COMPANY PROFILE

公司简介

Thomas T Intelligent Technology Co., Ltd established in 1988. and located in Wuxi, Jiangsu, China.

It is a high-tech enterprise in intelligent control that integrates R&D, production, sales, and service.

We provides intelligent solutions for many customers in heating and cooling systems such as heating, central air-conditioning fan coil units, radiant floor heating, energy-saving control, industrial automation control, building smart home and building energy saving.

Our products are exported to more than 60 countries and have been widely praised and trusted by domestic and foreign users. We always adhere to customer demand and provide professional customized design services, covering ODM production and OEM production.

With more than 30 years of manufacturing experience, we have successfully launched Wuheng comfort system products, intelligent control actuators, analog quantities, proportional control, and other series of products.

Thank you very much for your attention to us, we will continue to work hard to provide you with better products and services. We look forward to further cooperation with you in the future .

托马斯唐---无锡市托马斯唐智能科技有限公司, 始建于1988年, 位于江苏无锡。

托马斯唐公司是集研发、生产、销售及服务于一体的智控领域高新科技企业, 旨在为供暖、空调、通风及净化行业, 工业自动化控制及楼宇自控等智能管理领域提供全面的系统解决方案。

我们的产品远销 60 多个国家, 得到国内、外用户的广泛赞誉和信赖, 始终坚持以客户需求为导向, 提供专业的定制设计服务, 涵盖 ODM生产和OEM生产。

凭借三十多年的工厂制造经验, 我们成功推出了五恒舒适系统产品、智能控制执行器以及模拟量、等比例控制等系列产品。

我们将继续努力, 为您提供更优质的产品和服务, 未来期待与您的进一步的合作。

Thomas T 托马斯唐

欢迎来到托马斯唐智能科技有限公司, 一家致力于智能控制领域的高科技企业。我们专注于无缝集成研发、生产、销售和服务, 提供卓越的解决方案。

Welcome to Thomas T Intelligent Technology Co., Ltd, a pioneering high-tech enterprise dedicated to the realm of intelligent control. We specialize in seamlessly integrating research and development, production, sales, and service to deliver exceptional solutions.

Mission 使命

在托马斯唐, 我们的使命是提供全面的系统解决方案, 跨越各个领域, 包括供暖, 空调, 通风, 净化, 工业自动化控制, 和楼宇自动化。我们的目标是加强这些行业的智能管理。

At Thomas T, our mission is to provide comprehensive system solutions across various sectors, including heating, air conditioning, ventilation, purification, industrial automation control, and building automation. Our goal is to enhance intelligent management across these industries.

Expertise 专业知识

我们以专业的技术团队而自豪, 他们以强大的研发能力和严格的质量控制而闻名。我们的专业知识确保我们提供创新和可靠的解决方案, 以满足客户不断发展的需求。

We pride ourselves on our professional technical team, renowned for their robust R&D capabilities and stringent quality control. Our expertise ensures that we deliver innovative and reliable solutions to meet the evolving needs of our clients.

Global Reach and Partnerships 全球影响力和伙伴关系

凭借全球业务足迹, Thomas T与自动化行业内的许多知名企业保持着密切的合作关系。我们的合作伙伴关系建立在共同成长和创新的共同愿景之上。

With a global business footprint, Thomas T maintains close collaborations with many esteemed enterprises within the automation industry. Our partnerships are built on mutual growth and a shared vision for innovation.

Our Commitment 我们的承诺

我们致力于与我们的合作伙伴共同努力, 打造一个以舒适、健康和节能为优先考虑的未来。我们的目标是共同创造一个更加可持续和智能的世界。加入我们的旅程, 为智能控制和管理的未来带来革命性的变化。

We are committed to working alongside our partners to foster a future that prioritizes comfort, health, and energy efficiency. Together, we aim to create a more sustainable and intelligent world. Join us on our journey to revolutionize the future of intelligent control and management.

