

LK Metrix Measuring Tool

Measures on the outside of the pipe

Flow measurement has never been easier

A game changer for flow measurement

Flow measurement has never been easier

LK Metrix is a completely new tool for measuring flow in water pipes. You don't need a measurement valve since the tool measures on the outside of the pipe!

The tool is simple, reliable, and efficient for all your flow measurement needs. You can measure multiple flows simultaneously by connecting sensors in series.

There is no equivalent to LK Metrix on the market. LK Metrix is simply a game changer when it comes to flow measurement.

Efficient non-invasive measurement

LK Metrix measures on the outside of the pipe, eliminating the need for measuring valves and complicated installations. Flow problems can be identified and fixed quickly!

Save your measurements

With the MyLK app, you can save your measurements digitally, which simplifies documentation.

Smarta sensors

A LED indicator clearly shows when the sensor is correctly positioned, and the measurement results are available the moment you connect the sensor to the handheld unit. The sensors are suitable for Multilayer pipes and PEX pipes with dimensions of 12–32 mm. Additional sensors for copper pipes and other materials will be available soon.

User-friendly and portable

LK Metrix offers maximum flexibility and user-friendliness. It is lightweight, easy to use, and requires no specific expertise. You can quickly and accurately identify flow problems.

LK Metrix

- Attaches outside the pipe
- Saves measurements digitally
- No equivalent on the market

For HVAC companies and installers

A revolution in your pocket

For HVAC companies and installers, the LK Metrix measuring tool is a game changer, as it measures on the outside of the pipe. Eliminating the need for measurement valves and complex installations.

Efficient troubleshooting

You can identify and resolve problems faster than ever. Conduct effective flow measurements with the tool mounted directly outside the pipe, with no measurement valves or invasive procedures required. Log your measurements with several sensors simultaneously!

Digital documentation

Measurements can be saved digitally, and you have access to data and reports with the MyLK app.

Portable

LK Metrix is a handheld tool that is easy to carry, simple to use, and requires no specific expertise.

Higher service level and accurate results

You can now measure flow precisely without depending on whether the pipes in a property have measurement valves.

For property owners and building technicians

You're in control!

For property owners and building technicians, LK Metrix is an invaluable investment. The tool provides advanced flow monitoring, helping you avoid unnecessary expenses and extend the lifespan of your piping system.

Simple flow check

Monitor and troubleshoot flow issues on your own before calling for HVAC assistance. With LK Metrix, you can easily perform initial diagnostics and get a clear picture of the situation. This enables you to act quickly and potentially resolve the problem yourself.

Cost-effectiveness

Reduce unnecessary costs by ensuring assistance is only needed when absolutely necessary. Having access to precise measurement data allows you to make informed decisions and avoid unnecessary expenses for urgent repairs.

Long-term security

Optimize operating costs and avoid expensive damages. Regular monitoring and quick actions can extend the lifespan of your piping system and improve the overall operational efficiency of your property.

Smart and simple

Save measurements digitally

With LK Metrix, flow measurement in water pipes is super easy. You don't need a measurement valve since the tool is attached outside the pipe. Measurements are digitally saved in the cloud, giving you access to data and settings via the MyLK app. The tool is developed with user-friendliness in mind.

Loaded with value

Easy to carry

LK Metrix offers maximum flexibility and user-friendliness. The tool is lightweight, simple to use, and requires no specific expertise. You can quickly and accurately identify flow problems, saving time and resources for both HVAC companies and property owners. Measurement data is saved digitally and easily retrieved for comparisons over time. This improves documentation and traceability in your work.

The future is here, and so are we

LK continues to lead the way in HVAC innovation with LK Metrix. Experience the difference with a flow meter that not only simplifies your work but also raises the standard for the entire industry. With our expertise and your commitment, we can together create a simpler and smarter everyday life.

Discover how LK Metrix can transform your workflow and give you the control you need to succeed. Embrace the future of flow measurement and let LK Metrix become a part of your toolbox. Experience the benefits of a digital solution that truly makes a difference!

For the simpler, smarter everyday

Simpler. Smarter. More sustainable. At LK, we believe there's a better way to do everything. That's why – from water, heating and hydronic solutions to pipe extrusion – we push for innovation over status quo and simplicity over complexity. It's a belief all of us at LK apply to every product and solution we create.

LK Systems is a Nordic leader in solutions for heating and tap water systems. Our systems are easy to install, and we are more than happy to use our prefabrication plant to manufacture customised systems that further simplify installation. From idea to finished product, we have the smartest solutions for both today and tomorrow.
