

CORPORATE PRESENTATION

Your coolness is on us since 2003

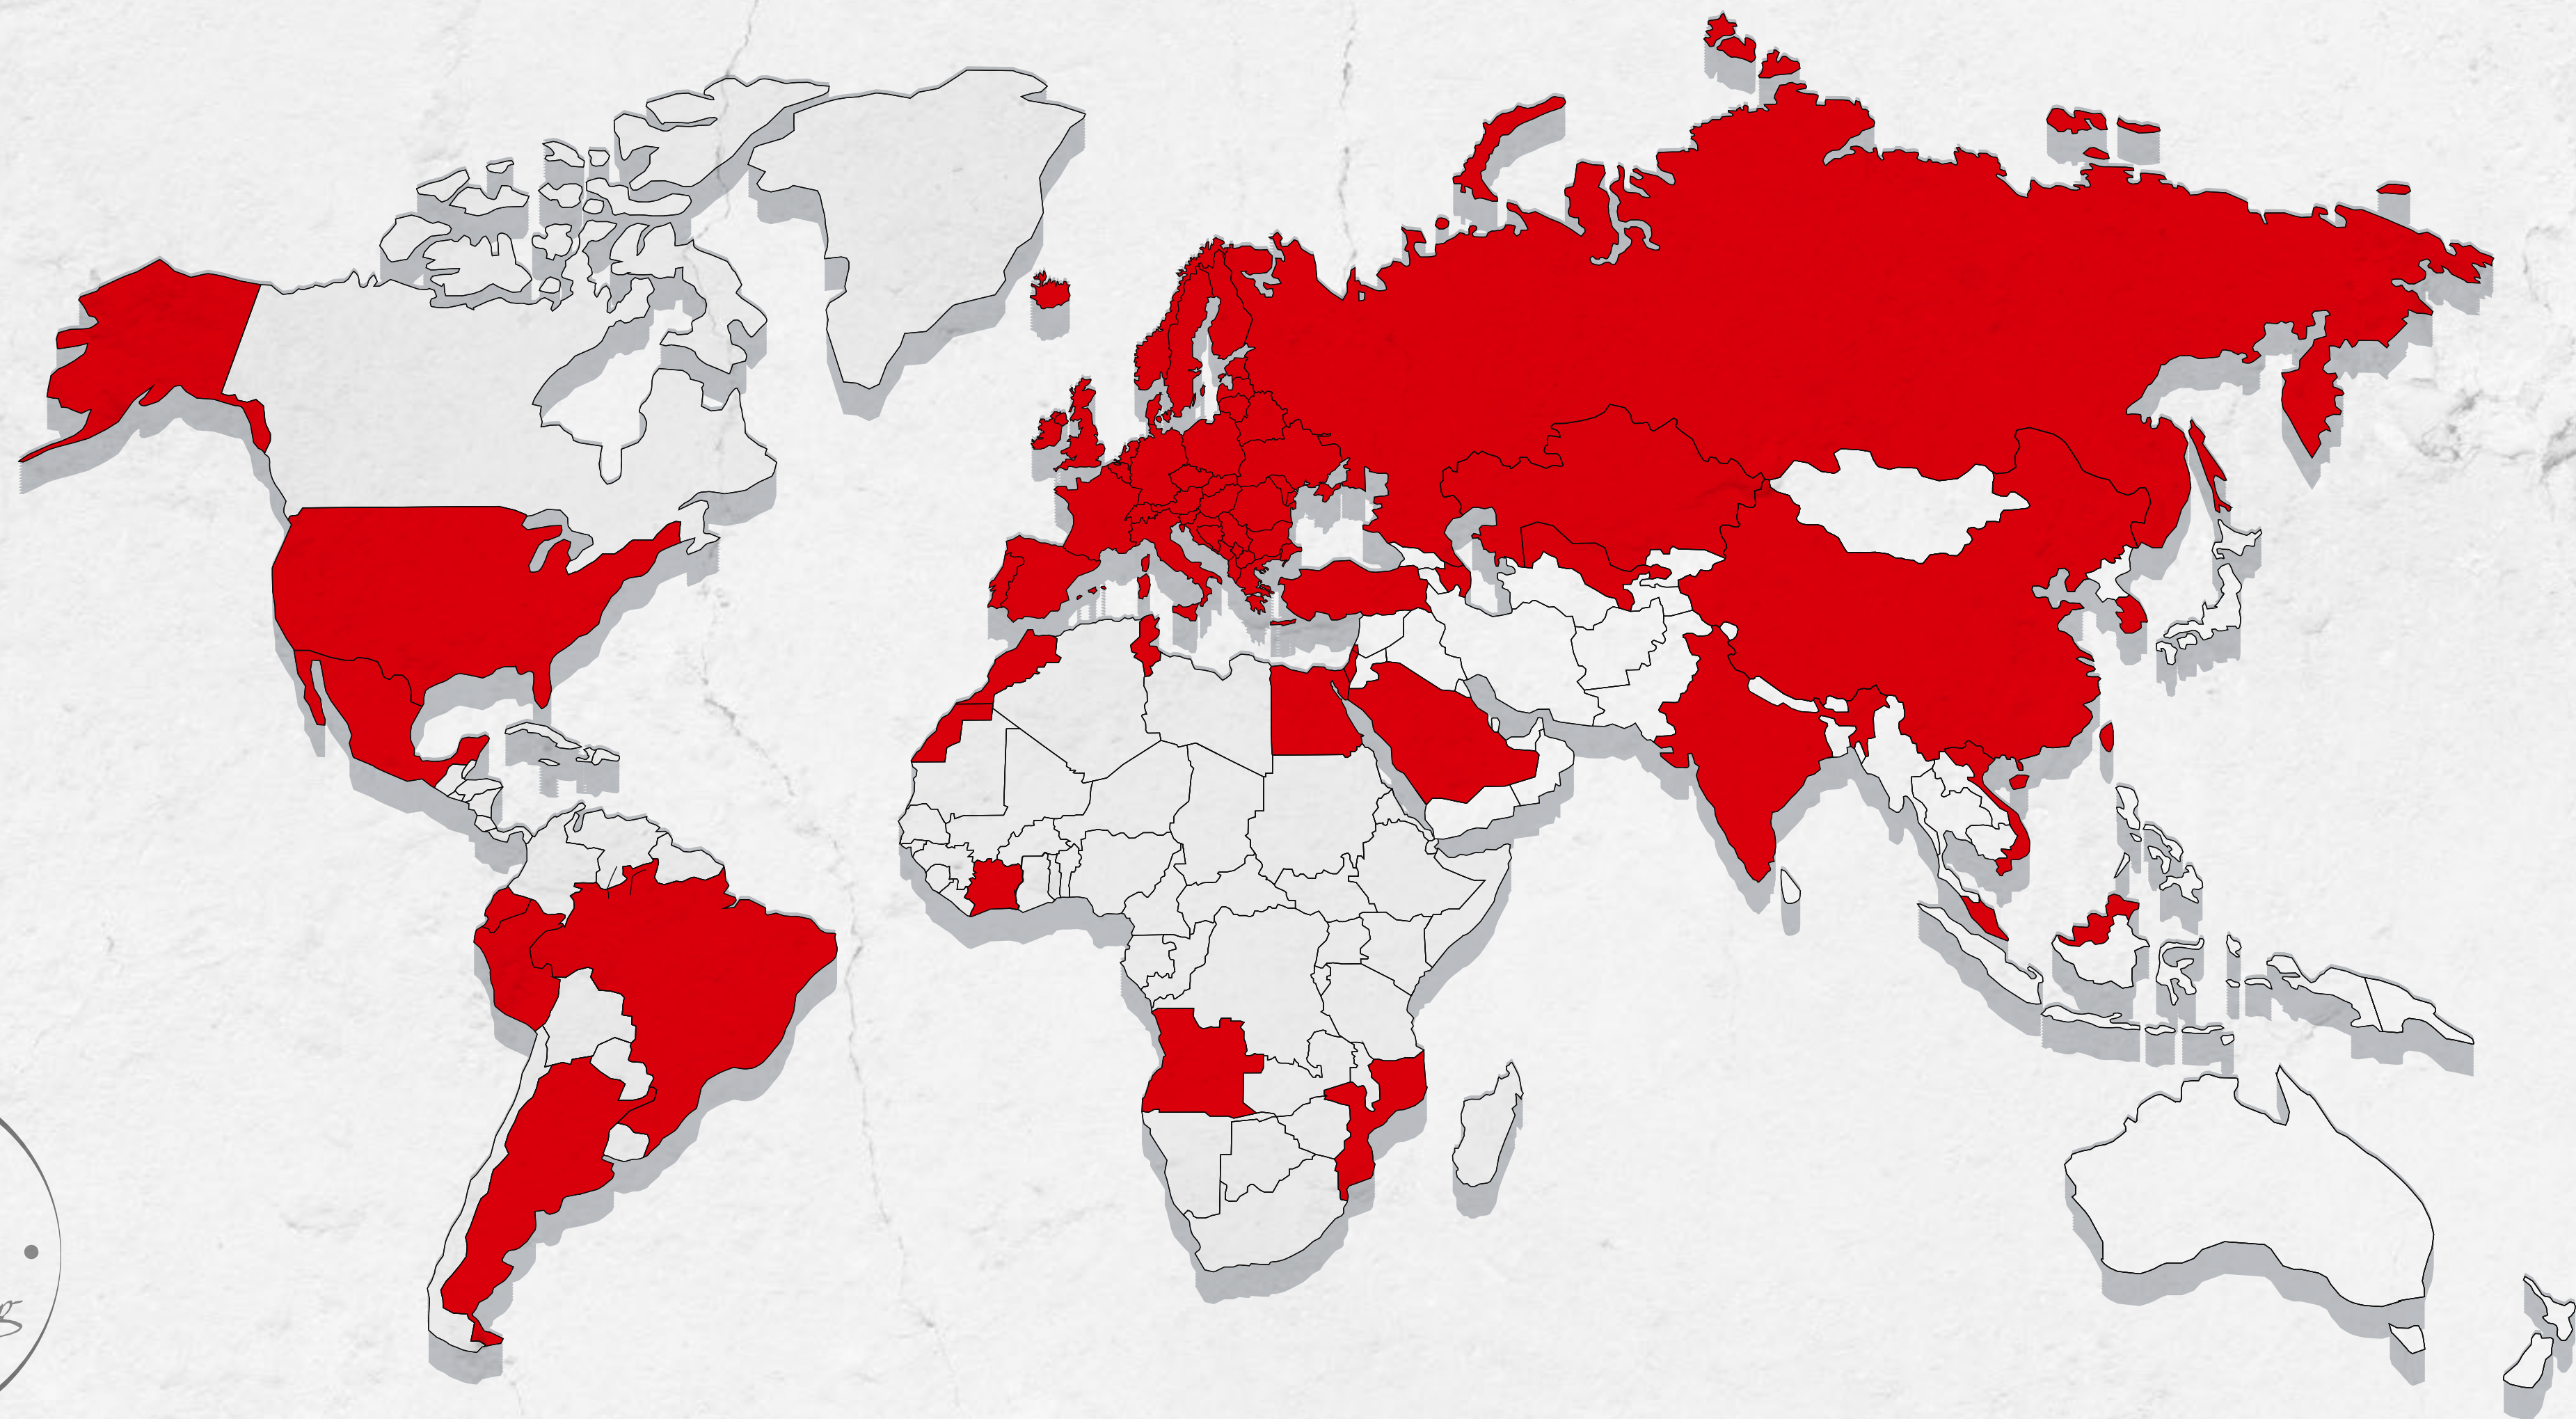

since 2003

Our core values

*"Providing A/C specialists with top-notch, innovative solutions
for a professional A/C systems maintenance, at the best P/Q ratio"*

Our story

Twenty years of experience, customer oriented approach, a team of young under 30 professionals with an eye to innovation and our planet: this is the winning formula of Elke.

Elke is an Italian manufacturing company based in Torino.

Its core business is the production and trade of innovative solutions for the maintenance of the entire cold chain.

Elke turns to 3 different markets:

- Automotive A/C systems
- A/C systems in domestic and industrial sectors
- Domestic and industrial refrigeration

Our headquarters is in Nichelino (Torino), with an area of 1000 m2 used as offices, 2500 m2 used as production plant and 5000 m2 used as warehouse.

We count on a team of 35 employees and a qualified group of external and specialized consultants.