配套动态平衡阀选型表 PICV

阀门不受系统压差波动的影响，能够在任意流量设定范围内保证全程的调节控制。通过优化的调节控制，阀门能够减少系统过流和水泵负荷，从而显著降低整个系统的能耗。阀门的快速响应和自动调节控制大大提高了系统的稳定性，使得温差得以最大化。
The valve is not affected by fluctuations in system pressure difference and can ensure full-stroke modulation control within any flow setting range. By optimizing modulation control, the valve reduces system overflow and pump load, significantly lowering the overall energy consumption of the system. The valve's quick response and automatic modulation control greatly enhance system stability, maximizing the temperature differential.

智能控制型
Intelligent Control

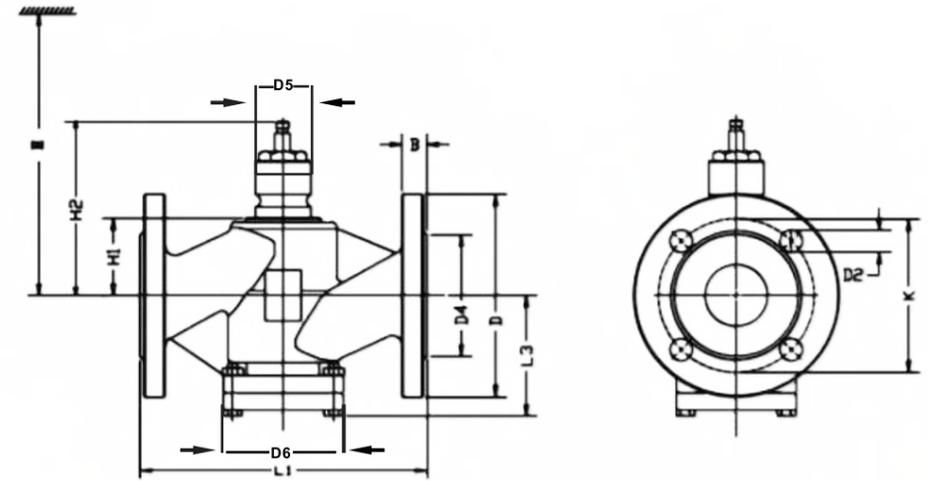

智慧控制型直行程执行器，控制端按键调节带屏显示，开阀位置、运行方向、运行速率等参数可视化。动力源由直流无刷电机驱动，高寿命、高负载、低功率、低噪音，工作节能，控制精度高，动力输出更加稳定、迅速。内部负载结构采用高等级轴承保证传动精度，高强度合金齿轮保证工作寿命。与阀门配合的连接接口采用合金铸造工艺，强度牢固可靠，适配多种型号阀门接口，可应用于各款大型阀门的精准控制和调节。

Intelligent control type linear stroke actuator, control port button adjustment with screen display, valve opening position, operation direction, operation speed and other parameters visualization. The power source is driven by DC brushless motor, with high life, high load, low power, low noise, energy saving, high control accuracy, and more stable and rapid power output. The internal load structure uses high-grade bearings to ensure transmission accuracy, and high-strength alloy gears to ensure working life. The connection interface matched with the valve is made of alloy casting technology, with solid and reliable strength. It is suitable for various types of valve interfaces, and can be used for precise control and adjustment of various large valves.

Switch Type/ Adjustable Type智能控制型
Intelligent control

此产品适用于地暖和中央空调中水系统阀门的开关控制，可应用在不同款式的两通和三通阀门上，最大可适配DN50的阀门。在支持电压调节、温度控制、温差控制等功能的同时，可选择增加PCT加热、水泵控制和RS485通讯功能。

The ZBA series electric ball valve actuators are used to control the opening/closing of different 2-way and 3-way valves(up to DN50) in the water system of under-floor heating and central air conditioning. While supporting voltage regulation, temperature control, temperature difference control and other functions, PCT heating, water pump control and RS485 communication functions can be added.

