# Ensuring safe and compliant drinking water products with Kiwa

Safety and quality in the field of drinking water are of great importance. To ensure this, all materials that come into contact with drinking water must meet certain requirements so as not to affect drinking water quality. All products must therefore be tested professionally before they are released on the German market. The regulations are regulated by the Federal Environment Agency (Umweltbundesamt). As accredited certification and testing body according to ISO/IEC 17065 and 17025, Kiwa supports you in guaranteeing the safety of your products.

- First **accredited certification body** in Germany according to the UBA recommendation: 'Conformity attestation of product hygiene suitability for drinking water.'
- **Competent contact persons** who are always available and support you in all questions.
- Testing and inspection from **one source, in one house.**

**We are your reliable partner in ensuring safe and sustainable drinking water products. Let us help you meet the highest standards with our expert services and certifications.**
