

Slatted Cover

The premium cover

Looks good and keeps the heat and water in the pool!

The slatted cover from BAC, your competent partner for the greatest possible enjoyment of your swimming pool!

- **Maximum energy savings**
for your budget and the environment
- **Minimal use of chemicals**
for your healthy bathing pleasure
- **Perfect protection from dirt**
for your well-being
- **Extended bathing season**
for your vacation feeling

Material

- PVC / Polycarbonat (PC)
- Robust UV-resistant PC thanks to special coating
- Various high quality Solar versions available
- Wide range of colors and profiles

Slatted cover

For highest demands

BAC slatted cover in different colors and variants for convenient and fully automatic opening and closing of your pool. Save energy at the touch of a button!

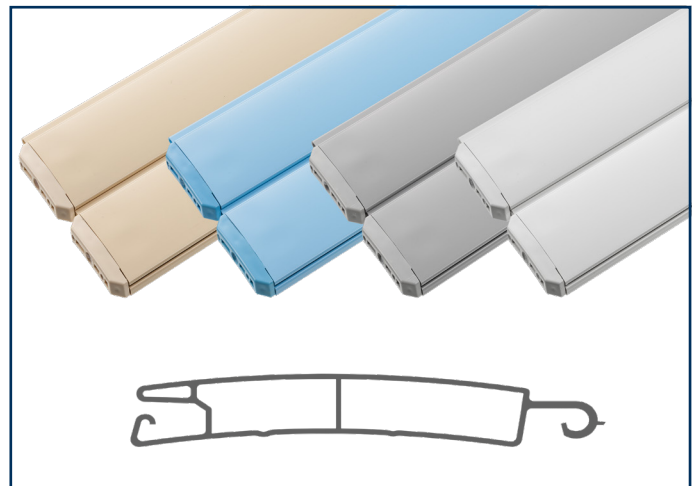

Aesthetics, functionality and very good thermal insulation make the BAC slatted covers the optimal solution for your swimming pool. Due to the reduced UV incidence into the pool, algae growth is reduced to a minimum. With the models in translucent or solar design, the water is additionally heated by the solar radiation.

Duotherm

The slim profile

The slats with two closed profile chambers can be rolled up particularly compactly due to their curved geometry and small dimensions.

- Ideally suited for retrofitting
- Perfect for smaller pools
- Favorable purchase price
- End caps in the color of the profiles

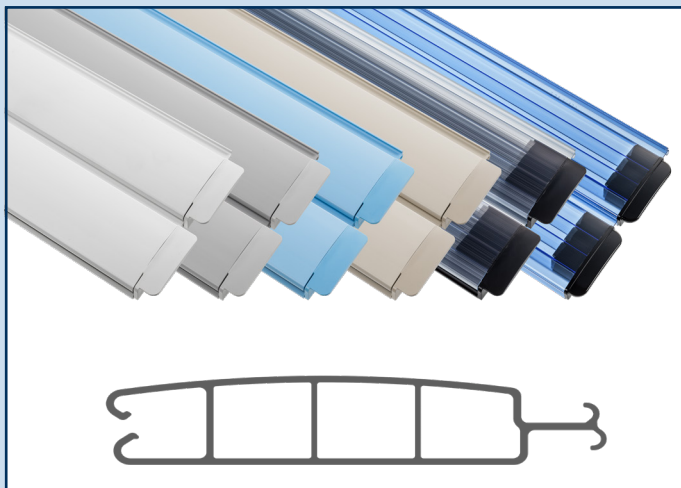

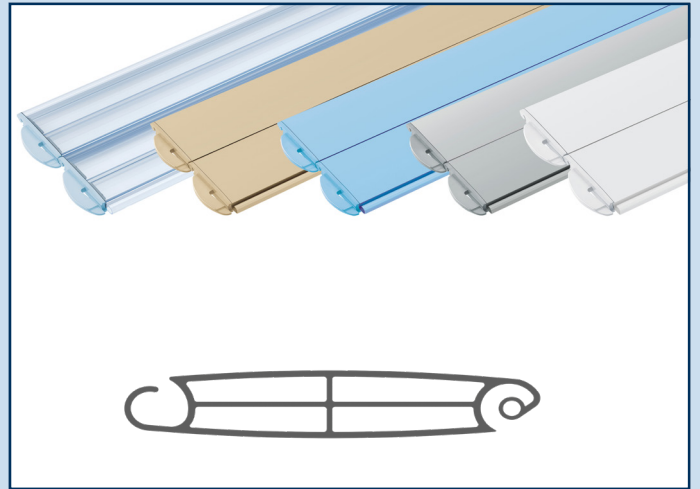

Twist

The agile profile

For symmetrical basins, the cover can be turned. The compact shape and the geometry of the hook chamber allow a small winding diameter.

