

TORO 25

PPR PIPES AND FITTINGS

THREADED FITTINGS

TORO 25 metal insert guarantees the ultimate in security and reliability. It is made of certified Italian brass, and it is featured by a special internal and external threading that perfectly anchor to the plastic part and ensure the maximum resistance against possible infiltrations and the maximum flexibility to both internal and external mechanical stress.

It has an internal coating, which does not allow liquids getting into contact with metal parts, in order to avoid corrosion processes and to ensure the long life of installations.

Advantages

- non-toxic materials
- easy installation
- lightness
- durability
- efficiency and versatility
- no noise and vibration
- safety against: frost, corrosion, abrasion, deposits, condensation, heat loss, stray currents
- certified raw material