多回转电动执行器 Electric Multi-Rotation Actuator

ZBF

智慧控制型多回转执行器。此系列产品可传输输出10Nm的扭矩作为阀门的控制端，可直接应用于水系统中的多回转阀门的控制与调节。可接受四种形式的控制方案，从而做到阀门中介质流量的调节，达到精准控制系统中流量和压差的目的。

Intelligent control type Multi-Rotation actuator. This series of products can transmit a torque of 10Nm as the control end of the valve and can be directly applied to the control and adjustment of multi-turn valves in water systems. Four types of control schemes are acceptable. To adjust the medium flow in the valve and achieve the purpose of accurately control the flow and pressure difference in the system.

角行程电动执行器 Electric Rotary Actuator

智能控制型
Intelligent control
ZBL

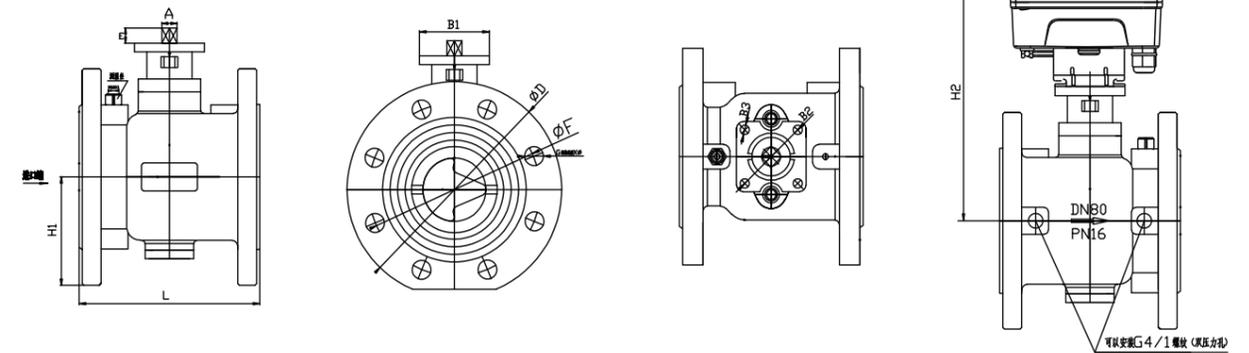

自动控制模式(温度、温差)下,执行器的实际运行逻辑基于PID控制算法原理进行控制,每隔一段时间动作一定开度,直至阀门开度逐步稳定在所需的预设值,间隔时间与运行距离可通过RS485远程进行更改,出厂默认20分钟。高寿命,高节能,低功率,低噪音,开阀位置精准检测,扭矩控制稳定,不损伤阀门,节能外转子无刷电机提供动力源,带参数设定及阀门行程记忆功能。

In the automatic control mode (temperature, temperature difference), the actual operation logic of the actuator is controlled by the algorithm principle based on PID control. The valve will be opened to certain position at intervals until the opening degree is gradually stabilized at the required preset value. The interval time and running distance can be changed remotely through RS485, and the factory default is 20 minutes. Low noise and long life, Accurate opening detection, Stable torque control, don't damage valve, Energy-saving brushless motor with external rotor, Low power consumption and high energy-saving, With parameter setting and valve stroke memory functions.

房间温控 Room Thermostat

注: TR-001 带电源开关 ON/OFF
TR-100 带冷暖开关 Heating/Cooling
TR-16 风速开关 Fan Switch

房间温控器,内置感温膜盒,可根据设定温度,自动控制执行器通断电,从而达到控制阀门流量的目的;主要用于控制中央空调系统或地暖系统中阀门的开启或关闭,达到控制室温的作用。
With built-in sensor, the room thermostat can automatically control the on/off of the actuator according to the set temperature. It's mainly used to adjust the opening/closing of valves in central air conditioning system and under-floor heating system, and finally control the room temperature.

储存温度 Storage temperature	-20~60℃		
工作温度 Operating temperature	2~80℃		
最高耐温 Maximum temperature resistance	95℃		
执行器控制信号 Actuator control signal	0-10V/4-20mA		
适用介质 Applicable medium	水、乙二醇溶液 Water, glycol solution		
KVS	5.5³m/h³		

工作示意图
Working Diagram

毛细管温控 Capillary Thermostat

适用于冷藏、冷冻柜（箱）及类似用途器具的温度控制。
Temperature control for refrigerator, freezer and other similar equipment.

