

KITFIX

Anchoring system which takes advantage of the holes in the reinforced structural part of the chassis

Benefits of KITFIX: fast anchoring with no need of removing / setting on the shields and no damage / restoration of the pinchwelds

KX

KITFIX 1

KITFIX EX

KITFIX BMW

KITFIX MERCEDES

KITFIX

The innovative proposal from FITIM to fasten cars during repairs

KITFIX is preferably used with KX supports but it is compatible with JOLLIFAST and MULTIFIX 09 and MULTISSET as well

KITFIX is anchored to the strong round and oblong holes of large diameter that cars, SUVs and 4x4s have in their underside; like Mercedes and BMW cars that have always been anchored in this way, most of cars, SUVs, 4x4s and commercial vehicles on the market can be fastened like that

KITFIX EX includes a panel with 4 packages of 4 fixtures

KITFIX 1 includes 1 package of 4 fixtures for round or oblong holes so that each customer may purchase single packages for the cars they mostly repair

Diameter of round holes or oblong holes dimension shown on each bush with fastening pivot as well as on the panel