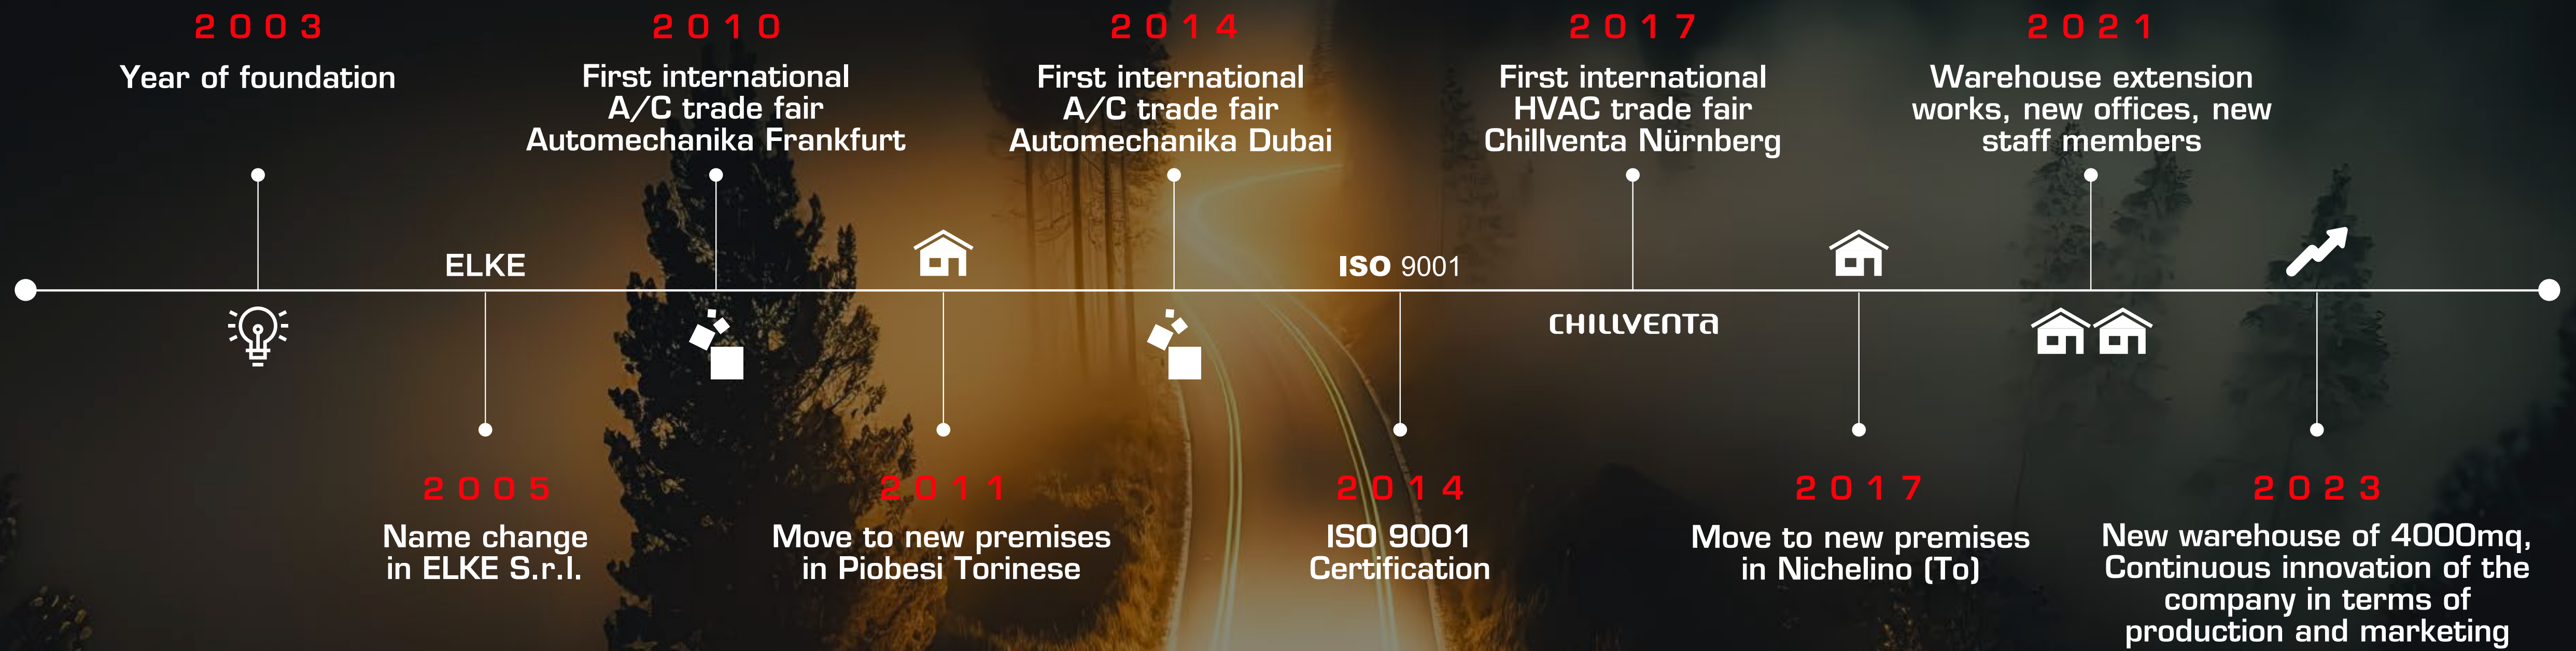

We believe in gender equality: more than 60% of our employees are women.

We export all over the world.

Since January 2021, we are official Authorized exporters. This means a reduction in export shipping times and costs for our customers.

We are proudly business partners of the most important manufacturers of A/C charging stations, as well as spare parts dealers and equipment suppliers. Our partners and distributors are located in more than 50 Countries all over the world.

Our
journey

Elke today

Since 2003, partner of the leaders in the A/C automotive aftermarket and HVAC distribution

- A/C EXPERTS FOR MORE THAN 20 YEARS
- RECOGNIZED EXCELLENT SERVICE LEVEL
- HIGH PRICE-QUALITY RATIO
- UP-TO-DATE SOLUTIONS FOR ANY A/C SYSTEM
- EUROPE-WIDE RECOGNIZED DISTRIBUTOR FOR AIR CONDITIONING PROFESSIONALS
- RELIABLE PARTNER WITH EXPERTISE ON THE FIELD
- CAPILLARY AND EFFICIENT DISTRIBUTION, VERY CLOSE TO THE END USER
- PASSIONATE AND SERIOUS PARTNER

Our partners

ELKE has a close partnership with OEMs which means constant on time updates on new market trends, innovations on electric vehicles and refrigerants, EU changing legislations and sustainability policy, etc.

- A/C CHARGING STATION MANUFACTURERS
- INTERNATIONAL SPARE PARTS DEALERS
- HVAC SPECIALIZED DISTRIBUTORS

Our project

With the aim of providing support to a fast growing customer base, in 2019 the project ELKE UNIVERSITY started: its purpose is to offer a constant and professional training not only on Elke products but also concerning up-to-date regulations, news and technical support about the ever changing HVAC world.

Innovation, professionalism and passion drive our work every day, and they will be the boost of our continuous growing and achievements.

