- 5 different colors

Models

Novatrend

Our cheapest

You love right angles? With our model Novatrend we cover almost all pool shapes rectangular. For all who like it safe and cheap.

Aluminum tubes visible in the edge area above the cover.

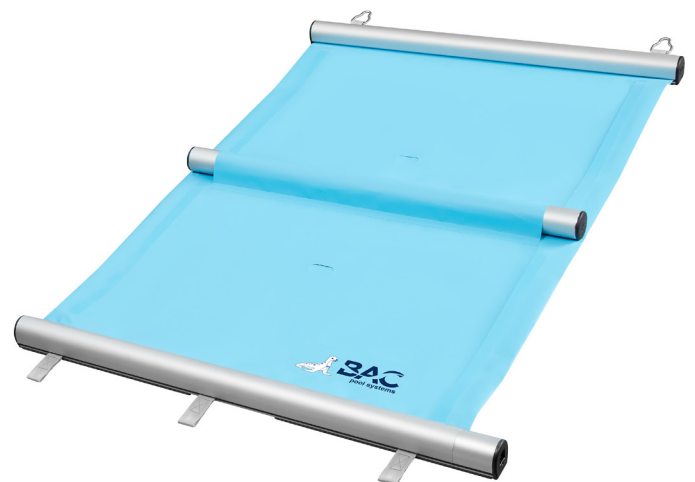

Multiversal

Our versatile

Does your pool have an unusual shape? With our Multiversal model, we can adapt your cover to almost any pool floor plan.

Aluminum tubes incorporated into tunnel pockets - visible segments harmoniously divide the surface.

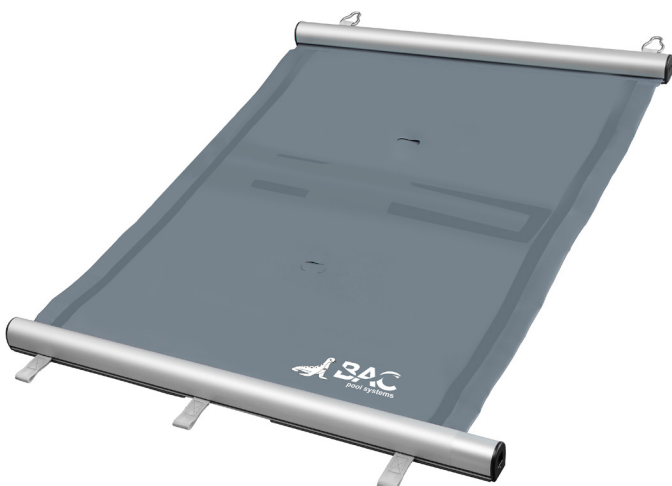

SwissTop

Our sophisticated

You want your roll protection in premium design? The SwissTop model offers a noble and harmonic look.

Aluminum tubes incorporated below - not visible above.

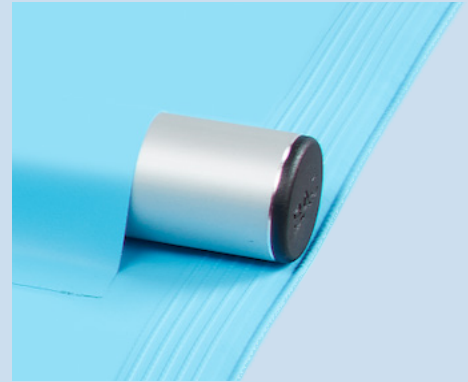

Versions

Standard version

Lateral hemstitch, which allows the use of additional longitudinal bracing.

Recommended for exposed pool locations and beaded beach slabs.

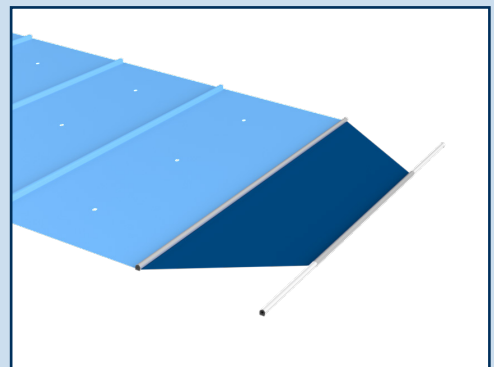

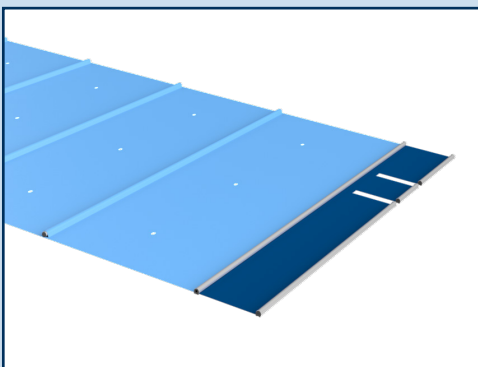

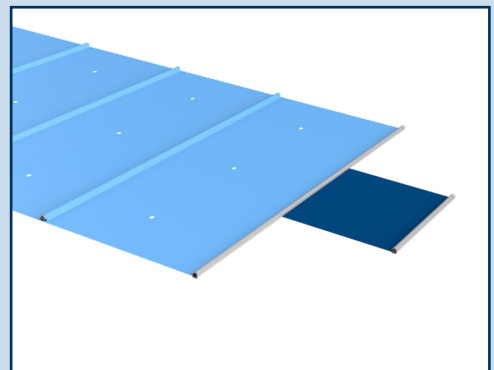

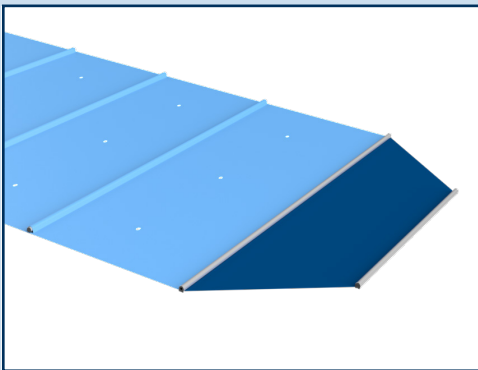

Keder version

Edge reinforcement with original BAC piping, for maximum stability and flexible bracing on the long side.

Recommended for special shapes and covers with side cut-outs.

Individuality

Fasteners

We offer the right fastening for almost any surface.

Ground anchor

Stainless steel anchor

Long ground anchor

Wall anchor

Guy wires

Individual and easy to use guy wires. Various options for additional lateral securing.

Rewind systems

Easy handling with best price-performance ratio.

Manual rewind (standard)

Electric rewind (optional)

Certificates

Confirmation of conformity

Certified safety cover according to standard NF P 90-308. (With proper bracing and a perimeter edge support of at least 20 or 25 cm).

Energy label

Our roll protection models all meet the requirements of energy efficiency class B of the new environmental standard DIN EN 17645.

*Water temperature 25°C; air temperature 15°C; bottom temperature 20°C; May to October; bathing time 1 h per day (Fig. mutatis mutandis).
