

LABA-TEX

NEW GENERATION SOLUTIONS FOR WATER LEAKAGE

SMART SOLUTION FOR WATER ISSUES

Armtechnology is a Europe-based manufacturer of next generation water absorption tools that are designed to protect property from unexpected flooding or leakage.

The star product in our range of tools is our SMART WATER SOLUTION DEVICE. This product is characterized by its unique 2-in-1 performance functionality that blends intelligent technology with a device that operates as a water flow detector. In the event of a leakage or flooding, the tool emits an emergency alarm signal whilst simultaneously absorbing any excess water flow.

SMART WATER PROBLEM MAINTENANCE SOLUTION

A unique 2 in 1 product and the only device of its kind on the market:

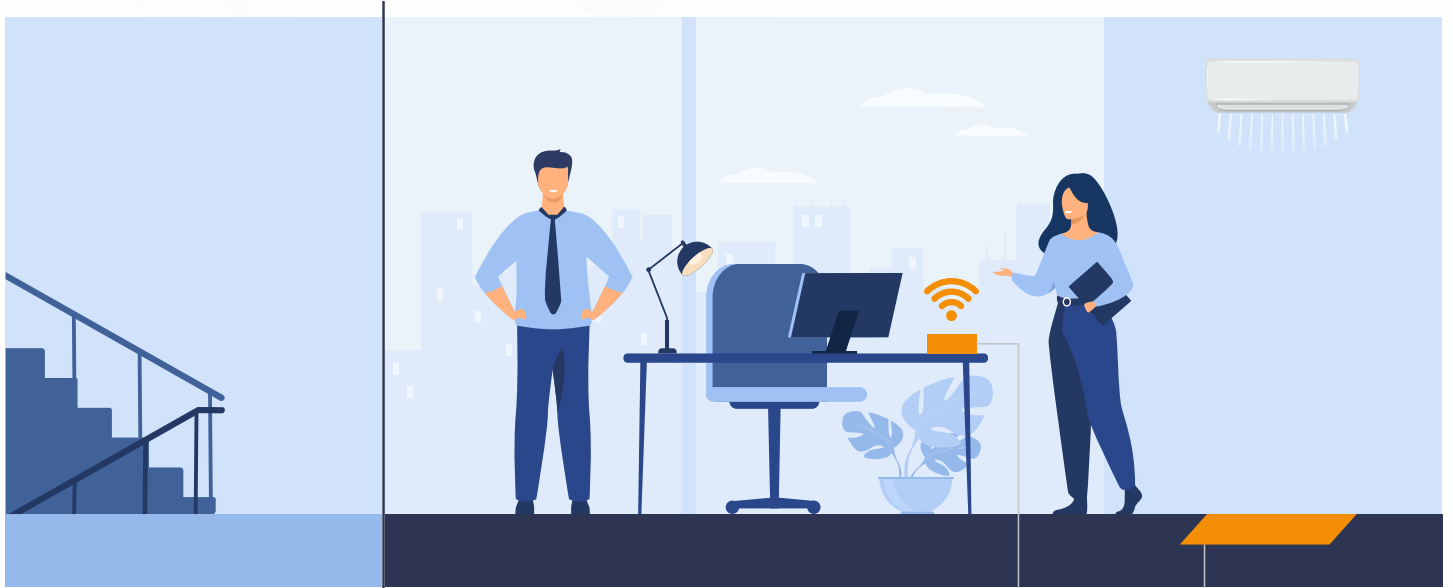

- Sends notification of any water-related issue: sending an immediate alarm signal to any connected mobile device;
- Immediately begins to absorb any excess or non-regular waterflow.

The device can simultaneously monitor and protect up to 250 areas of potential water leakage.

Easy to use and handle.

LABA-TEX

2 IN 1: WATER DETECTOR AND WATER ABSORBENT

CONTROL PANEL

- It is a **mini-computer**, designed to send notifications to administrator.
- Can control **up to 250 water absorbers** with detectors.
- Operates with detectors **by radio frequency communication**.
- It is a **wireless** device.
- **Multi-use**.

WATER ABSORBENTS

- Essential for the **maintenance of buildings** where there is a risk of water leakage.
- Designed to **absorb water** in the event of a water accident.
- Acts as a barrier, **absorbing and trapping the water** to prevent it from flowing further.
- 1 absorber can hold up to **8 liters** of water.
- Disposable.
- Up to 250 water absorbers can be connected to the control unit.