- Self-cleaning and long durability
- Minimum winding diameter
- Homogeneous overall picture
- End cap in the colors of the profiles

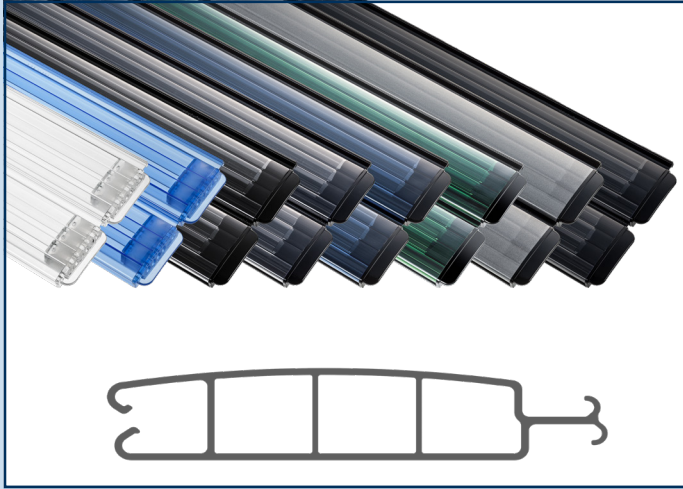

Rollmatic PVC

The universal profile

Take advantage of the proven Rollmatic cover made of rigid PVC! Stability and functionality for the highest requirements.

- Very robust: Hail resistance class HW 3 for all opaque colors
- End caps in the colors of the profiles (for colored slats)

Rollmatic PC

The Premium-Profile

Polycarbonate slats have the best properties in terms of heat resistance and strength. In addition to the UV absorber inside the material, our PC profiles are equipped with a UV protective layer on the surface. This protects against premature yellowing and embrittlement.

- Tri-extrusion (for solar versions)
- Very robust: Hail resistance classes up to HW 5 (solar blue)

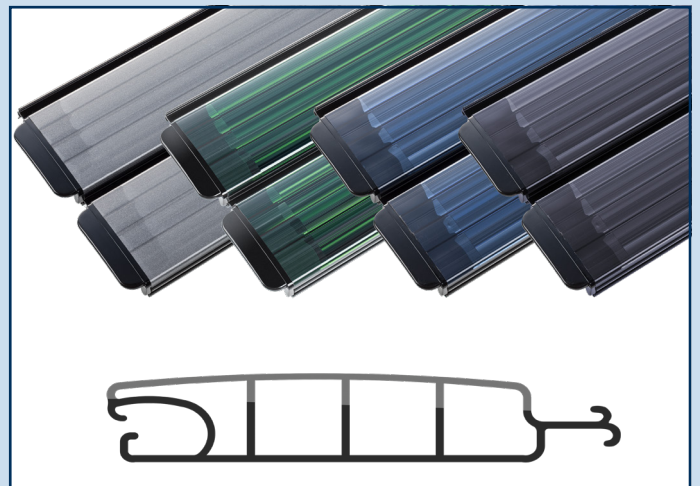

Rollmatic PC-PRO

The high-end profile

The advantages of a polycarbonate cover in combination with a light-protected hook chamber provides optimum algae protection. Also with this profile, the double hook ensures a secure hold, even in complicated installation situations.

- Tri-Extrusion
- Very robust: Hail resistance classes up to HW 4 (solar blue, solar silver)

Accessories

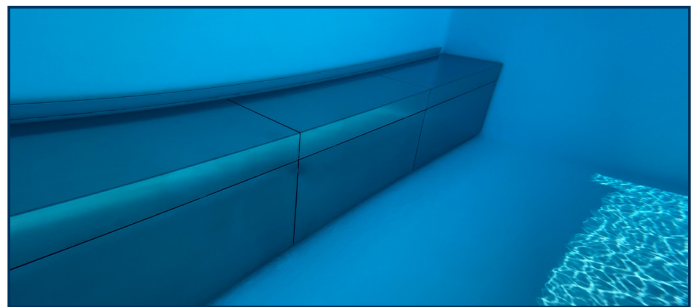

Key switch

Radio remote control

Roll-up systems
above ground / below ground

Cladding above ground / below ground

Certificates

Hail protection

Certified hail protection on appearance and functionality on a variety of models and colors.

Energy label

Our slatted cover in solar and transparent versions meet the requirements of energy efficiency class A of the new environmental standard DIN EN 17645. All colored profiles from us achieve energy efficiency class B.

*Water temperature 25°C; air temperature 15°C; bottom temperature 20°C; May to October; bathing time 1 h per day (Fig. mutatis mutandis).
