“Thanks to our global reach with a local presence we deliver high quality products that meet local market needs.”

ABOUT US

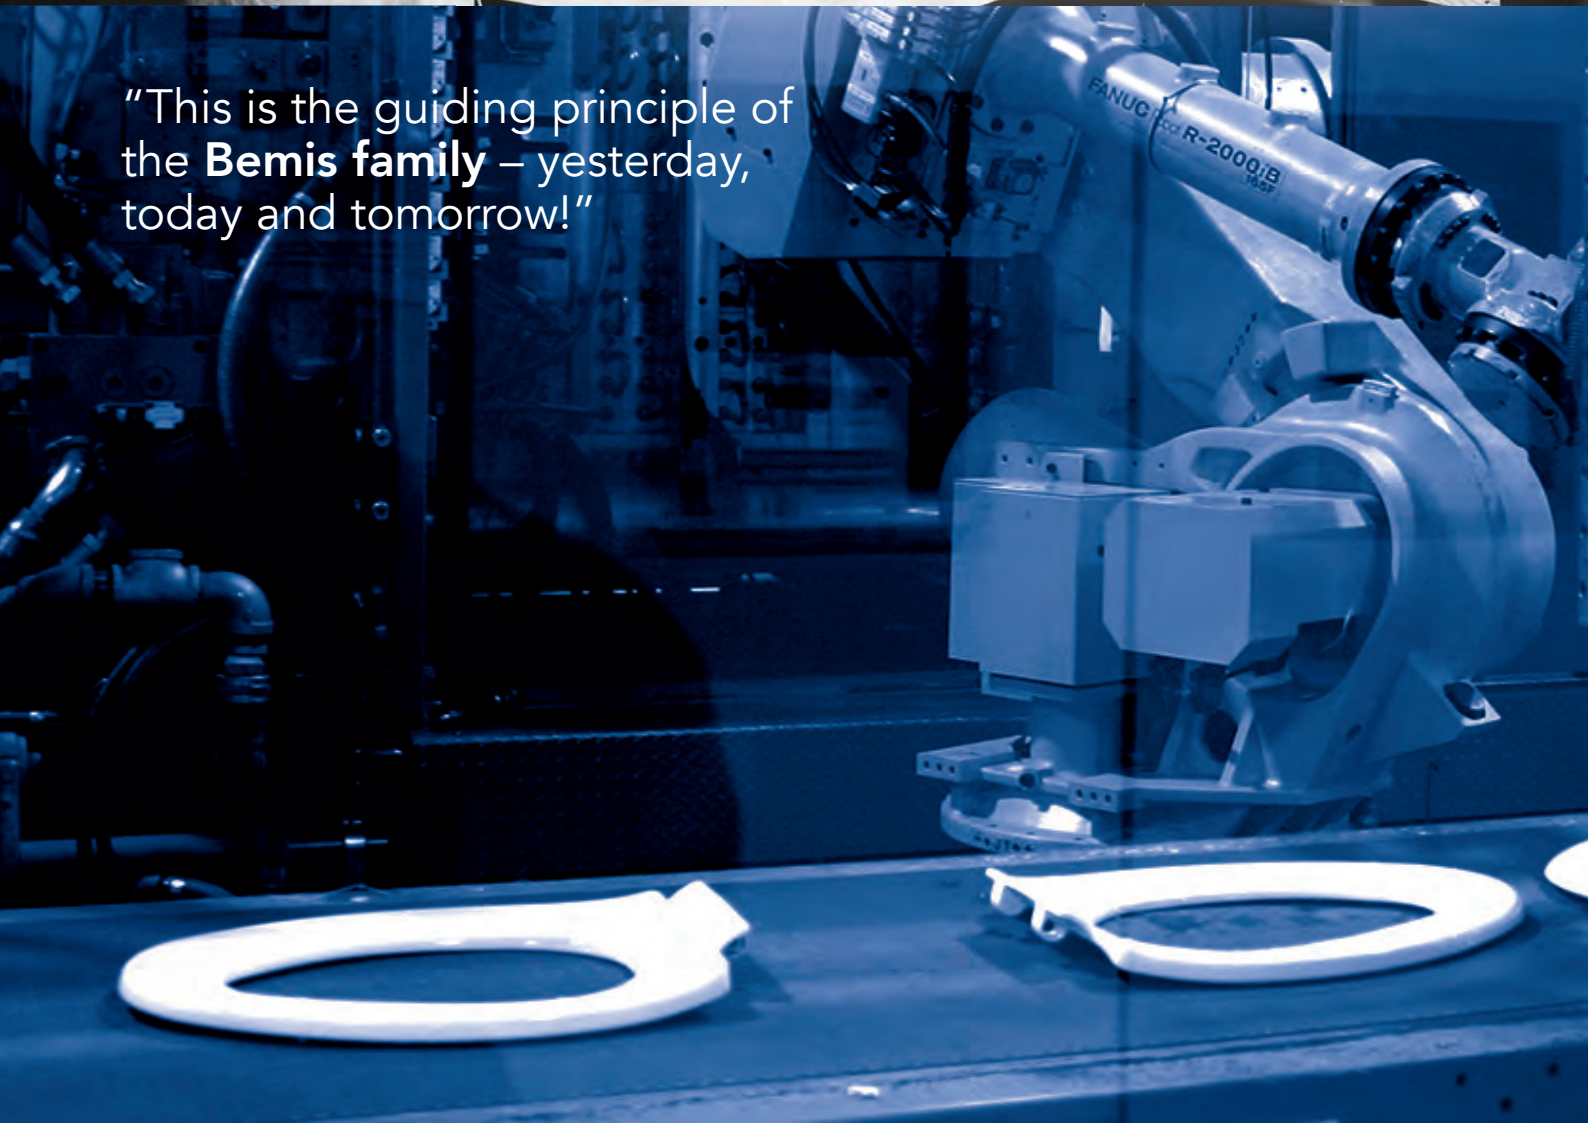

Whether you need a toilet seat for your bathroom or for a public space such as; a hotel, office or business. Bemis has a toilet seat that meets all your requirements.

Our products have all the necessary characteristics that guarantee comfort, hygiene and excellent stability. They are functional, innovative and designed to meet the highest standards. In order to ensure maximum customer satisfaction, each product is individually tested. We are proud to offer you high quality toilet seats.

Bemis has been producing toilet seats since 1932. Producing more than several million pieces each year, Bemis Manufacturing Company is the world's largest manufacturer of toilet seats. Our products are available in Europe, North America, Asia and the Middle East with 6 production locations worldwide and offices in several countries.

"For over 120 years, we have focused on solutions and innovations that make our customers' everyday better."

"This is the guiding principle of the **Bemis family** – yesterday, today and tomorrow!"

