

R<THiNK

LCAs, EPDs, and CFPs with R<THiNK

Quantify and communicate your
environmental impact

kiwa

Demonstrate sustainability with reliable data

Sustainability is no longer a choice—it's a necessity. Companies worldwide must assess and communicate their environmental impact with transparency and accuracy. Kiwa's R<THINK program helps you create verified Life Cycle Assessments (LCAs), Environmental Product Declarations (EPDs), and Carbon Footprints (CFPs), ensuring compliance with international standards.

Make sustainability measurable and actionable

More than ever, businesses need to back up their environmental claims with credible data. Kiwa ensures that your sustainability efforts stand up to scrutiny, helping you meet industry requirements and gain a competitive edge.

How it works

- **Data collection** – Identify and assess the environmental impact of your product or service.
- **Analysis & calculation** – Conduct an LCA to measure resource use, emissions, and environmental footprint.
- **Verification & certification** – Ensure compliance with industry standards and achieve Kiwa certification.
- **Publication & communication** – Use your certified EPDs and CFPs to inform stakeholders and customers.
