

# TORO 25

PPR PIPES AND FITTINGS

## FIBER EvO PIPE

TORO 25 FIBER EvO system consists of three-layer pipes made of PP-R EvO, Random Copolymer Polypropylene with special and improved crystalline structure, reinforced with glass fiber, used for the adduction of pressure fluids.

The special PP-R EvO blend with glass fiber provides mechanical stabilization in case of thermal expansion, giving the pipe a linear expansion coefficient equal to 0.04 mm/m °C. TORO 25 FIBER EvO system is used in hot/cold water supply systems in the residential, commercial, industrial and naval sectors.

## Advantages

- non-toxic materials
- easy installation
- lightness
- durability

- efficiency and versatility
- no noise and vibration
- safety against: frost, corrosion, abrasion, deposits, condensation, heat loss, stray currents
- 100% recyclable