“Our attention to detail ensures unique, durable and long-lasting products of the highest quality.”

QUALITY

At Bemis, we test all new products in our in-house laboratory and commission independent tests at external testing institutes. This means our products meet both our own high standards and those of our customers.

These quality tests are carried out as standard before a product is launched into the market and regularly during production afterwards.

- Torque test
- Impact and drop tests
- Torsional stiffness / torsion test
- Side-to-side testing

"True craftsmanship is the real beauty of good design."

CRAFTSMANSHIP

Since 1932, we have been manufacturing toilet seats using craftsmanship and innovative manufacturing processes.

Every step of the process is designed to give our products the attention to detail which makes our products the best seat in the house.

With every toilet seat, we aim for seamless blending into existing bathroom and sanitary areas. With our wide range of products, a Bemis toilet seat makes your daily routines a little more pleasant.

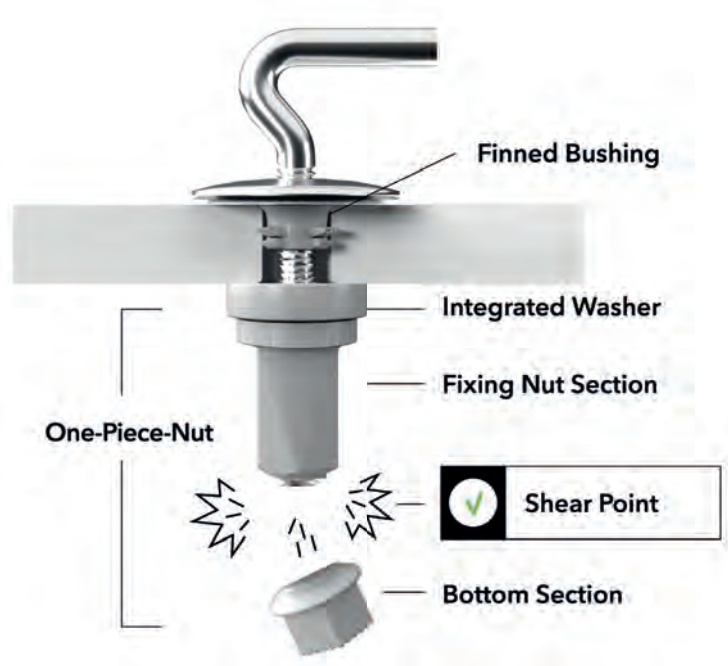

“Over 120 years of industry knowledge, regular engagement with customers and partners, market surveys and trend analysis is the basis for development of new products.”

