TherMold

Formed with TherMold Technology at High Temperature Expertly Produced by ORKA

Eco-friendly

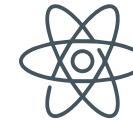

Durable

Aesthetic

Sustainable

Pioneer

Safe

Our **TherMold Technology** is the ideal solution for humid and wet areas such as bathrooms, offering exceptional resistance to moisture. By utilizing PVC-based materials and forming them under high heat, we create products that combine durability and precision.

Thanks to its special adhesive application, this technology is particularly suited for moisture-prone areas. These series are eco-friendly, providing high chemical resistance, UV stability, ease of maintenance, and long-lasting performance.
