotton cloth or microfiber.
3. Dirt (grease, oil, paint, ink, etc.) should be removed with soapy water or mild detergents.
4. Minor scratches can be removed with a rough sponge or a slightly aggressive abrasive cloth.
5. In case of larger dirt, deep scratches or stubborn stains, additionally use P800/P1000 grit sandpaper. When sanding, the surface should be sprinkled with a small amount of water. Note: Abrasives should be used with great caution.
6. In the case of major damage, deep scratches or cavities, we recommend to purchase a repair kit appropriate to the finishing method directly from the manufacturer, and to comply with the instructions contained therein.
7. It is very important to avoid placing hot items directly on the surface.
8. Caustic chemicals left on the product for a long period of time may cause discoloration or damage. Keep solvents, acids, strong dyes and chemical cleaners away from the surface.
9. Once a month, it is recommended to apply an impregnation designed product for matte conglomerate surfaces or body oil (body oil can be used even once a week if necessary).

# COOPERATION

**T**hanks to many years of experience, we know how to fully adapt the product to the needs of our customers. We provide advice and professionalism at every stage of project implementation, starting from the initial consultation. Our products have been approved and certified for public use.

What is our competitive advantage – the fact that in most cases we implement individual projects of our clients. We also offer „white label” cooperation, i.e. the possibility of production with our client’s logo – we, as a producer, remain anonymous. We encourage you to contact us on our social media, by phone or e-mail via our website: [www.dremex.com.pl](http://www.dremex.com.pl)

# COOPERATION STAGES

- **1** initial consultation
- **2** our designers create 2D and 3D models
- **3** accept the project
- **4** preparation of a light 1:1 scale prototype
- **5** once the project approved, the production starts
- **6** product casting
- **7** finishing the product
- **8** product delivery