INNOVATION

When developing new models, features and launching new product categories, we always ask ourselves: Will this product improve our customers everyday life? Do we offer added value for the private household? For the public WC? Or for the professional installer?

A selection of our current innovations:

- Bemis Ultra-Fix®
- Bemis Click & Clean®
- Bemis Click & Clean® Silent

“We purchase and re-use other manufacturers’ wood waste, recycling more than 30 million kg of wood waste annually”

RESPONSIBILITY

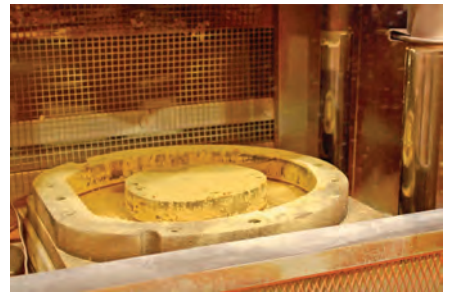

Within Bemis, we are constantly looking for ways to improve our products, production, logistics and distribution chains but also to use more sustainable materials.

Of course, the durability and recyclability of our products help to reduce the amount of individual and global waste. In this way, we are constantly improving the sustainability of our products and reducing our environmental footprint. We invest in the development of environmentally friendly products and packaging. We produce using ecologically balanced components and processes. We support local and international projects that are committed to environmental protection.

OUR MATERIALS

- Moulded wood
- Duroplast
- Thermoplast

RECLAIMED MOULDED WOOD

For our moulded wood seats we exclusively use the finest wood flour, which we produce in our own factory from moulded wood remnants from industrial wood processing.

Sawdust and wood shavings are ground into a fine wood flour in our factory. In the process, even the smallest metal particles e.g. nails and screws are removed.

This wood flour is mixed with a resin granulate and pressed using mechanical weights into ring and cover molds, similar to the pressure molding process used for duroplast seats.

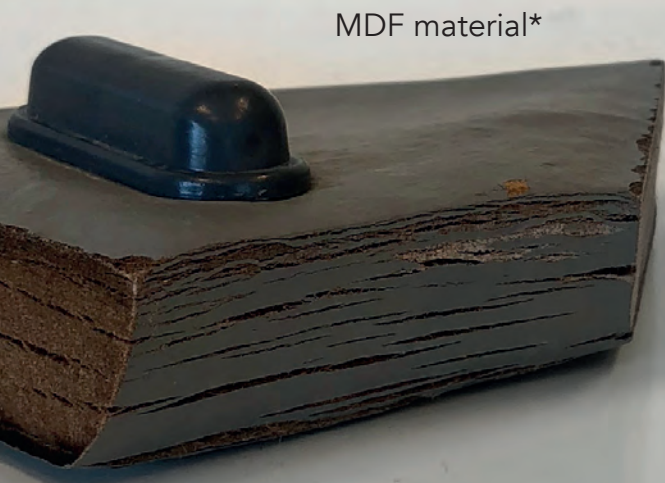

Finally, 6-axis robots are used to drill and buffer the hinge and buffer mounts in exact positions. The moulded wood rings and covers are painted with environmentally friendly water-based paint, assembled and packed and shipped to our customers.

Bemis Moulded Wood seats are:

- Pleasant and warm in contact with the skin
- Solid and reliable
- High quality and assembled by hand
- Made of environmentally friendly material
- Painted with water-based paint

video

MDF material*

Bemis Moulded wood*

* Sample pieces after submersion for 24h

Regular MDF

- MDF (Medium Density Fibre board) is a product made of wood fibres and has a medium density.
- Due to the coarse structure of the material, MDF is susceptible to water and contamination.
- In the event of prolonged contact with water (or water vapour), MDF seats can warp, swell or even break.
- The production process generates a high proportion of wood waste.
- 3-dimensional design requires more effort and elaborate work steps.

vs.

Bemis moulded wood

- Wood flour and synthetic resin form a stable and high-density bond.
- Resistant to repeated contact with liquids and even submersion.
- The use of wood flour and the reuse of surplus material means practically no waste is produced.
- The factory's own processing of wood into wood flour ensures an exact composition e.g. of various hard woods.
- The use of wood flour also ensures control of the contours and surfaces.
- All this allows for consistent high quality.

DUROPLAST

Duroplast is a scratch and heat resistant material. A special mixture of urea and pure plastic granulate is used to produce Duroplast. During production, a closed and pore-free surface is achieved, which has a natural antibacterial effect. Bemis Duroplast seats are:

- Durable with a premium look
- Have ceramic-like smooth surface
- Natural anti-bacterial effect
- Easy to maintain
- Highly resistant to most cleaning agents

Our Duroplast seats are produced in a pressure molding process. In this process the powder material is melted in the moulding tool and brought into shape.

