

# Enamel Wall Materials Craftsmanship

## Kitchen

Durable and easy to clean  
Acid-resistant and corrosion-proof

## Metro station

Enamel boasts a glossy porcelain finish with delicate texture and color.

It serves as the perfect artistic decoration for buildings or public projects.

## Interior Panel

Enamel is made from inorganic materials with excellent chemical stability.

Its smooth, non-porous surface resists bacterial absorption and is free from harmful substances such as antimony, lead, and cadmium, making it both non-toxic and safe.

## Bath And Washstand

## Customizable in Various Color Options

Enamel materials merge the strength of metal with the acid-resistant and corrosion-proof qualities of glass, making it a highly durable and easy-to-clean choice for architectural decoration.
