

Cover systems for public pools

Individual solutions for outdoor pools

indoor pools ■ hotel pools

BAC - Your competent partner - also for municipal systems!

- Planning, development and production under one roof
- Installation on site
- Expert advice
- Over 40 years of experience
- Highest quality
- Customized production
- Handmade in Germany

Keeps the heat in the pool and the dirt out!

- **Maximum energy savings**
for your budget and the environment
- **Minimal use of chemicals**
for healthy bathing pleasure
- **Perfect protection against dirt**
for the well-being of your guests
- **Extended bathing season**
for that vacation feeling
- **Low maintenance costs**
- **Technically proven and durable**
- **Robust and easy to operate**
- **Own development**

Isola

An easy-care foil cover consisting of three layers that floats on the water to protect the pool from cooling down. The soft but robust cover film ensures durability and prevents the ingress of dirt. Two further layers prevent water and heat loss. Suitable for installation with an above-ground roll-up device.

Material

Top side:

Fabric-reinforced, extremely tear-resistant cover film made of particularly UV-resistant material

Middle class:

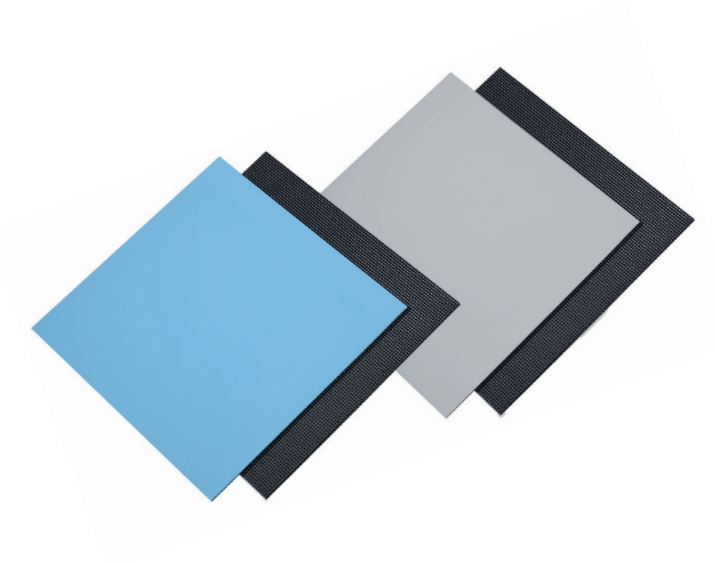

Pyramid-shaped embossed insulating foam

Underside:

Abrasion-resistant, chemical- and microberesistant underlay as a vapor barrier and to protect the insulating foam

Roller shutter

As an alternative to our Isola, we offer fully automated roller shutter covers. These can be used for suitable pool shapes and sizes. Translucent or solar versions allow additional heating by the sun.

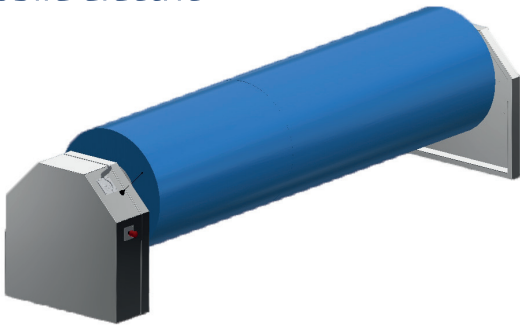

Roll-up systems

Are you looking for a well thought-out, practical system that stows the cover when rolled up? We supply both system solutions and special designs that enable undisturbed bathing operations in the parked position.

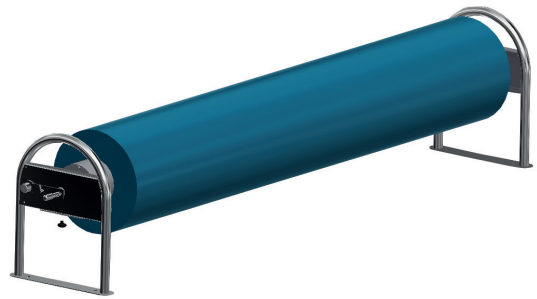

AV643

- stationary electric
- mobile electric

RONDA II

- stationary or mobile with hand crank
- stationary or mobile electric

Lifting platform

Depot

Floor shaft

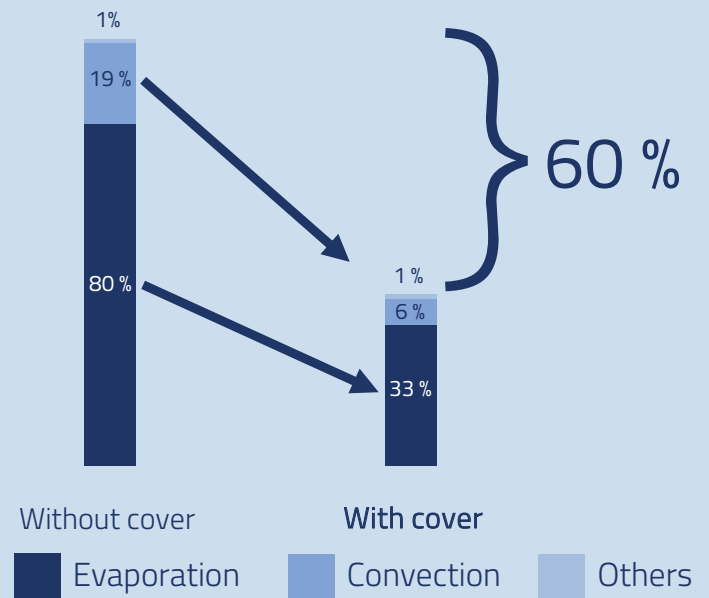

Mobile reeling systems

Energy efficient

For over 40 years, BAC has been supporting planners and operators in the comprehensive energy optimization of public outdoor pools, indoor pools and hotel pools.

In addition to the development, planning and installation of cover systems, our range of services also includes expert advice during the project planning phase. We help you to determine real energy-saving potential with reliable amortization calculations.

Extension of the swimming season