While the seats are still warm, they are filed and polished manually before they are left for (at least) 24 hours to cool down.

THERMOPLAST

Manufactured from polypropylene. Our thermoplastic toilet seats are manufactured to deliver a virtually unbreakable product that is versatile for any type of environment.

Bemis thermoplast seats:

- Immediately give a skin-warm surface feel
- Available with 100% recycled granules
- Almost indestructible in normal use

Manufactured from polypropylene. Our thermoplastic toilet seats are manufactured to deliver a virtually unbreakable product that is versatile for any type of environment.

Colourant is used within the plastic pellets, so a consistent colour is seen through every layer of the product, ensuring the colour will not fade or change over time. Because it is made using polypropylene, the ring and cover are both 100% recyclable.

INNOVATIVE SOLUTIONS

- Bemis Ultra-Fix®
- Bemis Click & Clean®
- Bemis Click & Clean® Silent

Fitted in seconds,
sits forever

BEMIS ULTRA-FIX®

The finned bushing is an essential element of the Bemis Ultra-Fix® hinge fixing system. It holds the hinge in the correct position for optimal fixation.

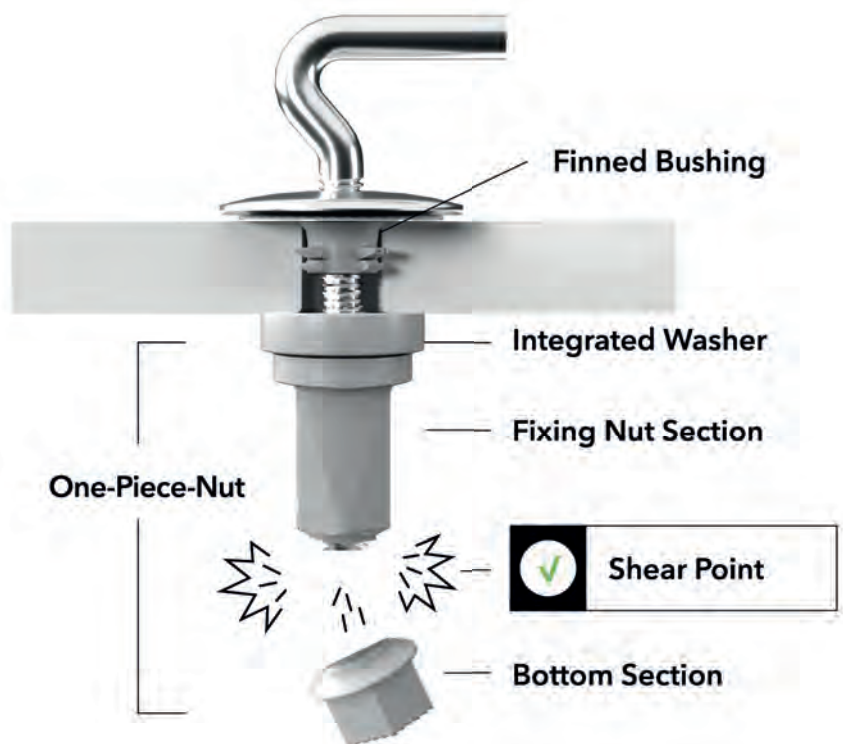

By tightening the fastening screw with the optimum torque, the pre-installed washer is pressed against the ceramic and compensates for minor unevenness in the surface of the ceramic.

When tightening the screw, the lower part snaps off when the optimal tightening torque level is reached.

This indicates that the screw connection is tight enough and has enough space to avoid crushing the washer or the seals.

Scan the QR code
to watch our
video

Bemis Ultra-Fix® is easy to install in 3 simple steps

1

Insert the finned bushing into the mounting hole and hand tighten the nut. The finned bushing provides a snug fit and prevents movement.

2

Tighten the nut with a spanner. The one-piece plastic nut is designed to provide superior clamping force

3

Tighten until the bottom of the nut snaps off at the optimum tightening torque, locking the seat down perfectly tight.

Take hygiene
to the next level

BEMIS CLICK & CLEAN®

We all prefer to use a clean toilet, cleaning the area around the hinges and the back of the toilet seat is often difficult, unpleasant and time consuming. Take hygiene in your bathroom to the next level with our quick release system!

The Bemis Click & Clean® quick release system allows you to quickly release and lift off the seat making it easy to clean the hinges, back of the ceramic and even the seat itself!