Well-established leader in the Automotive market at international level, Elke is now playing a crucial role in the research of new ecological solutions, for both the Automotive and HVAC sector, in order to face the already present Earth challenges.

Elke developed in its laboratory "ECOLINE", a new range of detergents formulated with 100% vegetable surfactants and a totally recyclable packaging made from recycled plastics.

The range includes several chemicals for the car care and the air conditioning cleaning and disinfection.

INFORMATION & UPDATES

Continuous updating on the current refrigerant gases legislation, norms on the labelling of the products, chemical analysis and application of new technologies.

AFTER-SALES ASSISTANCE

Daily after-sales provided by a professional team of experts.

Elke supporting the **Green transition**

Since 2020 we developed a professional product line of detergents, which is 100% eco-friendly, not only in its packaging but also in its totally natural chemical formulation.

In fact, those detergents contain only vegetable surfactants and are free from ingredients of petro-chemical origin.

We have two different packagings:

- BAG-ON-VALVE sprays 250mL, metal cans using simple compressed air as a propellant;
- TRIGGERS 750mL, made of recycled plastic and 100% recyclable

New packaging for our products

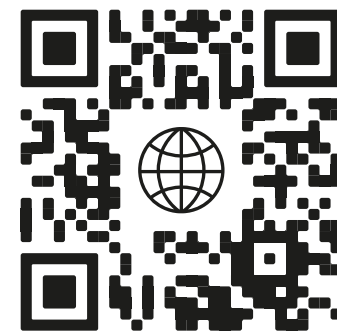

Elke wants to play its role in the global green transition. The success of the entire community depends on individual and companies' small actions.

Step by step, Elke is reducing the plastic use in the products' packaging. When it is not possible, we choose recycled plastic or 100% recyclable plastic.
