

Palette CAD

For bathroom design.

impressive - inspiring - persuasive

The 3D software for bathrooms and tiling.

Palette**CAD**

**Let's craft
your digital journey.**

From consultation to dream bathroom, our software handles all your workflows

Palette CAD is the fast and secure bathroom design software that suits your working methods and supports you every step of the way. From a captivating presentation through to rapid design and reliable project delivery, you follow one continuous process on the basis of the same data throughout – so you can get creative with your bathroom designs while working more quickly, with more accuracy and with more freedom.

1 CAPTIVATING: Your virtual showroom

Inspire potential clients from the very first meeting. Show them photo-realistic 3D views of your projects with various perspectives and display modes – at your clients' sites or as an extension to your own showroom.

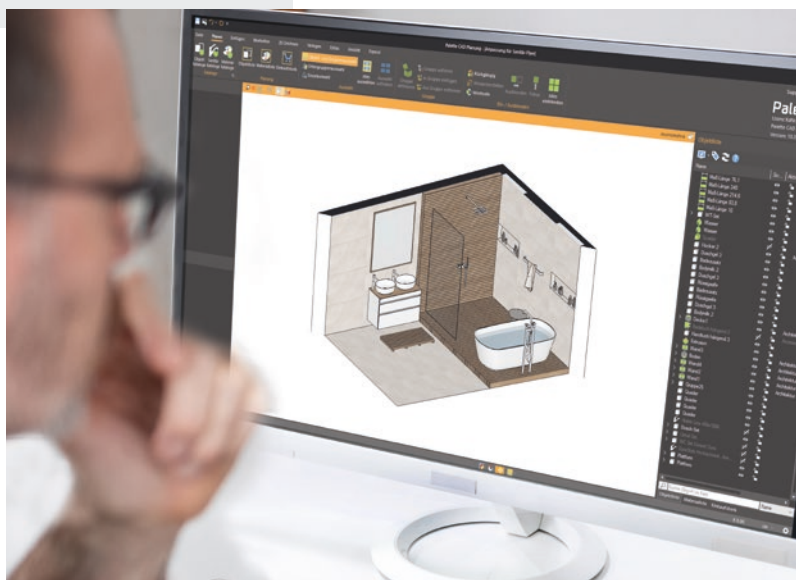

2 ACCURATE: Digital measurement

From handheld laser measuring devices and 3D room scanners to mobile apps, Palette CAD provides various options for integrating digital measurements into the software. The imported data serves as a precise basis for your plans.

3 FAST: Create designs with Palette CAD

Effortlessly plan with our intuitive 3D planning software, ensuring speed, ease, and security. Benefit from comprehensive manufacturer catalogues, including ARGE data, with real-time product information integrated directly from the source data, and advanced tiling technology. You can share your plans immediately with clients and other tradespeople or contractors via the cloud and the web viewer.

4 PERSUASIVE:

Visualise and showcase your designs

Palette CAD brings your designs to life – with photo-realistic 3D displays or a creative marker look, augmented reality, 360° panorama views or virtual camera flights. The sky's the limit for your creativity, and professional views of your designs will help win over your clients.

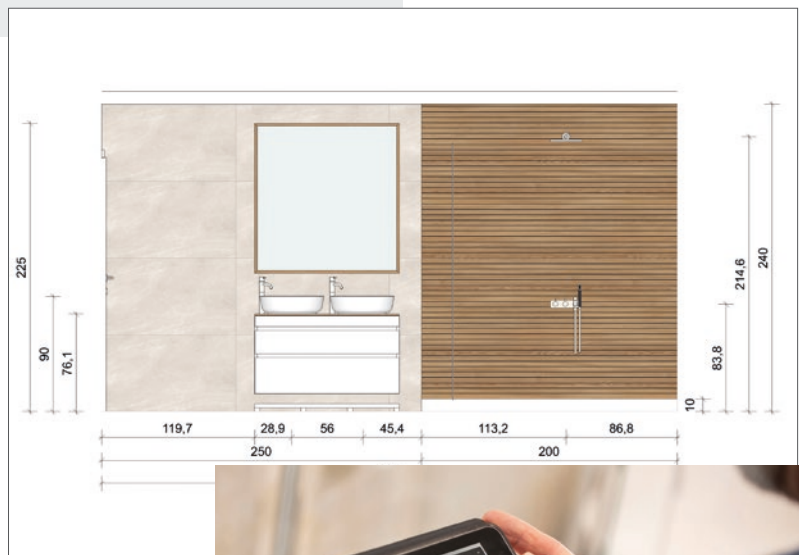

5 COMPREHENSIVE:

All your work preparation steps covered

Palette CAD allows you to create a comprehensive folder for the building site. It's a matter of a few clicks to create an exposé for your client meeting, including a dimensioned plan view and front view plus visualisations of all perspectives and display options.

Automatically generated bills of materials for all the required products and materials give you a complete project file and make life easier for your colleagues working on the building site.

Successful craftspeople rely on Palette CAD

Customer service

Support from technical experts

Our service team have comprehensive bathroom design expertise and are on hand to answer questions about your 3D software. Technical problems can be resolved by our experts over the phone, by email or via remote maintenance so that you can continue working as soon as possible.

Experience and development

Tried, trusted and constantly optimised

Over 30 years, we have proudly issued over 27,000 software licences. The trust of our users drives us.

Palette Academy

Go digital at your own pace

Take your capabilities to the next level – with training from the Palette Academy. You can train when and where you like with our wide range of e-learning courses. Our practical courses are designed to suit all levels of expertise – whether on site at our training centres, via online training or with e-learning. Professionals from your sector will explain how to use the various features of our software and help you become a planning pro!

Palette Cloud

Work securely wherever you are

Palette Cloud lets you work anywhere at any time – at your business, from home, on site with your customer, on the go ... Your data is securely stored and can be accessed at all times, for when you need to speak to clients and other people involved in the project.