Simply open both ring and cover into an upward position and push the seat down to release, and lift off (you will hear a light click).

Benefits

- The easiest way to clean
- Instant take off, no buttons
- Access all hard to reach areas
- The most hygienic solution

video

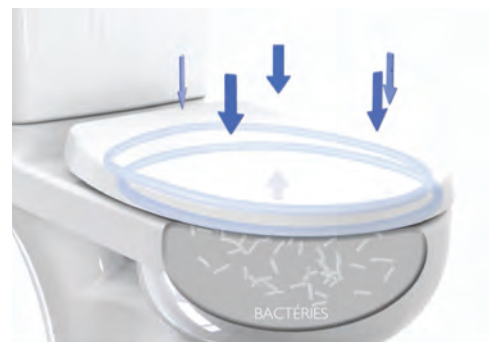

Double sealed
protection

BEMIS CLICK & CLEAN® SILENT

The Silent toilet seat is equipped with two silicone seals around the ring and cover. These silicone rings create a water tight seal (when the cover is closed) which prevents the release of aerosols, odours and splashes from the toilet ceramic into the bathroom. Closing the ring and cover during the toilet flush creates a vacuum that reduces flush noise and improves the flush power.

In addition, The Bemis Click & Clean® quick release system allows you to quickly release and lift off the seat making it easy to clean the hinges, back of the ceramic and the seat itself.

ECO TOILET SEATS

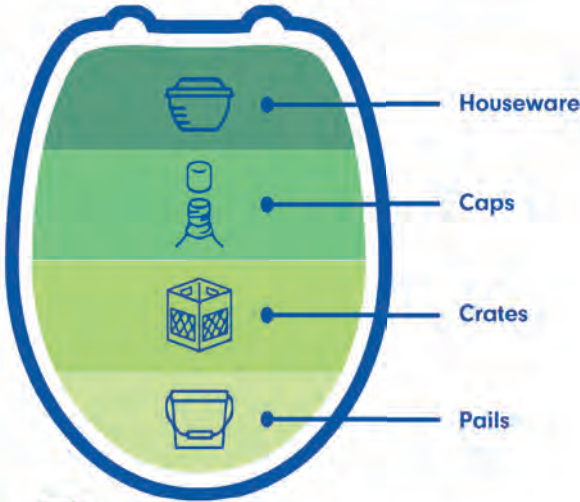

Eco toilet seats are environmentally friendly toilet seats.

They are made of environmentally friendly material because 95% of the composition comes from recycled raw materials that we use in the production process.

Why choose a recycled product?

Every year the demand for plastic is increasing and we create more and more of it. However, it pollutes oceans and the environment. By using products made from recycled materials, you participate in reducing waste and CO2 emissions. In accordance with the values we believe in, Bemis participates in the circular economy movement and therefore decided to launch a range of ECO toilet seats.

MADE FROM RECYCLED PLASTIC

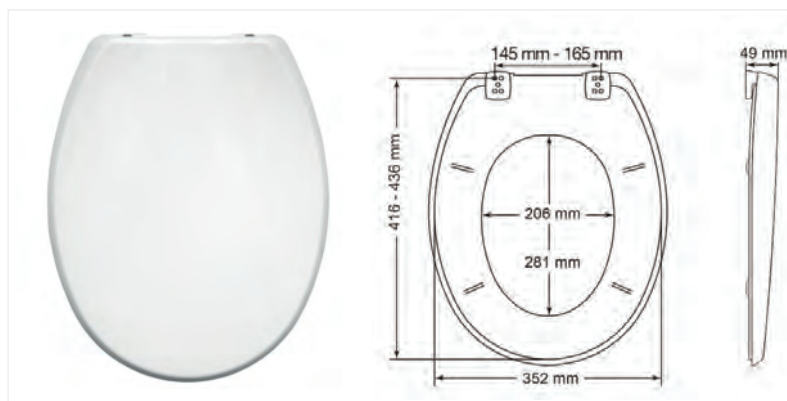

Contains at least 95% recycled post-consumer material from pre-sorted plastic packaging waste.

TIPS FOR CLEANING AND CARE

We want you to enjoy your Bemis toilet seat for a long time. Therefore, please pay attention to our instructions for cleaning and maintenance.

To ensure that the best seat in your home remains your favourite place for a long time, treat it with care. It will thank you with a long life and a permanently good sitting experience. Aggressive cleaning agents for the ceramic bowl are not suitable for toilet seats. They can damage the surface of the toilet seat and lead to discoloration.

Clean your Bemis seat using warm soapy water and a soft cloth. Clean your toilet seat regularly and prevent dirt deposits.