技术参数 Technical Parameter

产品名称 Model	工作温度范围 Temperature range	电气额定值 Electrical rating	差动 Switching differential	毛细管长度 Capillary length
F3000	-35°C~+35°C	16(4)A/250V	≤3.5°C	180mm
F3000C			2°C±1.5°C	1750mm
A2000 (WPR-35LB)			≤3.5°C	180mm
F2000(WPR-35L)			1-3.5°C	1750mm
WPR-35LA			3.5-6.5°C	
WPR-40L	0°C~40°C		≤3.5°C	

毛细管温控 Capillary Thermostat

C系列/G系列：适用于热水器及类似用途器具的温度控制
C series/G series Application: temperature control of boilers and other similar equipment.

技术参数 Technical Parameter

型号 Mode	工作温度范围（可定制） Temperature range (Customizable)	差动 Switching differential	电气额定值 Electrical rating	毛细管长度（可定制） Capillary length (Customizable)
C series	0~90°C	5±3°C	16(4)A 250V	120mm-2000mm
	0~120°C	5±3°C		
G series	0~210°C	5±3°C		
	50~300°C	10±3°C		

手动复位
Manual reset
温度下降≥20°C复位
Temperature decrease ≥20°C, reset

CA系列/GF系列：适用于热水、洗衣机、电烤箱及类似用途器具的温度控制,带漏液保护、手动复位功能。
CA series/GF series Application: temperature control of washing machine, water heater, electric oven and other similar equipment with manual reset function and leakage protection.

技术参数 Technical Parameter

型号 Mode	工作温度范围（可定制） Temperature range (Customizable)	电气额定值 Electrical rating	毛细管长度（可定制） Capillary length (Customizable)
CA series	70~90°C	C-1 0.5A 250V C-2 16(4)A 250V C款	120mm-2000mm
	90~110°C		
	90°C		
GF series	100°C		
	300°C

Flow Switch

FS-25

FS-25B

流量调整范围 (L/min)

配管尺寸	最小 Min.		最大 Max.	
	流量减小 Flow decrease	流量增加 Flow increase	流量减小 Flow decrease	流量增加 Flow increase
1"	18	21	45	50
2"	50	58	150	155
3"	100	115	225	260

电源电压 Supply power	最大工作压力 Maximum admissible static pressure	接口 Installation size	最大管径 Max. pipe diameter	流体温度 Temperature of liquid	防护等级 Protection
16 (6) A 220~250VAC	1MPa	1"	6"	-20~120°C	IP42

适用于制冷、供暖以及感应经过管道的液体流量变化，起到开关信号作用，根据不同的流量需要，开关可以进行调节。
Suitable for cooling and heating system, the flow switch can sense the liquid flow through the pipe, and adjust the flow according to different requirements.

FS-25A

电源电压 Supply power	流体温度 Temperature of liquid	防护等级 Protection	最大工作压力 Maximum admissible static pressure
16(6)A 250VAC	-20~120°C	IP65	1MPa

这款开关适用于制冷、供暖系统，主要用于监测管道里的液体流量。
This switch is suitable for refrigeration and heating system, mainly used for monitoring the liquid flow in the pipeline.

FS-25C

电源电压 Supply power	流体温度 Temperature of liquid	防护等级 Protection
16(6)A 250VAC	-20~120°C	IP60

这款开关用于监测管道里的空气流量。
This switch is used to monitor air flow within a duct and provide a switched output on detection of either a specific air velocity or flow failure.

LS-25A

电源电压 Supply power	流体温度 Temperature of liquid	防护等级 Protection	最大工作压力 Maximum admissible static pressure	浮子尺寸 Float size
16(6)A 250VAC	-20~85°C	IP65	0.5MPa	φ25x130

这款开关主要用于控制液体位置。
This switch is mainly used to control liquid level in a tank or vessel, to provide a switched output to provide local alarm pump or valve control.
