Isola

The energy efficient floating foil

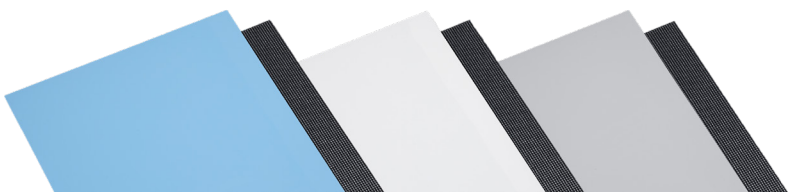

Looks good and keeps the heat and water in the pool!

The insulation cover from BAC - for the greatest possible enjoyment of your swimming pool!

- **Maximum energy savings**
for your budget
- **Maximum heat and moisture retention**
for our environment
- **Minimum use of chemicals**
for your healthy bathing pleasure
- **Perfect protection against dirt**
for your well-being
- **Extended bathing season**
for your vacation feeling
- **Exact fit**
for your individual pool

Material

- Insulation foil in three-layer structure

Quality in 3 layers

Noble and easy-care foil cover made of three layers, which floats on the water and protects your pool from cooling down. The soft but robust cover foil ensures long durability and prevents dirt from penetrating. Two additional layers prevent water and heat loss. Suitable for installation with an above-ground roll-up device. So easy to extend your bathing pleasure!

- **Top side:** fabric-reinforced, extremely tear-resistant cover film made of particularly UV-resistant material
- **Middle class:** pyramid shaped embossed insulation foam
- **Bottom side:** abrasion-resistant, chemical- and microbe-resistant bottom film as vapor barrier and to protect the insulating foam

Certificates

Energy label

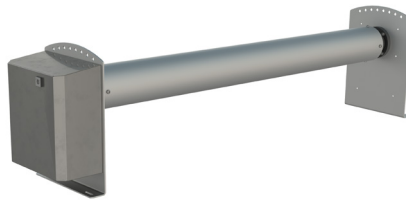

Our Isola covers all meet the requirements of energy efficiency class B of the new environmental standard DIN EN 17645.

*Water temperature 25 °C; air temperature 15 °C; bottom temperature 20 °C; May to October; bathing time 1 h per day (Fig. mutatis mutandis).

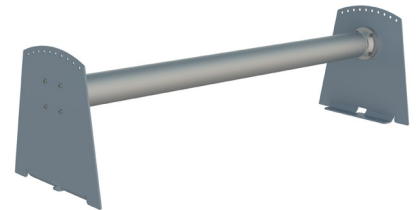

Roll-up mechanisms

RONDA
manual/semi-automatic

ACOE

ROLLFIX

Opening and closing made easy!

BAC offers you different roll-up systems tailored to your needs. Whether manually or electrically operated - the low weight of the Isola guarantees the easiest operation in both versions and facilitates guiding when opening and closing the basin.

- Simple operation manual or semi-automatic
- Retrofitting possible without problems
- A sun protection cover extends the life and protects your Isola from damage due to environmental influences

Suitable also for your indoor pool

Outdoors, the Isola cover protects against temperature and water loss. In indoor swimming pools, the Isola significantly reduces the required switch-on time of dehumidification units. Thus, the Isola contributes to the prevention of building damage in an energy-saving way.
